

CONTENTS

Contributors	xv
Chapter 1	
SIMULATING BACTERIAL BIOFILMS	1
<i>David L. Chopp</i>	
1. Introduction	1
2. General Mathematical Model	3
3. Example: Quorum-Sensing in <i>P. aeruginosa</i> Biofilms	6
4. Numerical Implementation	8
5. Examples	24
6. Conclusion	28
7. Acknowledgments	28
8. References	28
Chapter 2	
DISTANCE TRANSFORM ALGORITHMS AND THEIR IMPLEMENTATION AND EVALUATION	33
<i>George J. Grevera</i>	
1. Introduction	33
2. Distance Transform Algorithms	36
3. Evaluating Distance Transform Algorithms	47
4. Results of Evaluation	49
5. Concluding Remarks	50
6. Acknowledgments	50
7. Appendix	58
8. References	59

Chapter 3

LEVEL SET TECHNIQUES FOR STRUCTURAL INVERSION IN MEDICAL IMAGING	61
<i>Oliver Dorn and Dominique Lesselier</i>	

1. Introduction	62
2. Level Set Techniques for Linear Inverse Problems	63
3. Level Set Techniques for Nonlinear Inverse Problems	76
4. Acknowledgments	87
5. References	88

Chapter 4

SHAPE AND TEXTURE-BASED DEFORMABLE MODELS FOR FACIAL IMAGE ANALYSIS	91
<i>Stan Z. Li, Zhen Lei, Ying Zheng, and Zeng-Fu Wang</i>	

1. Introduction	91
2. Classical Deformable Models	93
3. Motivations for Improvements	97
4. Direct Appearance Models	99
5. Texture-Constrained Active Shape Model	104
6. Evaluation for Face Alignment	110
7. Experimental Results	117
8. Conclusion	129
9. Acknowledgments	129
10. Notes	130
11. References	130

Chapter 5

DETECTION OF THE BREAST CONTOUR IN MAMMOGRAMS BY USING ACTIVE CONTOUR MODELS	133
<i>Ricardo J. Ferrari, Rangaraj M. Rangayyan, J.E. Leo Desautels, Annie F. Frère and Rejane A. Borges</i>	

1. Introduction	134
2. Method 1: Identification of the breast boundary using a traditional active deformable contour model	135
3. Method 2: Identification of the breast boundary using an adaptive active deformable contour model (AADCM)	142
4. Results and Discussion	154
5. Conclusions	160
6. Acknowledgments	160
7. References	162

Chapter 6

STATISTICAL DEFORMABLE MODELS FOR CARDIAC SEGMENTATION AND FUNCTIONAL ANALYSIS IN GATED-SPECT STUDIES	163
<i>C. Tobon-Gomez, S. Ordas, A.F. Frangi, S. Aguade and J. Castell</i>	

1. Introduction	164
2. Three-Dimensional Active Shape Models (3D-ASM)	172
3. Materials and Methods	179
4. Results	183
5. Discussion	189
6. Conclusions	190
7. Acknowledgments	190
8. References	191

Chapter 7

LEVEL SET FORMULATION FOR DUAL SNAKE MODELS	195
<i>Gilson A. Giralaldi, Paulo S.S. Rodrigues, Rodrigo L.S. Silva, Antonio L. Apolinário Jr. and Jasjit S. Suri</i>	

1. Introduction	195
2. Background Review	197
3. T-Snakes Model	199
4. Dual-T-Snakes Algorithm	200
5. Level Set	201
6. Dual-Level-Set Approach	203
7. Segmentation Framework	213
8. Dual-Level-Set Results	215
9. Discussion	223
10. Conclusions and Future Works	225
11. Acknowledgments	225
12. Appendix: Theoretical Perspectives	226
13. References	231

Chapter 8

ACCURATE TRACKING OF MONOTONICALLY ADVANCING FRONTS	235
<i>M. Sabry Hassouna and A.A. Farag</i>	

1. Introduction	235
2. The Fast Marching Method	237
3. Methods	239
4. Numerical Experiments	245

5. Discussion	251
6. Conclusion	253
7. Appendix	253
8. References	258

Chapter 9

TOWARD CONSISTENTLY BEHAVING DEFORMABLE MODELS FOR IMPROVED AUTOMATION IN IMAGE SEGMENTATION	259
<i>Rongxin Li and Sébastien Ourselin</i>	

1. Introduction	259
2. Background	261
3. Skeleton by Influence Zones Based on Topographic Distance	264
4. Computing the GTD Transform and Swamping Transform	266
5. Image Partitioning Based on GTD transforms	268
6. Integration into Deformable Models	270
7. Qualitative Evaluations	273
8. Quantitative Validation	277
9. Application: Determination of Tissue Density	285
10. Discussion and Conclusion	288
11. Acknowledgments	289
12. Notes	290
13. References	290

Chapter 10

APPLICATION OF DEFORMABLE MODELS FOR THE DETECTION OF ACUTE RENAL REJECTION	293
<i>Ayman El-Baz, Aly A. Farag, Seniha E. Yuksel, Mohamed E.A. El-Ghar, Tarek A. Eldiasty, and Mohamed A. Ghoneim</i>	

1. Introduction	294
2. Related Work in Renal Image Analysis Using DCE-MRI	296
3. Related Work in Shape-Based Segmentation	298
4. Methods and Data Acquisition	301
5. Kidney Segmentation	301
6. Model for the local deformation	317
7. Cortex Segmentation	327
8. Results	327
9. Conclusion	329
10. References	330

Chapter 11

PHYSICALLY AND STATISTICALLY BASED DEFORMABLE
MODELS FOR MEDICAL IMAGE ANALYSIS 335*Ghassan Hamarneh and Chris McIntosh*

1. Energy-Minimizing Deformable Models 335
2. Smart Snakes: Incorporating Knowledge about Shape 351
3. Statistically Constrained Snakes: Combining ACMs and ASMs 363
4. Deformable Spatiotemporal Shape Models:
Extending Active Shape Models to 2D+Time 372
5. References 383

Chapter 12

DEFORMABLE ORGANISMS FOR MEDICAL IMAGE ANALYSIS 387

Ghassan Hamarneh and Chris McIntosh

1. Introduction and Motivation 387
2. Deformable Organisms:
An Artificial Life Modeling Paradigm for Medical Image Analysis 391
3. The Layered Architecture of Deformable Organisms 395
4. Results and Applications 428
5. Summary 436
6. Notes 439
7. References 439

Chapter 13

PDE-BASED THREE DIMENSIONAL PATH PLANNING
FOR VIRTUAL ENDOSCOPY 445*M. Sabry Hassouna, Aly A. Farag, and Robert Falk*

1. Introduction 446
2. Previous Work 446
3. Limitation of Existing Methods 449
4. The Proposed Medial Curve Extraction Framework 449
5. Validation and Sensitivity Analysis 462
6. Results 469
7. Conclusion and Future work 473
8. References 473

Chapter 14

OBJECT TRACKING IN IMAGE SEQUENCE COMBINING HAUSDORFF DISTANCE, NON-EXTENSIVE ENTROPY IN LEVEL SET FORMULATION	477
--	-----

Paulo S. Rodrigues, Gilson A. Giraldi, Ruey-Feng Chang and Jasjit S. Suri

1. Introduction	478
2. Related Work	481
3. Background	484
4. Proposed Hausdorff-Tsallis Level Set Algorithm	494
5. Experimental Results	495
6. Discussion	511
7. Conclusions and Future Work	512
8. Acknowledgments	512
9. References	512

Chapter 15

DEFORMABLE MODEL-BASED IMAGE REGISTRATION	517
---	-----

Jundong Liu

1. Introduction	517
2. Mutual Information Metric and Artifact Effects	522
3. Segmentation-Guided Deformable Image Registration Frameworks	531
4. Discussion and Conclusions	538
5. References	539

Index	543
