1	Introduction	1
	<i>Stefan Enzler</i>	
1.1	Brief Description of CARE Research Project	2
1.2	Brief Description of EPM-Kompas Research Project.....	3
1.3	Brief Description of INTUS Research Project.....	4
1.4	Brief Description of IC Research Project.....	5
1.5	Brief Description of StreaM Research Project.....	6
2	Aspects of Material Flow Management	7
	<i>Stefan Enzler</i>	
2.1	The Term “Material Flow Management”	8
2.2	Stakeholders and Networks of Material Flow Management..	9
2.2.1	Stakeholders in Material Flow Management.....	9
2.2.2	Vertical and Horizontal Co-operations in Material Flow Management (Networking)	13
2.3	Forms of Material Flow Management.....	15
2.3.1	Ecological Quality Improvement and Quality Assurance	16
2.3.2	Material Flow Related Service and Responsibility	16
2.3.3	Lifecycle Based Product Optimisation.....	16
2.3.4	Product-related Recycling and Disposal	16
2.4	Summary	17
	References	18
3	Computer Aided Resource Efficiency Accounting	21
	<i>Timo Busch, Severin Beucker, Andreas Müller</i>	
3.1	Introduction.....	21
3.1.1	Background	22
3.1.2	Macroeconomic Objective Definition	23
3.1.3	Eco-efficiency as a Strategic “Guide Rail” for Enterprises	24

3.1.4	Data Diversity and Decision Support Systems.....	25
3.2	Methodological Approach.....	27
3.2.1	Definition and Limitations of Resource Efficiency Accounting	27
3.2.2	Economic Dimension – Process Cost Accounting	29
3.2.3	Ecological Dimension – Material Intensity.....	30
3.2.4	Eco-efficiency: Objective Function.....	32
3.2.5	REA and Data Collection Levels	33
3.3	Case Study: Toshiba Europe	47
3.3.1	Initial Situation and Objective.....	47
3.3.1	Procedure.....	48
3.3.3	Results of the Resource Efficiency Accounting at Toshiba	50
3.3.4	IT Based and Organisational Implementation of Resource Efficiency Accounting at Toshiba	50
	References	53
4	Measuring Environmental Performance with EPM-KOMPAS Software Tool – Material Flow Analysis, Environmental Assessment and Success Control	57
	<i>Edeltraud Günther, Susann Kaulich</i>	
4.1	Decision Support: The Basic Principle	57
4.2	Willingness and Capability to Perform: Commitment, Competence and Choice.....	58
4.3	Environmental Performance and Environmental Success: What Should Be Measured?	59
4.4	The EPM-KOMPAS: How Does the Tool Work?	64
4.4.1	Step 1: Input/ Output Balance	65
4.4.2	Step 2: Environmental Assessment and Selection of Master Parameters	66
4.4.3	In Detail: Environmental Assessment Method for Master Parameter Determination.....	66
4.4.4	Steps 3 and 4: Identifying Performance Drivers and Determining Objectives.....	72
4.4.5	Steps 5 and 6: Establishing a Process Balance and Selecting Measures.....	73
4.4.6	Step 7: Carrying Out the Environmental Success Breakdown and Variance Analysis	74
4.4.7	In Detail: The Environmental Success Breakdown.....	74

4.4.8	Step 8: Review of Actions and Objectives.....	76
4.5	Practical Application: A Case Study.....	77
4.5.1	Data Collection.....	77
4.5.2	Stakeholder Analysis.....	77
4.5.3	Cause Analysis.....	78
4.6	Strategic Environmental Management and the EPM-KOMPAS Options.....	85
4.7	Outlook.....	88
	References	89

5 **Integrated Controlling Based on Material and Energy Flow Analysis – A Case Study in Foundry Industries91** *Christoph Lange, André Kuchenbuch*

5.1	Introduction.....	91
5.1.1	The INPROCESS Project.....	91
5.1.2	Basics of Integrated Controlling	94
5.2	Phase Model for Introducing Integrated Controlling in Foundry Companies	96
5.2.1	Phase 0: Information Requirements Analysis	98
5.2.2	Phase 1: Process Structure Analysis.....	99
5.2.3	Phase 2: Subprocess Analysis	100
5.2.4	Phase 3: Input-Output Analysis.....	101
5.2.5	Phase 4: Process Cost Analysis.....	104
5.2.6	Phase 5: Performance Indicator-supported Provision of Information	107
5.3	Case Study: Model Foundry.....	110
5.3.1	Basic Structure of the Model Foundry	111
5.3.2	Phase 0: Information Requirement Analysis.....	112
5.3.3	Phase 1: Process Structure Analysis.....	113
5.3.4	Phase 2: Subprocess Analysis	114
5.3.5	Phase 3: Input-Output Analysis.....	117
5.3.6	Phase 4: Process Cost Analysis.....	119
5.3.7	Phase 5: Performance Indicator-supported Provision of Information	124
5.4	Summary	126
	References	128

6	Environmental Accounting Instruments: Implementation & Continuous Use – Concepts for the Application of Input-Output Balance, Environmental Performance Indicators and Flow Cost Accounting.....	131
	<i>Claus Lang-Koetz, Thomas Loew, Severin Beucker, Michael Steinfeldt, Uwe Horstmann, Till Sieghart</i>	
6.1	Introduction.....	131
6.2	Research Project INTUS.....	132
6.3	Combination of Tools	134
6.4	Information Technology Support Concept.....	138
6.5	The Challenge of Organisational Integration	141
6.6	Case Study: Preparation of Corporate Input-Output Balances and Environmentally Related Consumption Quantity Analyses in SAP R/3	145
6.6.1	Initial Situation.....	145
6.6.2	Realisation of Eco Key in SAP R/3	146
6.6.3	IT Related and Organisational Implementation of Eco Key.....	148
6.6.4	Eco Key Usage and Rollout in Group Division	151
6.6.5	Case Study Conclusion.....	152
6.7	Summary and Outlook	154
	References	156
7	Efficient Closure of Material and Component Loops – Substance Flow Oriented Supply Chain Management.....	159
	<i>Martin Ploog, Wiebke Stölting, Marcus Schröter, Thomas Spengler, Christoph Herrmann, René Graf</i>	
7.1	Introduction.....	160
7.2	Procedure for Practical Realisation.....	163
7.3	Implementation of Information Concept.....	164
7.3.1	Agfa-Gevaert AG Information Sources	166
7.3.2	Creating Recycling Passports at Agfa-Gevaert AG	167
7.3.3	Use of Recycling Passports at Recycling Companies....	167
7.4	Recycling.....	168
7.4.1	Calculation	168
7.4.2	Disassembly	171
7.4.3	Results of the Recycling Process	172
7.5	Re-use of Product Components from ADC 70.....	173

7.6	Spare Parts Supplying at Agfa-Gevaert AG, Using ADC Compact Example	184
7.7	Outlook: Strategic Planning for Integrating Product Component Re-use	193
7.8	Summary	194
	References	195
8	Developments in Material Flow Management:	
	Outlook and Perspectives.....	197
	<i>Bernd Wagner, Stefan Enzler</i>	
8.1	Existing Obstacles to Material Flow Management	197
8.2	Required Developments in Material Flow Management ...	198
8.2.1	Standardised Data Collection and Evaluation with ERP System Interface.....	199
8.2.2	Industry-specific Solutions.....	199
8.2.3	Supplementation of Supply Chain (Value-added Chains) Evaluations with Information Flow Analyses	200
8.2.4	Internal Business Models for a Culture of Innovation ...	200
8.2.5	Dissemination and Networking of Research Results	200
8.3	Summary	201
	About the Authors.....	203

Material Flow Management
Improving Cost Efficiency and Environmental
Performance

Wagner, B.;ENZler, S. (Eds.)

2006, XI, 206 p. 54 illus., Softcover

ISBN: 978-3-7908-1591-7
