
Contents

Preface	v
Contributors	xi
1 Analysis of Protein Phosphatases: <i>Toolbox For Unraveling Cell Signaling Networks</i> Shirish Shenolikar	1
2 A Brief Introduction to the Protein Phosphatase Families Tomas Mustelin	9
3 Small-Molecule Inhibitors of Ser/Thr Protein Phosphatases: <i>Specificity, Use, and Common Forms of Abuse</i> Mark Swingle, Li Ni, and Richard E. Honkanen	23
4 Synthesis and Use of the Protein Phosphatase Affinity Matrices Microcystin–Sepharose and Microcystin–Biotin–Sepharose Greg B. G. Moorhead, Timothy A. J. Haystead and Carol MacKintosh	39
5 Utilizing Protein Phosphatase Inhibitors to Define PP2A as a Regulator of Ataxia-Telangiectasia Mutated (ATM) Aaron A. Goodarzi, Pauline Douglas, Greg B. G. Moorhead, and Susan P. Lees-Miller	47
6 An Automated Fluorescence-Based Method for Continuous Assay of PP2A Activity Adam M. Wegner, Jamie L. McConnell, Randy D. Blakely, and Brian E. Wadzinski	61
7 An In Vivo Assay to Quantify Stable Protein Phosphatase 2A (PP2A) Heterotrimeric Species Matthew S. Gentry, Richard L. Hallberg, and David C. Pallas	71
8 Mutagenesis and Expression of the Scaffolding A α and A β Subunits of PP2A: Assays for Measuring Defects <i>in Binding of Cancer-Related Aα and Aβ Mutants</i> <i>to the Regulatory B and Catalytic C Subunits</i> Ralf Ruediger, Jin Zhou, and Gernot Walter	85
9 Isolation and Characterization of PP2A Holoenzymes Containing FLAG-Tagged B Subunits Deanna G. Adams and Brian E. Wadzinski	101
10 Purification of PP2A Holoenzymes by Sequential Immunoprecipitation with Anti-Peptide Antibodies Gernot Walter, Jin Zhou, and Ralf Ruediger	113

11	Purification of PP2Ac from Bovine Heart <i>Hue T. Tran, Tony S. Ferrar, Anne Ulke-Lemée, and Greg B. G. Moorhead</i>	127
12	Visualization of Intracellular PP1 Targeting Through Transiently and Stably Expressed Fluorescent Protein Fusions <i>Laura Trinkle-Mulcahy, Janet Chusainow, Yun Wah Lam, Sam Swift, and Angus Lamond</i>	133
13	Yeast Two-Hybrid Screens To Identify <i>Drosophila</i> PP1-Binding Proteins <i>Daimark Bennett and Luke Alphey</i>	155
14	Identification of Cellular Protein Phosphatase-1 Regulators <i>David W. Roadcap, Matthew H. Brush, and Shirish Shenolikar</i>	181
15	Assay for Three-Way Interaction of Protein Phosphatase-1 (Glc7) with Regulatory Subunits Plus Phosphatase Inhibitor-2 <i>Masumi Eto and David L. Brautigan</i>	197
16	Phosphorylation of the Protein Phosphatase Type 1 Inhibitor Protein CPI-17 by Protein Kinase C <i>Michael P. Walsh, Marija Susnjar, Jingti Deng, Cindy Sutherland, Enikó Kiss, and David P. Wilson</i>	209
17	Purification of Smooth Muscle Myosin Phosphatase Using a Thiophosphorylated Myosin Light-Chain-Affinity Resin <i>Meredith Borman and Justin MacDonald</i>	225
18	Proteins Interacting with <i>Saccharomyces cerevisiae</i> Type 1 Protein Phosphatase Catalytic Subunit Identified by Single-Step Affinity Purification and Mass Spectrometry <i>Edmund P. Walsh, Douglas J. Lamont, Kenneth A. Beattie, and Michael J. R. Stark</i>	235
19	Expression of Protein Histidine Phosphatase in <i>Escherichia coli</i> , Purification, and Determination of Enzyme Activity <i>Nicole Bäumer, Anette Mäurer, Josef Krieglstein, and Susanne Klumpp</i>	247
20	The Use of RNA Interference to Analyze Protein Phosphatase Function In Mammalian Cells <i>Iain Fraser, Wei Liu, Robert Rebres, Tamara Roach, Joelle Zavzavadjian, Leah Santat, Jamie Liu, Estelle Wall, and Marc Mumby</i>	261
21	Recognition of a PP2C Interaction Motif in Several Plant Protein Kinases <i>Niranjan Chakraborty, Masaru Ohta, and Jian-Kang Zhu</i>	287

22	Use of Yeast Genetic Tools to Define Biological Roles of Novel Protein Phosphatases Joaquín Ariño, Antonio Casamayor, Amparo Ruiz, Ivan Muñoz, and Maribel Marquina	299
23	Targeting of PP2C in Budding Yeast Irene M. Ota and James Mapes	309
24	Phosphatase Targets in TOR Signaling Estela Jacinto	323
25	Functional Characterization of the Small CTD Phosphatases Michele Yeo and Patrick S. Lin	335
26	Genome-Scale Discovery and Characterization of Class-Specific Protein Sequences: <i>An Example Using the Protein Phosphatases of Arabidopsis thaliana</i> David Kerk	347
27	Yeast Substrate-Trapping System for Isolating Substrates of Protein Tyrosine Phosphatases Masahide Fukada and Masaharu Noda	371
	Index	383
