

---

# Contents

Preface .....	v
Companion CD .....	ix
<b>Part I    <i>Gene Expression Control at the mRNA Level</i> .....</b>	<b>1</b>
JOHN P. VANDEN HEUVEL, PhD	
Contents .....	1
Chapter 1 Overview .....	3
Chapter 2 Messenger RNA Accumulation .....	11
Chapter 3 Transcript Profiling .....	31
Chapter 4 Transcriptional Regulation of Gene Expression .....	49
Chapter 5 Posttranscriptional Processing of Messenger RNA .....	105
Study Questions .....	141
References .....	143
<b>Part II    <i>Regulation of Protein Levels</i></b>	
<b>          <i>and Transcription Factor Function</i> .....</b>	<b>147</b>
GARY H. PERDEW, PhD	
Contents .....	147
Chapter 1 Overview .....	149
Chapter 2 Protein Synthesis and Turnover .....	155
Chapter 3 Proteomics .....	161
Chapter 4 Determination of Protein–Protein Interactions	
and the Motifs That Mediate Them .....	173
Chapter 5 Posttranslational Modifications .....	215
Chapter 6 Dissection of Signaling Pathways .....	239
Study Questions .....	259
References .....	261
<b>Part III    <i>Use of Transgenic and Knockout Mice</i></b>	
<b>          <i>to Study Gene Regulation</i> .....</b>	<b>265</b>
JEFFREY M. PETERS, PhD	
Contents .....	265
Chapter 1 Overview .....	267
Chapter 2 Production of Transgenic Animals .....	271
Chapter 3 Knockout Animals .....	295
Chapter 4 Isolation of Cells and Cell Lines From Transgenic	
and Knockout Animals .....	319
Study Questions .....	321
References .....	323
Index .....	329
