# Contents

<b>1</b>	<b>Inverse problems and subjective computing</b>	1
1.1	What do we talk about when we talk about random variables?	2
1.2	Through the formal theory, lightly	5
1.3	How normal is it to be normal?	16
<b>2</b>	<b>Basic problem of statistical inference</b>	21
2.1	On averaging	22
2.2	Maximum Likelihood, as frequentists like it	31
<b>3</b>	<b>The praise of ignorance: randomness as lack of information</b>	39
3.1	Construction of Likelihood	41
3.2	Enter, Subject: Construction of Priors	48
3.3	Posterior Densities as Solutions of Statistical Inverse Problems	55
<b>4</b>	<b>Basic problem in numerical linear algebra</b>	61
4.1	What is a solution?	61
4.2	Direct linear system solvers	63
4.3	Iterative linear system solvers	67
4.4	Ill-conditioning and errors in the data	77
<b>5</b>	<b>Sampling: first encounter</b>	91
5.1	Sampling from Gaussian distributions	92
5.2	Random draws from non-Gaussian densities	99
5.3	Rejection sampling: prelude to Metropolis-Hastings	102
<b>6</b>	<b>Statistically inspired preconditioners</b>	107
6.1	Priorconditioners: specially chosen preconditioners	108
6.2	Sample-based preconditioners and PCA model reduction	118

<b>7</b>	<b>Conditional Gaussian densities and predictive envelopes . . .</b>	<b>127</b>
7.1	Gaussian conditional densities . . . . .	128
7.2	Interpolation, splines and conditional densities . . . . .	134
7.3	Envelopes, white swans and dark matter . . . . .	144
<b>8</b>	<b>More applications of the Gaussian conditioning . . . . .</b>	<b>147</b>
8.1	Linear inverse problems . . . . .	147
8.2	Aristotelian boundary conditions . . . . .	151
<b>9</b>	<b>Sampling: the real thing . . . . .</b>	<b>161</b>
9.1	Metropolis–Hastings algorithm . . . . .	168
<b>10</b>	<b>Wrapping up: hypermodels, dynamic priorconditioners and Bayesian learning . . . . .</b>	<b>183</b>
10.1	MAP estimation or marginalization? . . . . .	189
10.2	Bayesian hypermodels and priorconditioners . . . . .	193
	<b>References . . . . .</b>	<b>197</b>
	<b>Index . . . . .</b>	<b>199</b>

An Introduction to Bayesian Scientific Computing

Ten Lectures on Subjective Computing

Calvetti, D.; Somersalo, E.

2007, XIV, 202 p., Softcover

ISBN: 978-0-387-73393-7
