Foreword	v
<i>Teresa K. Woodruff and Karrie Ann Snyder</i>	
Foreword	vii
<i>Lindsay Beck and Joyce Reinecke</i>	
Contributors	xvii
Part I Introduction	
1. The Emergence of a New Interdiscipline: Oncofertility	3
<i>Teresa K. Woodruff</i>	
Oncofertility: The New Offensive in the War on Cancer	3
Secondary Effects of Treatment on the Health and Quality of Life of Young Survivors of Cancer	4
Fertility Threats Due to Cancer Treatment	5
An Emerging Urgent Unmet Need for Young Cancer Patients: Balancing Life-Preserving but Fertility-Threatening Cancer Treatments	6
<i>Information GAP</i>	9
<i>Data GAP</i>	10
<i>Option GAP</i>	10
Conclusion	11
Part II Fertility Risk and Treatment Options	
2. Fertility Management for Women With Cancer	15
<i>Sanjay K. Agarwal and R. Jeffrey Chang</i>	
Ovarian Physiology	15
Impact of Cancer Therapies on Ovarian Function	18
Current Techniques of Fertility Preservation	20
<i>Embryo Freezing</i>	20
<i>Ovarian Tissue Freezing</i>	22

<i>Oocyte Freezing</i>	23
Future Directions	25
Summary	25
References	26
3. Fertility Preservation in Adult Male Cancer Patients	28
<i>Robert E. Brannigan</i>	
The Impact of Cancer on Male Reproductive Health	28
<i>Endocrine Effects of Tumors</i>	29
<i>Cytotoxic Autoimmune Response</i>	30
<i>Systemic Physiological Changes</i>	31
<i>Psychological Changes Associated with Cancer</i>	31
The Impact of Cancer Treatment on Male Reproductive Health	32
<i>Effects of Radiation Therapy</i>	32
<i>Effects of Chemotherapy</i>	36
<i>Effects of Surgery</i>	38
<i>Effects of Opioids</i>	39
Fertility Preservation in Male Cancer Patients	39
<i>American Society of Clinical Oncology Guidelines</i>	40
<i>Sperm Cryopreservation</i>	41
<i>Overview of Sperm Collection Techniques</i>	42
<i>Testicular Tissue Cryopreservation (ONCO-TESE)</i>	42
Future Directions in Fertility Preservation in Male Cancer Patients	45
Conclusion	45
References	46
4. Managing Fertility in Childhood Cancer Patients	50
<i>Kimberley J. Dilley</i>	
Follow-up Guidelines Related to Male Fertility	51
<i>Risk Factors</i>	51
<i>Surveillance and Screening</i>	51
<i>Additional Management Issues</i>	52
Follow-up Guidelines Related to Female Fertility	52
<i>Risk Factors</i>	52
<i>Surveillance and Screening</i>	53
<i>Additional Management Issues</i>	54
Optimal Care for Pediatric Cancer Patients	54
References	55
5. Fertility Risk in Pediatric and Adolescent Cancers	57
<i>Clarisa R. Gracia and Jill P. Ginsberg</i>	
Scope of the Problem	57
The Importance of Fertility to Cancer Patients	57

Common Cancers in Children and their Treatment	58
Fertility Risks for Young Females	58
<i>Gonadotoxicity of Cancer Treatments</i>	58
<i>Chemotherapy.</i>	59
<i>Radiation.</i>	59
<i>Effects on the Hypothalamic-Pituitary-Ovarian Axis.</i>	61
<i>Pregnancy Outcomes in Cancer Survivors.</i>	63
<i>Options for Preserving Fertility in Girls and Young Women.</i>	63
Fertility Risks for Young Men	64
<i>Chemotherapy.</i>	65
<i>Radiotherapy.</i>	65
<i>Options for Preserving Fertility in Boys and Young Men</i>	66
Ethical Issues in Pediatric Patients	67
Conclusion	67
References.	68

Part III Oncofertility Techniques and Research

6. Bioengineering and the Ovarian Follicle	75
<i>Min Xu, Teresa K. Woodruff, and Lonnie D. Shea</i>	
Follicle Growth In Vivo	76
Culture Systems for Follicle Growth	77
Hydrogels for Three-Dimensional Culture In Vitro	78
Ovarian Transplantation Using Biomaterials	79
Conclusion	80
References.	80
7. The Science of Cryobiology	83
<i>Steven F. Mullen and John K. Critser</i>	
Introduction.	83
Anatomy of Cryopreservation.	83
The Effects of Water Precipitation (as Ice) During Cooling	84
<i>Ice Nucleation, Crystallization, Vitrification, and Devitrification.</i>	84
<i>Solute Concentration as a Result of Ice Crystallization, The Associated Osmotic Effects, and Cell Death at Supra-Optimal Cooling Rates</i>	86
<i>Cell Death at Sub-Optimal Cooling Rates and the Role of Cryoprotectants in Mitigating Cell Damage</i>	90
<i>Cryoprotectants: Beneficial Effects</i>	91
<i>Cryoprotectants: Detrimental Effects.</i>	94
<i>Cell Death at Sub-Optimal Cooling Rates</i>	98
Cooling and Cooling Injury/Cold Shock	99
Vitrification as an Alternate to Equilibrium cryopreservation	102
References.	103

8. Ovarian Tissue Cryopreservation and Transplantation: Banking Reproductive Potential for the Future	110
<i>David Lee</i>	
Indications for Ovarian Tissue Banking	110
<i>Scope of the Clinical Problem and Incidence of Ovarian Failure</i>	110
<i>Gonadotoxicity of Chemotherapy</i>	111
<i>Gonadotoxicity of Radiation Therapy</i>	112
Limitations of Fertility: Preserving Techniques	113
The Promise of Ovarian Tissue Banking	115
<i>Cryopreservation of Ovarian Tissue has been Successful</i>	116
<i>Autotransplantation of Ovarian Tissue has been Successful</i>	117
<i>Problems with Ovarian Transplantation: Re-Introduction of Cancer</i>	123
Xenografting as a Potential Solution	124
Conclusion	126
References	126
9. Progress, History and Promise of Ovarian Cryopreservation and Transplantation for Pediatric Cancer Patients	130
<i>Yasmin Gosiengfiao</i>	
References	132
Part IV Health Care Decision-Making	
10. Oncofertility and the Social Sciences	137
<i>Karrie Ann Snyder</i>	
Studying Cancer Within the Social Sciences	138
Gender and Oncofertility	139
<i>Gender and Patient-Physician Interactions</i>	140
<i>Gender and the Experience of Infertility</i>	141
Race/Ethnicity and Oncofertility	142
<i>Race/Ethnicity and Patient-Physician Interactions</i>	143
<i>Race/Ethnicity and Family and Community Involvement</i>	144
<i>The Digital Divide and Race/Ethnicity</i>	145
Conclusion	146
References	147
11. Shared Decision Making: Fertility and Pediatric Cancers	149
<i>Marla L. Clayman, Kathleen M. Galvin, and Paul Arntson</i>	
The Current State of Pediatric Oncofertility	150
Family Communication in Context	151
Shared Decision Making in Theory and in Practice	152

Decision Making in Pediatrics and Cancer.	152
References.	158

Part V Ethical and Psychosocial Impact of Cancer-Related Infertility

12. Today's Research, Tomorrows Cures: The Ethical Implications of Oncofertility.	163
<i>Leilah E. Backhus and Laurie Zoloth</i>	
Expanding Options for Women – Follicle Preservation and Maturation	165
<i>A Prairie Horizon: The Long View of Research on Fertility</i>	165
<i>The Role of Oncologists and Infertility Specialists.</i>	168
Ethical Issues in the Case of Childhood Cancers	170
<i>The Special Case of Young Girls</i>	170
<i>Research in Children</i>	171
Assessing the Intervention: A Community Consent Process in Action	173
The Ethical Implications for a New Terrain: Therapy or Enhancement?.	174
Recalling a Complex History	176
Conclusion	178
References.	178
13. The Psychosocial Context of Cancer-Related Infertility.	180
<i>Matthew J. Loscalzo and Karen L. Clark</i>	
The Social Context	180
Psychosocial Screening for Infertility Concerns	183
<i>Biopsychosocial Screening Instrument: How Can We Help You and Your Family?</i>	183
Discussion and Implications	188
References.	190
14. Childhood Cancer: Fertility and Psychosocial Implications	191
<i>Karen E. Kinahan, Aarati Didwania, and Carrie L. Nieman</i>	
Recent Research on Late Effects and Infertility	191
Addressing the Threat of Infertility	193
Childhood Cancer Survivors and Fertility Preservation	194
<i>Male Infertility</i>	196
Access to Care	197
Conclusion	198
References.	198

15. Fertility Preservation and Adolescent Cancer Patients: Lessons from Adult Survivors of Childhood Cancer and Their Parents	201
<i>Carrie L. Nieman, Karen E. Kinahan, Susan E. Yount, Sarah K. Rosenbloom, Kathleen J. Yost, Elizabeth A. Hahn, Timothy Volpe, Kimberley J. Dilley, Laurie Zoloth, and Teresa K. Woodruff</i>	
Methods	203
<i>Study Design and Sample Recruitment</i>	203
<i>Data Collection and Analysis</i>	203
Results	204
<i>Sample Characteristics</i>	204
<i>Content Analysis</i>	204
Discussion	211
Conclusion	215
References	216
 Part VI Training in a New Medical Discipline and Medical Guidelines	
16. Oncofertility: A New Medical Discipline and the Emerging Scholar	221
<i>Laxmi A. Kondapalli</i>	
Infertility: An Unmet Clinical Need for Young Cancer Patients	222
Oncofertility and the Oncofertility Scholar	226
<i>Reproductive Endocrinology and Infertility as the Springboard to a New Oncofertility Scholar</i>	226
<i>Research Directions</i>	229
Future Directions	230
Conclusion	231
References	233
 17. Oncofertility Consortium Consensus Statement: Guidelines for Ovarian Tissue Cryopreservation	235
<i>Leilah E. Backhus, Laxmi A. Kondapalli, R. Jeffrey Chang, Christos Coutifaris, Ralph Kazer, and Teresa K. Woodruff</i>	
References	239
 Part VII Patient Stories and Oncofertility	
18. Personal Accounts of Cancer and Infertility	243
<i>Provided by Fertile Hope</i>	
A New Generation of Hope: Antoinette's Story	243
Starting a Family One Day: Adriane's Story	244

An Improvised Script: Beverley's Story	245
Life is Worth Living: Brian's Story	246
Young and Hopeful for the Future: Dorothy's Story	246
Hope, from Texas to Panama: Elia's Story	247
Appendix A: Oncofertility Options	249
<i>Provided by Fertile Hope</i>	
Index	257

Oncofertility

Fertility Preservation for Cancer Survivors

Woodruff, T.; Snyder, K.A. (Eds.)

2007, XVIII, 263 p., Hardcover

ISBN: 978-0-387-72292-4
