

Contents

<i>Preface</i>	vii
<i>M.S. Agranovich</i> Strongly Elliptic Second Order Systems with Spectral Parameter in Transmission Conditions on a Nonclosed Surface	1
<i>A. Ascanelli and M. Cicognani</i> Well-Posedness of the Cauchy Problem for Some Degenerate Hyperbolic Operators	23
<i>M. Cappiello and L. Zanghirati</i> Quasilinear Hyperbolic Equations with SG-Coefficients	43
<i>I. Kamotski and M. Ruzhansky</i> Representation of Solutions and Regularity Properties for Weakly Hyperbolic Systems	53
<i>M. Ruzhansky and M. Sugimoto</i> Global Calculus of Fourier Integral Operators, Weighted Estimates, and Applications to Global Analysis of Hyperbolic Equations	65
<i>G. Garello and A. Morando</i> L^p -Continuity for Pseudo-Differential Operators	79
<i>V.S. Rabinovich</i> Fredholm Property of Pseudo-Differential Operators on Weighted Hölder-Zygmund Spaces	95
<i>M.W. Wong</i> Weyl Transforms and Convolution Operators on the Heisenberg Group	115
<i>M. de Gosson</i> Uncertainty Principle, Phase Space Ellipsoids and Weyl Calculus	121
<i>K. Furutani</i> Pseudo-Differential Operator and Reproducing Kernels Arising in Geometric Quantization	133
<i>J. Toft</i> Hudson's Theorem and Rank One Operators in Weyl Calculus	153
<i>A. Khrennikov</i> Distributions and Pseudo-Differential Operators on Infinite-Dimensional Spaces with Applications in Quantum Physics	161
<i>N. Teofanov</i> Ultradistributions and Time-Frequency Analysis	173

<i>O. Christensen</i>	
Frames and Generalized Shift-Invariant Systems	193
<i>P. Wahlberg</i>	
The Wigner Distribution of Gaussian Weakly Harmonizable	
Stochastic Processes	211
<i>E. Cordero, F. De Mari, K. Nowak, and A. Tabacco</i>	
Reproducing Groups for the Metaplectic Representation	227

Pseudo-Differential Operators and Related Topics

Boggiatto, P.; Rodino, L.G.; Toft, J.; Wong, M.W. (Eds.)

2006, VI, 244 p., Hardcover

ISBN: 978-3-7643-7513-3

A product of Birkhäuser Basel
