

Contents

Chapter 1. Introduction	1
Background.....	1
The purpose of this book	4
Electricity.....	8
Demand for electricity	9
Hydropower	13
Environmental concerns	18
Chapter 2. Water as a Natural Resource.....	19
The basic hydropower model.....	19
Water as a non-renewable resource: Hotelling revisited	23
Several user groups.....	27
Chapter 3. Hydropower with Constraints	33
The variation of prices	33
Constraints in hydropower modelling	35
Optimal management with reservoir constraint.....	37
Introducing terminal conditions.....	40
The bathtub diagram for two periods.....	42
The generation of price changes	45
The terminal period	45
Neither overflow nor scarcity	46
Scarcity in a period other than the terminal.....	48
Threat of overflow	49
Output constraints.....	51
Noncontrollable electricity generation	55
Summing up causes of price variability	58
Determining quantities	61
Chapter 4. Multiple Producers	67
Reservoir constraints	67
Hveding's conjecture.....	71
Output constraints.....	77

Hydraulically coupled hydropower	85
Environmental restrictions.....	88
Chapter 5. Mix of Thermal and Hydropower Plants	95
Thermal plants	95
Social solution of mixed hydro and thermal capacity.....	104
Introducing a reservoir constraint.....	109
Optimal mix of hydro and thermal plants.....	111
A dynamic thermal problem	116
Chapter 6. Trade.....	121
Unconstrained trade.....	121
Reservoir constraint.....	125
Constraints on trade.....	127
Reservoir constraints	133
Trade between countries hydro and thermal	137
Trade with exogenous prices for a thermal economy	137
Trading with endogenous prices.....	140
Trade with constraints on reservoir and trade volumes	144
Chapter 7. Transmission	151
Engineering approach to transmission in economics.....	152
Modelling transmission for simple cases.....	156
Two nodes and two periods	156
Three nodes and two periods	164
A general transmission model	169
Separation into zones.....	176
Network impact on utilisation of hydropower.....	177
Chapter 8. Market Power	181
Monopoly	182
Monopoly and trade.....	187
Monopoly with reservoir constraints.....	193
Monopoly with trade and reservoir constraints	199
Monopoly with hydro and thermal plants.....	202
Dominant firm with a competitive fringe	205
Oligopolistic markets.....	211
Chapter 9. Uncertainty.....	213
The general problem.....	213
A simplified two-period approach	215
Generalisation to T periods.....	225

Hydro and thermal	231
Monopoly revisited	234
Concluding comments	237
Chapter 10. Summary and Conclusions	239
Main drivers of price change	239
Competitive electricity markets	242
Market designs	245
Investments	247
References	251
Author Index	257
Subject Index	259
