

Contents

Preface	v
Contributors	ix
1 Stem Cells and the Art of Mesenchymal Maintenance <i>Kevin C. Hicok and Marc H. Hedrick</i>	1
2 Osteogenic Growth Factors and Cytokines and Their Role in Bone Repair <i>Louis C. Gerstenfeld, Cory M. Edgar, Sanjeev Kakar, Kimberly A. Jacobsen, and Thomas A. Einhorn</i>	17
3 Bone Allograft Safety and Performance <i>Calin S. Moucha, Regis L. Renard, Ankur Gandhi, Sheldon S. Lin, and Rocky S. Tuan</i>	46
4 Biodegradable Orthopedic Implants <i>Hansoo Park, Johnna S. Temenoff, and Antonios G. Mikos</i>	55
5 Titanium Fiber Mesh: A Nondegradable Scaffold Material <i>Juliette van den Dolder and John A. Jansen</i>	69
6 Engineering Polymeric Scaffolds for Bone Grafts <i>Martha W. Betz, Diana M. Yoon, and John P. Fisher</i>	81
7 Injectable Scaffolds for Bone and Cartilage Regeneration <i>Claudio Migliaresi, Antonella Motta, and Anthony T. DiBenedetto</i>	95
8 Motion and Bone Regeneration <i>Ching-Chang Ko, Martha J. Somerman, and Kai-Nan An</i>	110
9 Dental Applications of Bone Biology <i>Thomas W. Oates and David L. Cochran</i>	129
10 Multiscale Computational Engineering of Bones: State-of-the-Art Insights for the Future <i>Melissa L. Knothe Tate</i>	141
Index	161

Engineering of Functional Skeletal Tissues

Bronner, F.; Farach-Carson, M.C.; Mikos, A. (Eds.)

2007, XVIII, 178 p., Hardcover

ISBN: 978-1-85233-962-3
