
Contents

1	Introduction	1
1.1	Light Interaction with Tissues	1
1.2	Definitions of Polarized Light	3
2	Tissue Structure and Optical Models	7
2.1	Introduction	7
2.2	Continuous and Discrete Tissue Models	8
2.3	Scatterer Size Range and Distribution	9
2.4	Refractive-Index Variations and Absorption	11
2.5	Tissue Anisotropy	14
2.6	Volume Fraction and Spatial Ordering of Particles	18
2.7	Eye Tissue Optical Models	20
2.8	Fractal Properties of Tissues and Cell Aggregates	26
2.9	Summary	28
3	Polarized Light Interactions with Weakly Scattering Media	29
3.1	Introduction	29
3.2	Noninteracting Particles	30
3.3	Densely Packed Correlated Particles	36
3.4	Summary	42
4	Polarized Light Interactions with Strongly Scattering Media	45
4.1	Introduction	45
4.2	Multiple Scattering and Radiative Transfer Theory	46
4.2.1	Vector Radiative Transfer Equation	46
4.2.2	Scalar Radiative Transfer Equation	48
4.3	Monte Carlo Simulation Technique	52
4.4	Densely Packed Particle Systems	61
4.5	Summary	67

5	Polarization Properties of Tissues and Phantoms	69
5.1	Introduction	69
5.2	Light Scattering Matrix Meters	70
5.3	LSM of Thin Tissue and Cell Layers	72
5.4	Strongly Scattering Tissues and Phantoms	77
5.5	Summary	83
6	Polarization-Dependent Interference of Multiply Scattered Light	85
6.1	Introduction	85
6.2	Coherent Backscattering	86
6.3	Polarization-Dependent Temporal Correlations of the Scattered Light	91
6.4	Polarization Microstatistics of Speckles	99
6.5	The Concept of Polarization-Correlation Universality	103
6.6	Summary	110
7	Decay of Light Polarization in Random Multiple Scattering Media	111
7.1	The Similarity in Multiple Scattering of Coherent Light	111
7.2	Influence of Scattering Anisotropy and Scattering Regime	119
7.3	Residual Polarization of Incoherently Backscattered Light	124
7.4	Polarization Decay in Absorbing Media	127
7.5	Summary	138
8	Degree of Polarization in Laser Speckles from Turbid Media	139
8.1	Introduction	139
8.2	Experiments and Simulation	140
8.3	Discussion and Conclusions	146
9	Monte Carlo Modeling of Polarization Propagation	149
9.1	Introduction	149
9.2	Method	150
9.3	Results	152
9.4	Summary	159
10	Polarization-Sensitive Optical Coherence Tomography	161
10.1	Introduction	161
10.2	Experimental System: Serial Implementation	162
10.3	Jones Calculus and Mueller Calculus	164
10.4	Experimental System: Parallel Implementation	167
10.5	Experimental Results	172
10.6	Other Implementations	175
10.7	Summary	176

11 Biomedical Diagnostics and Imaging	177
11.1 Introduction	177
11.2 Imaging through Scattering Media and Tissues with Use of Polarized Light	177
11.3 Transillumination Polarization Techniques	181
11.4 Potentialities and Restrictions of Polarization Imaging with Backscattered Light	183
11.5 Polarized Reflectance Spectroscopy of Tissues	191
11.6 Glucose Sensing	192
11.7 Cytometry and Bacteria Sensing	199
11.8 Polarization Microscopy and Tissue Clearing	204
11.9 Digital Photoelastic Analysis	216
11.10 Fluorescence Polarization	218
11.11 Summary	223
Appendix	225
Glossary	229
References	245
Index	279
