
Contents

Preface	v
Contributors	ix
1 Manipulation of Cell–Cell Adhesion Using Bowtie-Shaped Microwells Celeste M. Nelson, Wendy F. Liu, and Christopher S. Chen	1
2 Separation of Cell–Cell Adhesion Complexes By Differential Centrifugation Roger Vogelmann and W. James Nelson	11
3 Analysis of Neutrophil Chemotaxis Paul A. Nuzzi, Mary A. Lokuta, and Anna Huttenlocher	23
4 Analysis of Leukocyte Migration Through Monolayers of Cultured Endothelial Cells Helen M. McGettrick, Lynn M. Butler, and Gerard B. Nash	37
5 Biochemical Purification of Pseudopodia From Migratory Cells Yingchun Wang and Richard L. Klemke	55
6 Dynamic Assessment of Cell–Matrix Mechanical Interactions in Three-Dimensional Culture W. Matthew Petroll	67
7 Quantitative Analyses of Cell Adhesion Strength Nathan D. Gallant and Andrés J. García	83
8 Using RNA Interference to Knock Down the Adhesion Protein TES Elen Griffith	97
9 Assaying Calpain Activity Neil O. Carragher	109
10 Analysis of Focal Adhesions and Cytoskeleton by Custom Microarray Matthew J. Dalby and Stephen J. Yarwood	121
11 Proteomic Analysis of Cell Surface Membrane Proteins in Leukemic Cells Robert S. Boyd, Martin J. S. Dyer, and Kelvin Cain	135
12 Bioinformatic Analysis of Adhesion Proteins Josephine C. Adams and Juergen Engel	147

13 Analysis of Integrin Dynamics by Fluorescence Recovery
After Photobleaching
Bernhard Wehrle-Haller 173

14 Double-Hydrogel Substrate as a Model System
for Three-Dimensional Cell Culture
Karen A. Beningo and Yu-li Wang 203

15 In Vitro Actin Assembly Assays and Purification
From *Acanthamoeba*
J. Bradley Zuchero 213

Index 227

Adhesion Protein Protocols

Coutts, A.S. (Ed.)

2007, X, 234 p. 54 illus., 2 illus. in color., Hardcover

ISBN: 978-1-58829-533-0
