Foreword	V
Preface	VII
Contributors.....	XIX
1 Introduction	1
<i>Narayana M. Upadhyaya and Elizabeth S. Dennis</i>	
2 Rice Genome Sequence: The Foundation for Understanding the Genetic Systems.....	5
<i>Takashi Matsumoto, Rod A. Wing, Bin Han and Takuji Sasaki</i> Reviewed by Satoshi Tabata	
2.1 The Importance of the Accurate Genome Sequence of Rice	5
2.2 Construction of the Sequence-Ready Physical Maps.....	7
2.3 Two-Step Strategy for Completion of Rice Genome Sequencing	10
2.4 An Alternative Approach—the Whole Genome Shotgun Sequencing of Rice	13
2.4.1 Whole Genome Shotgun Sequencing of <i>japonica</i> Rice (Syngenta)	13
2.4.2 Whole Genome Shotgun Sequencing of <i>indica</i> Rice (BGI)	13
2.4.3 Comparison of Genome Sequences Derived from Whole Genome Shotgun Sequencing and Clone-by-Clone Shotgun Sequencing (IRGSP)	13
2.5 Initial Analysis of the Rice Genome	14
2.6 Current Status and Future Developments	16
Acknowledgments	17
References.....	17
3 Rice Genome Annotation: Beginnings of Functional Genomics.....	21
<i>Takeshi Itoh</i> Reviewed by C. Robin Buell and Battazar A. Antonio	
3.1 Introduction.....	21
3.2 Computational Methods of Annotation.....	22

3.3 Automated Annotation System.....	24
3.4 Comprehensive Genome Annotation and Curation	25
3.5 From Annotations to Functional Genomics.....	26
Acknowledgments	27
References	27
 4 Genome-Wide RNA Expression Profiling in Rice	31
<i>Shoshi Kikuchi, Guo-Liang Wang, and Lei Li</i> Reviewed by Lee Tarpley and Iain Wilson	
4.1 Introduction	31
4.2 Rice Transcriptome—from EST Collection to Microarray	32
4.2.1 Rice EST Collection and the First cDNA Microarray System Based on the EST Clones	32
4.2.2 Full-Length cDNA Project	35
4.2.3 Oligoarray Systems	37
4.3 Deep Transcriptome Analysis of the Rice Genome.....	38
4.3.1 Principles of Different SAGE Techniques	40
4.3.2 Development of the Robust-LongSAGE (RL-SAGE) Method	42
4.3.3 Application of RL-SAGE for Defense Transcriptome Analysis in Rice	43
4.3.4 MPSS for Expression Profiling	44
4.3.5 Deep Transcriptome Analysis Using MPSS.....	44
4.4 Transcriptional Analysis Using Genome Tiling Microarrays.....	45
4.4.1 Principle of Genome Tiling Microarrays.....	46
4.4.2 Application of Genome Tiling Microarray Analysis in Rice.....	47
4.5 Perspective.....	52
Acknowledgments	53
References	54
 5 Rice Proteomics: A Step Toward Functional Analysis of the Rice Genome	61
<i>Setsuko Komatsu</i> Reviewed by Lee Tarpley	
5.1 Significance	61
5.2 Database Based on 2D-PAGE	63
5.2.1 Strategy to Determine Amino Acid Sequences for Construction of the Rice Proteome Database.....	63
5.2.2 Format and Content of the Rice Proteome Database	65
5.2.3 How to Use the Rice Proteome Database.....	66
5.2.4 Cataloging of Proteins in the Rice Proteome Database	67
5.2.5 Future Prospects of the Rice Proteome Database	67

5.3 Functional Analysis Using Differential Proteomics	68
5.3.1 Stresses	68
5.3.2 Hormones	74
5.4 Future Prospects	77
5.4.1 Two-Dimensional Liquid Chromatography and Fluorescence Two-Dimensional Difference Gel Electrophoresis	77
5.4.2 Identification of Protein Modification for Functional Analysis	79
5.4.3 Protein-Protein Interaction Analyses for Functional Prediction	81
5.4.4 Concluding Remarks	83
Acknowledgment	83
References	83

6 Metabolomics: Enabling Systems-Level Phenotyping in Rice Functional Genomics 91

Lee Tarpley and Ute Roessner
Reviewed by Tony Ashton

6.1 Significance	91
6.2 Plant Sampling and Chemical Analysis	92
6.3 Case Studies in Rice Metabolomics	94
6.4 Case Studies Integrating Functional Genomic Levels	96
6.5 Time and Space Limitations in Integrated Functional-Genomic Analyses	98
6.6 Metabolite Response to Perturbation	99
6.7 Databases and Resources	99
6.8 Data Analysis	102
6.9 Summary	104
References	105

7 Use of Naturally Occurring Alleles for Crop Improvement 109

*Anjali S. Iyer-Pascuzzi, Megan T. Sweeney, Neelamraju Sarla, and Susan
R. McCouch*

Reviewed by Evans Lagudah

7.1 Introduction	110
7.1.1 Why Study Natural Variation?	110
7.2 A Plant Breeder's View on Utilizing Natural Variation	111
7.2.1 Importance of Germplasm Conservation for Crop Improvement	111
7.3 Understanding Evolutionary History Through Natural Variation	113
7.3.1 Origins of Natural Variation: A Short History of <i>Orzya sativa</i>	113
7.3.2 Genetic Markers: Assessing Diversity and Population Structure in <i>O. sativa</i>	114

7.4 Natural Variation and Functional Genomics: Utilizing Germplasm to Identify Useful Alleles	116
7.4.1 Genetic Markers and Their Use in Mapping	116
7.4.2 Mapping Populations.....	116
7.4.3 Association Mapping.....	128
7.4.4 Gene Identification and Development of Perfect Markers for Applications in Breeding.....	130
7.5 Natural Variation and Epistasis	132
7.6 Natural Variation or Mutant Analysis?.....	133
7.7 Natural Variation versus Transgenic Approaches for Crop Improvement.....	135
7.8 Conclusions	137
References	137
8 Chemical- and Irradiation-Induced Mutants and TILLING	149
<i>Ramesh S. Bhat, Narayana M. Upadhyaya, Abed Chaudhury, Chitra Raghavan, Fulin Qiu, Hehe Wang, Jianli Wu, Kenneth McNally, Hei Leung, Brad Till, Steven Henikoff and Luca Comai</i>	
Reviewed by Phil Larkin	
8.1 Introduction	150
8.2 Mutagens and Mutagenesis.....	151
8.2.1 Chemical Mutagens.....	152
8.2.2 Irradiation Mutagens	155
8.2.3 Raising Mutant Populations	157
8.3 Rice Mutant Stocks and Databases.....	158
8.3.1 USA Mutant Stocks.....	159
8.3.2 IRRI Mutant Stocks and Database.....	159
8.3.3 China Mutant Stocks	160
8.3.4 Taiwan Mutant Stock	160
8.3.5 Japan Mutant Stock and Database	161
8.4 Forward Genetics with Mutants.....	161
8.4.1 Phenotyping.....	161
8.4.2 Map-Based Cloning.....	162
8.4.3 Detecting Genomic Changes Using Genome-Wide Chips	163
8.5 Reverse Genetics with Mutants	164
8.5.1 PCR Screening	165
8.5.2 TILLING	165
8.6 TILLING in Rice	166
8.6.1 Seattle TILLING Project.....	166
8.6.2 Other Technical Improvements in Rice TILLING	168
8.6.3 TILLING Case Studies for Specific Traits	168
8.7 Future Prospects	172
Acknowledgments	173
References	174

9 T-DNA Insertion Mutants as a Resource for Rice Functional Genomics..... 181

Emmanuel Guiderdoni, Gynheung An, Su-May Yu, Yue-ie Hsing and Changyin Wu
Reviewed by Alain Lecharny and Michel Delseny

9.1 Introduction.....	182
9.2 <i>Agrobacterium</i> -Mediated Transformation of Rice.....	183
9.3 T-DNA as an Insertional Mutagen.....	185
9.4 Rice T-DNA Insertional Mutant Populations	188
9.4.1 Korea	188
9.4.2 China	190
9.4.3 France	192
9.4.4 Taiwan.....	194
9.4.5 Current Collection of T-DNA Insertion Lines and FSTs.....	194
9.5 Current Knowledge on T-DNA Integration in Rice.....	195
9.6 T-DNA Insertion Specificity in Rice	198
9.6.1 Preference Among and Along Rice Chromosomes	198
9.6.2 Preference for Integration into Intergenic versus Genic Regions and Regulatory versus Coding Regions.....	201
9.6.3 Preference for Insertion in Expressed Genes	203
9.6.4 Preference for GC Content and DNA Structure	203
9.6.5 Preference for Functional Category of Genes.....	204
9.6.6 Estimation of the Number of Lines Required to Saturate the Rice Genome	204
9.7 Gene and Enhancer Trapping with T-DNA in Rice.....	204
9.8 Forward Genetics Screens and Gene Isolation Using T-DNA Insertion Lines	208
9.8.1 Gene Trapping	209
9.8.2 Activation Tagging	211
9.9 Reverse Genetics with T-DNA Mutants in Rice.....	212
9.10 Conclusion and Prospects	213
Acknowledgments	215
References.....	215

10 Transposon Insertional Mutants: A Resource for Rice Functional Genomics223

*Qian-Hao Zhu, Moo Young Eun, Chang-deok Han, Chellian Santhosh Kumar,
Andy Pereira, Srinivasan Ramachandran, Venkatesan Sundaresan, Andrew L.
Eamens, Narayana M. Upadhyaya and Ray Wu*
Reviewed by Tony Pryor and John M. Watson

10.1 Introduction.....	224
10.2 Transposon Tagging Systems	225
10.2.1 Activity of Transposons in Rice.....	225
10.2.2 One-Element System versus Two-Element System	229
10.2.3 Design of Constructs	232

10.2.4 Gene and Enhancer Traps	236
10.2.5 Transiently Expressed Transposase System.....	238
10.2.6 A High-Throughput System to Index Transposants.....	238
10.2.7 Using Endogenous Transposons	240
10.2.8 Inducible Transposition.....	243
10.3 Mutagenesis Strategies	245
10.3.1 Random or Non-targeted Mutagenesis.....	245
10.3.2 Localized or Targeted Mutagenesis	246
10.4 Transposon Insertional Mutant Populations	247
10.4.1 CSIRO Plant Industry Population	248
10.4.2 EU (Wageningen) Population	249
10.4.3 National University of Singapore Population	250
10.4.4 Korea Population	251
10.4.5 UC Davis Population	254
10.5 Gene Discovery by Transposon Tagging.....	256
10.5.1 Forward and Reverse Genetics Strategies	256
10.5.2 Other Approaches for Mutation Identification	259
10.5.3 Tagging Efficiency.....	260
10.5.4 Confirmation of Tagged Gene	261
10.6 Future Prospects	261
References	262
 11 Gene Targeting by Homologous Recombination for Rice	
Functional Genomics	273
<i>Shigeru Iida, Yasuyo Johzuka-Hisatomi, and Rie Terada</i>	
Reviewed by Barbara Hohn and Charles White	
11.1 Introduction	273
11.2 Gene Targeting by Homologous Recombination.....	278
11.2.1 Gene-Specific Selection and Gene-Specific Screening.....	279
11.2.2 Strong Positive-Negative Selection for Enriching Targeted Homologous Recombinants	280
11.3 Potential Approaches for Homologous Recombination-Dependent Gene Targeting.....	282
11.4 Concluding Remarks	285
Acknowledgments	286
References	286
 12 RNA Silencing and Its Application in Functional Genomics.....	291
<i>Shaun J. Curtin, Ming-Bo Wang, John M. Watson, Paul Roffey,</i>	
<i>Chris L. Blanchard, and Peter M. Waterhouse</i>	
Reviewed by Werner Aufsatz	
12.1 Introduction	291
12.2 Discovery of RNA Silencing.....	292

12.3 RNA Silencing Pathways.....	295
12.3.1 MicroRNA and Trans-Acting siRNA Pathways	296
12.3.2 Repeat-Associated Small Interfering RNA and RNA-Directed DNA Methylation	296
12.4 Proteins Involved in RNA Silencing Pathways	299
12.4.1 The Dicer-Like Proteins.....	299
12.4.2 Hua Enhancer 1	303
12.4.3 The Double-Stranded RNA-Binding Protein Family	305
12.4.4 The Argonaute Protein Family	305
12.4.5 RNA-Dependent RNA Polymerase (RdRP).....	307
12.4.6 DNA Methyltransferases.....	307
12.5 RNA Silencing and Anti-Viral Defense.....	307
12.6 Gene Silencing Platforms in Plants.....	310
12.6.1 Delivery by Transgenes.....	313
12.6.2 Transient Delivery by Viral Vectors — Virus-Induced Gene Silencing	321
12.6.3 Transient Delivery by <i>Agrobacterium</i> Infection and Biolistics.....	323
12.7 Future Prospects of Gene Silencing Technology in Plants	323
References.....	324
13 Activation Tagging Systems in Rice.....	333
<i>Alexander A.T. Johnson, Su-May Yu, and Mark Tester</i>	
Reviewed by Michael Ayliffe and Venkatesan Sundaresan	
13.1 Introduction.....	333
13.2 Classical Activation Tagging: Enhancer Element-Mediated Gene Activation	335
13.2.1 Classical Activation Tagging in Plants	335
13.2.2 Structure and Function of the CaMV 35S Activation Tagging System.....	336
13.2.3 Variations to the CaMV 35S Activation Tagging System	338
13.2.4 CaMV 35S Activation Tagging Resources in Rice.....	339
13.3 Transactivation Tagging: Transcriptional Activator-Mediated Gene Activation in Specific Cell Types	341
13.3.1 Gene Expression at the Cell Type-Specific Level.....	341
13.3.2 Origin of the GAL4 Enhancer Trapping System.....	342
13.3.3 GAL4 Enhancer Trapping in Plants	343
13.3.4 Cell Type-Specific Activation of Target Genes Using GAL4 Transactivation.....	344
13.3.5 Cell Type-Specific Activation Tagging Using GAL4 Transactivation.....	346
13.4 Future Perspectives	348
Acknowledgments	349
