1	Introduction	1
1.1	Renewal Processes	4
1.2	Shock Processes	11
2	Damage Models	15
2.1	Cumulative Damage Model	16
2.2	Independent Damage Model	21
2.3	Failure Rate	24
2.4	Continuous Wear Processes	26
2.5	Modified Damage Models	28
3	Basic Replacement Policies	39
3.1	Three Replacement Policies	40
3.2	Optimum Policies	42
3.3	Modified Replacement Models	47
4	Replacement of Multiunit Systems	61
4.1	Parallel System in a Random Environment	62
4.1.1	Replacement Model	62
4.1.2	Extended Replacement Models	64
4.1.3	Replacement at Shock Number	68
4.2	Two-unit System with Failure Interactions	70
4.2.1	Model 1: Induced Failure	72
4.2.2	Model 2: Shock Damage	75
4.2.3	Modified Models	77
5	Periodic Replacement Policies	81
5.1	Basic Replacement Models	82
5.2	Discrete Replacement Models	84
5.3	Deteriorated Inspection Model	86
5.3.1	Expected Cost	87

5.3.2	Optimum Policy	89
5.4	Replacement with Minimal Repair	90
5.4.1	Expected Cost	91
5.4.2	Optimum Policies	92
5.5	Modified Replacement Models	97
6	Preventive Maintenance Policies	103
6.1	Condition-based Preventive Maintenance	104
6.1.1	Expected Cost Rate	104
6.1.2	Optimum Policy	108
6.2	Modified Models	109
7	Imperfect Preventive Maintenance Policies	117
7.1	Model and Expected Cost	118
7.2	Optimum Policies	122
7.3	Optimum Policies for a Finite Interval	126
8	Garbage Collection Policies	131
8.1	Standard Garbage Collection Model	132
8.2	Periodic Garbage Collection Model	137
8.3	Modified Periodic Garbage Collection Model	143
9	Backup Policies for a Database System	147
9.1	Incremental Backup Policy	149
9.1.1	Cumulative Damage Model with Minimal Maintenance	150
9.1.2	Incremental Backup	154
9.2	Incremental and Cumulative Backup Policies	158
9.2.1	Expected Cost Rates	159
9.3	Optimum Full Backup Level for Cumulative Backup	163
10	Other Related Stochastic Models	167
10.1	Other Models	167
10.2	Stochastic Duels	170
