

---

## Contents

---

### Part I General Aspects

---

<b>Energy Methods for Constitutive Modelling in Geomechanics</b> <i>I.F. Collins and A.T.T. Tai</i> .....	3
<b>Physical Background of Hypoplasticity</b> <i>Gerd Gudehus</i> .....	17
<b>Thermodynamics of Porous Continua</b> <i>G.T. Houlsby and A.M. Puzrin</i> .....	39
<b>Effective Stress Formulation of Unsaturated Soil Mechanics</b> <i>F. Molenkamp</i> .....	61
<b>Progress in Binary Medium Modeling of Geological Materials</b> <i>Z.-J. Shen</i> .....	77

---

### Part II Constitutive Modelling

---

<b>Generic Constitutive Ingredients in CSSM Models for Sands</b> <i>Y.F. Dafalias, A.G. Papadimitriou, X.S. LI, and M.T. Manzari</i> .....	103
<b>State Boundary Surface in Hypoplasticity</b> <i>D. Mašin and I. Herle</i> .....	117
<b>Modelling of Bonded Soils with Unstable Structure</b> <i>R. Nova</i> .....	129
<b>An Evaluation of Different Constitutive Models to Predict the Directional Response of a Reconstituted Fine-Grained Soil</b> <i>C. Tamagnini, D. Mašin, D. Costanzo, and G. Viggiani</i> .....	143

<b>Two Elastoplastic Models for Small and Large Strains and Their Use in Engineering Practise</b>	
<i>P.A. Vermeer, R. Schwab, and T. Benz</i> .....	159
<b>Elastic Visco-Plastic Models for the Time-Dependent Stress–Strain Behaviour of Geomaterials</b>	
<i>J.-H. Yin</i> .....	175
<hr/>	
<b>Part III Micromechanics</b>	
<hr/>	
<b>Micro-Polar Effects under Monotonic and Cyclic Shearing</b>	
<i>E. Bauer, J. Tejchman, S.F. Tanton, and W. Huang</i> .....	193
<b>Modeling the Postlocalization Regime with Local Second Gradient Models: Nonuniqueness of Solutions and Nonpersistent Shear Bands</b>	
<i>P. Bésuelle and R. Chambon</i> .....	209
<b>Confined Compression and Rod Penetration of a Dense Granular Medium: Discrete Element Modelling and Validation</b>	
<i>Y.C. Chung and J.Y. Ooi</i> .....	223
<b>Application of Discrete Element Method to Geomechanics</b>	
<i>M. Jiang, H.-S. Yu</i> .....	241
<b>The Role of Particle Crushing in Granular Materials</b>	
<i>G. R. McDowell</i> .....	271
<b>Micromechanical Study of Damage and Permeability Variation in Brittle Rocks</b>	
<i>J.J. Zhou, J.F. Shao, and D. Lydzba</i> .....	289
<hr/>	
<b>Part IV Analytical and Numerical Methods</b>	
<hr/>	
<b>Hydrologically Driven Slope Failure Initiation in Variably Saturated Porous Media</b>	
<i>R.I. Borja, G. Oettl, B.A. Ebel and K. Loague</i> .....	303
<b>A Survey of Some Mathematical Results for Highly Frictional Granular Materials</b>	
<i>G.M. Cox, N. Thamwattana and J.M. Hill</i> .....	313
<b>Double-Slip and Spin: Dilatant Shear in a Reduced Cosserat Model</b>	
<i>D. Harris</i> .....	329

<b>The Linear Matching Method for Limit and Shakedown Analysis</b> <i>A.R.S. Ponter and M. Boulbibane</i> .....	347
<b>On Recent Analytical Results for Advective Transport in Fluid-Saturated Porous Media</b> <i>A.P.S. Selvadurai</i> .....	361
<hr/>	
<b>Part V Granular Materials: Theory and Experiment</b>	
<hr/>	
<b>Unusual Soil Behaviour and its Challenge to Constitutive Modelling</b> <i>J. Chu</i> .....	377
<b>Histotropy of Hostun RF Loose Sand</b> <i>T. Doanh, Z. Finge, S. Boucq, and Ph. Dubujet</i> .....	399
<b>Incremental Nonlinearity in Phenomenological and Multiscale Constitutive Relations</b> <i>F. Nicot and F. Darve</i> .....	413
<b>Long-term Deformations in Soils due to Cyclic Loading</b> <i>A. Niemunis, T. Wichtmann, and T. Triantafyllidis</i> .....	427
<b>On the Factors Affecting the Formation of Shear Band Systems in Non-Cohesive Soils Under Extensional Strain</b> <i>T. Triantafyllidis, H. Wolf, and D. König</i> .....	463
<b>Acceleration Waves in Hypoplasticity - 2D Analysis</b> <i>B. Weingartner, V.A. Osinov and W. Wu</i> .....	485
<hr/>	
<b>Part VI Engineering Applications</b>	
<hr/>	
<b>Static and Cyclic Behavior of a Silty Sand According to Tests on Undisturbed Samples</b> <i>A.B. Huang and Y.T. Huang</i> .....	503
<b>The Role of Analysis in Non-Displacement Pile Design</b> <i>R. Salgado</i> .....	521
<b>Assessment of Uncertainties in Wellbore Stability Analysis</b> <i>Y. Sheng, D. Reddish, and Z. Lu</i> .....	541
