

# Contents

Preface .....	vii
Invited Lectures .....	ix
<i>K. Barmak, D. Kinderlehrer, I. Livshits and S. Ta'asan</i> Remarks on a Multiscale Approach to Grain Growth in Polycrystals .....	1
<i>A. Braides and V. Chiadò Piat</i> Another Brick in the Wall .....	13
<i>G. Buttazzo and M.O. Rieger</i> Variational Problems for Functionals Involving the Value Distribution .....	25
<i>G. Del Piero</i> Bi-modal Cohesive Energies .....	43
<i>G. De Matteis and E.G. Virga</i> Criterion for Tricritical Points in Liquid Crystal Phases .....	55
<i>N. Desenzani and I. Fragalà</i> Asymptotics of Boundary Value Problems for Supercritical Ginzburg-Landau Energies .....	75
<i>G.A. Francfort</i> An Introduction to H-measures and Their Applications .....	85
<i>A. Garroni and G. Palatucci</i> A Singular Perturbation Result with a Fractional Norm .....	111
<i>D. Percivale and F. Tomarelli</i> Smooth and Creased Equilibria for Elastic-plastic Plates and Beams .....	127
<i>P. Podio-Guidugli</i> On Concentrated Contact Interactions .....	137
<i>A. Visintin</i> Discontinuous Hysteresis and P.D.E.s .....	149
List of Registered Participants .....	161

Variational Problems in Materials Science

Dal Maso, G.; de Simone, A.; Tomarelli, F. (Eds.)

2006, X, 162 p., Hardcover

ISBN: 978-3-7643-7564-5

A product of Birkhäuser Basel
