## PART 1. Maintenance Management Definition and Characterization

---

<b>1</b>	<b>On the Definition of Maintenance Management.....</b>	<b>3</b>
1.1	A Definition of Maintenance Management.....	3
1.2	Effectiveness and Efficiency of Maintenance Management .....	4
1.3	Maintenance Objectives, Strategy and Responsibilities .....	5
1.3.1	Setting Maintenance Objectives .....	5
1.3.2	Formulating Strategy .....	7
1.3.3	Establishing Responsibilities .....	7
1.4	Strategy Implementation at the Three Levels of Activity: Strategic, Tactical and Operational.....	9
1.5	References .....	10
<b>2</b>	<b>Maintenance Management Characterization: Process, Framework and Supporting Pillars .....</b>	<b>11</b>
2.1	A Reason for MM Characterization.....	11
2.2	The Maintenance Management Process.....	14
2.2.1	The Course of Action .....	14
2.2.2	Maintenance Planning. ....	14
2.2.3	Maintenance Scheduling.....	17
2.2.4	Managing Maintenance Actions Execution.....	18
2.2.5	Maintenance Assessment.....	18
2.2.6	Ensuring Continuous Improvement.....	20
2.2.7	Considering Equipment Re-design .....	21
2.3	Maintenance Management Framework.....	21
2.3.1	A Review on Maintenance Framework .....	22
2.3.2	Defining the Structure to Support Maintenance Management..	24
2.4	Functions of the MM Supporting Pillars.....	27
2.4.1	Functions of the IT Pillar.....	27
2.4.2	Functions of the ME Pillar.....	30
2.4.3	Functions of the Organizational Pillar .....	36
2.5	References.....	38

---

## PART 2. Basic Concepts for Complex Systems Maintenance

---

<b>3</b>	<b>The Failure Concept .....</b>	<b>43</b>
3.1	Failure Event and Related Terms .....	43
3.2	Fault State and Related Terms .....	44
3.3	The Maintenance Time .....	45
3.4	References.....	47
<b>4</b>	<b>Failure Models .....</b>	<b>49</b>
4.1	The Importance of Failure Data .....	49
4.2	Basic Functions to Model Failures .....	50
4.3	Empirical vs Theoretical Failure Distribution Functions .....	53
4.4	Weibull Distribution Function and Weibull Analysis.....	54
4.5	Weibull Analysis .....	57
4.6	References.....	67
<b>5</b>	<b>The Maintenance Concept .....</b>	<b>69</b>
5.1	Maintenance Types .....	69
5.1.1	Maintenance Type Classification .....	69
5.1.2	Preventive Maintenance .....	70
5.1.3	Corrective Maintenance.....	71
5.2	Maintenance Activities .....	71
5.3	The Indenture Level.....	72
5.4	The Maintenance Level .....	73
5.5	The Maintenance Line or Echelon .....	74
5.6	The Maintenance Policy .....	75
5.7	References.....	76
<b>6</b>	<b>Basic Maintenance Models.....</b>	<b>77</b>
6.1	Introduction to Maintenance Policy Modelling .....	77
6.2	Total Replacement Models .....	78
6.2.1	Constant Interval Replacement (CIR). .....	79
6.2.2	Age Based Replacement (ABR). .....	81
6.3	Partial Replacement Models .....	82
6.3.1	PPR with Minimal Repairs .....	83
6.3.2	PPR with Normal Repairs (NR) .....	84
6.4	Replacement Models with Imperfect Maintenance (IPM).....	85
6.5	Shock Based Replacement Models .....	87
6.6	Inspection Models.....	87
6.7	References.....	89

---

## **PART 3. Developing the Maintenance Management Framework**

---

<b>7</b>	<b>A Review of Key Decision Areas in Maintenance Management</b>	<b>93</b>
	<b>Modelling.....</b>	<b>93</b>
7.1	Introduction.....	93
7.2	A Generic Model for Maintenance Management.....	93
7.3	Definition of Maintenance Objectives and Strategy .....	95
7.4	Asset Priority and Maintenance Strategy Definition .....	95
7.5	Immediate Intervention on High Impact Weak Points.....	96
7.6	Design of the Preventive Maintenance Plans and Resources.....	97
7.7	Preventive Plan, Schedule and Resources Optimization.....	97
7.8	Maintenance Execution Assessment and Control .....	98
7.9	Asset Life Cycle Analysis and Replacement Optimization .....	98
7.10	Continuous Improvement and New Techniques Utilization .....	98
7.11	References.....	99
<b>8</b>	<b>Definition of Maintenance Objectives and Strategy .....</b>	<b>101</b>
8.1	Introduction.....	101
8.2	BSC and Maintenance .....	101
8.3	Proper Selection of Maintenance KPIs .....	103
8.4	From Key Performance Indicators to Functional Indicators .....	104
8.5	References.....	106
<b>9</b>	<b>Criticality Analysis for Asset Priority Setting .....</b>	<b>107</b>
9.1	Introduction.....	107
9.2	Criticality Analysis Using Qualitative Techniques.....	107
9.2.1	Case Study: Manufacturing Plant Criticality Flowchart .....	108
9.3	Criticality Analysis Using Risk Assessment Techniques .....	111
9.3.1	Case Study: A Petrochemical Plant .....	112
9.4	Criticality Analysis Using AHP.....	116
9.4.1	Case Study: AHP Applied to the Petrochemical Plant. ....	117
9.5	Maintenance Strategy Definition .....	124
9.6	References.....	126
<b>10</b>	<b>Root Cause Failure Analysis (RCFA) for High Impact Weak Points ..</b>	<b>127</b>
10.1	RCFA When and Why .....	127
10.2	RCFA Techniques in Literature.....	128
10.3	Failure Cause Characterization .....	129
10.4	Failure Root Cause Analysis Method and Process .....	129
10.5	Case Study .....	131
10.6	References.....	132
<b>11</b>	<b>A Method to Design the Maintenance Plan .....</b>	<b>133</b>
11.1	An Introduction to RCM History.....	133

11.2	RCM Concept .....	134
11.3	RCM Implementation .....	135
11.3.1	The Process and the Review Team .....	135
11.3.2	System Selection and Definition of the Operational Context .....	138
11.4	Failure Mode and Effect Analysis (FMEA) .....	138
11.4.1	Introduction to the Methodology .....	138
11.4.2	Describing Functions .....	139
11.4.3	Defining Functional Failures .....	140
11.4.4	Definition of the Failure Modes .....	142
11.4.5	The Description of the Failure Modes Effects .....	143
11.5	RCM and the Hidden Failure Modes .....	148
11.5.1	RCM and the Hidden Failures .....	148
11.5.2	Hidden Failures and Their Maintenance .....	149
11.5.3	Maintenance Actions to Prevent Multiple Failures Caused by Hidden Failure Modes .....	150
11.6	Selection of Maintenance Activities Within RCM .....	150
11.6.1	The Determination of the Consequences of a Failure Mode .....	150
11.6.2	Preventive Activities .....	152
11.6.3	Corrective Activities .....	154
11.7	Concluding Remarks .....	154
11.8	References .....	155
<b>12</b>	<b>Models to Deal with Maintenance Capacity Planning .....</b>	<b>157</b>
12.1	Models for Maintenance Resources Management .....	157
12.2	Maintenance Staff Planning and Scheduling .....	157
12.2.1	Queuing Theory Models for Birth-and-death Processes .....	159
12.2.2	Monte Carlo Simulation Models .....	167
12.3	Maintenance Materials Requirements Planning .....	172
12.3.1	Statistical Inventory Models .....	174
12.3.2	Selective Control Procedures along with Heuristics .....	177
12.3.3	Using the Material Requirements Planning/Manufacturing Requirements Planning (MRP/MRP II) Technique .....	178
12.4	A Model for Maintenance Contracts .....	180
12.4.1	Proposed Maintenance Contract Structure .....	180
12.5	References .....	183
<b>13</b>	<b>Models to Deal with Maintenance Activities Planning .....</b>	<b>185</b>
13.1	Markov Processes Models .....	185
13.2	Maintenance Optimization Models for Markovian Processes .....	187
13.2.1	Modelling Deterioration .....	188
13.2.2	Modelling Corrective Maintenance .....	191
13.2.3	Modelling Predetermined Maintenance .....	195
13.2.4	Modelling Predetermined Age Based Maintenance .....	198
13.2.5	Modelling Predetermined Age and Inspection Based Maintenance .....	202
13.3	Semi-Markov Process Models for Planning .....	209
13.3.1	Formulation of the SMDP Model .....	209

13.3.2 Modelling Corrective Maintenance .....	213
13.3.3 Modelling Imperfect Corrective Maintenance.....	214
13.3.4 Modelling Preventive Maintenance .....	216
13.3.5 Case Study .....	219
13.4 References.....	223
<b>14 Models to Deal with Maintenance Scheduling Issues .....</b>	<b>225</b>
14.1 Introduction to the Maintenance Scheduling Process .....	225
14.2 CPM and PERT Methods .....	227
14.2.1 History of Network Analysis.....	227
14.2.2 The Critical Path Method (CPM) .....	228
14.2.3 The Programme Evaluation Review Technique (PERT).....	230
14.2.4 A Maintenance Project Case Study with CPM/PERT .....	233
14.3 Maintenance Scheduling and Cost Analysis Methods .....	238
14.3.1 Problem Discussion and Case Study .....	238
14.3.2 Speeding up the Project at the Minimum Cost Increase .....	239
14.4 Using Monte Carlo Simulation Modelling for the PM Scheduling Problem .....	244
14.4.1 Introduction .....	244
14.4.2 Case Study: Scheduling Maintenance of a Capacity Constrained Production System .....	245
14.4.3 Modelling the Production System .....	246
14.4.4 Optimization of the PM Scheduling Policy .....	253
14.4.5 Simulation and Optimization Results .....	257
14.4.6 Summary of Findings .....	261
14.5 References.....	261
<b>15 Overall Maintenance Management Assessment.....</b>	<b>263</b>
15.1 Introduction.....	263
15.2 Time Variables Characterization .....	263
15.3 Definition of Common Time-related Measures .....	266
15.4 Measuring Item Operational Dependability.....	267
15.4.1 Operational Availability .....	267
15.4.2 Operational Reliability .....	267
15.4.3 Operational Maintainability.....	267
15.5 Maintenance Management Effectiveness Assessment.....	268
15.6 Maintenance Management Efficiency Assessment.....	270
15.7 References.....	271
<b>16 Failures Impact on Life Cycle Cost Analysis.....</b>	<b>273</b>
16.1 Introduction.....	273
16.2 Basic Elements of the LCCA .....	275
16.3 Cost Characterization in Different Phases of the Equipment Life Cycle.....	276
16.4 Reliability Impact on Life Cycle Cost .....	278
16.5 Models to Assess Reliability Impact on LCCA .....	279
16.5.1 Constant Failure Rate Model.....	279

16.5.2	Deterministic Failure Rate Model .....	281
16.5.3	Weibull Distribution Failure Rate Model .....	282
16.5.4	Summary of Key Aspects and Limitations per Model.....	285
16.6	Case Study .....	286
16.6.1	Case Study — Constant Failure Rate Model .....	286
16.6.2	Case Study — Deterministic Failure Rate Model.....	287
16.6.3	Case Study —Weibull Distribution Failure Rate Model .....	288
16.6.4	Case Study —Discussion of Results.....	289
16.7	Concluding Remarks.....	289
16.8	References.....	291
<b>17</b>	<b>Maintenance Continuous Improvement Through Organizational Efficiency.....</b>	<b>293</b>
17.1	Introduction.....	293
17.2	Creating People Ownership of the Manufacturing Process .....	294
17.3	Introducing Autonomous Maintenance (AM).....	295
17.3.1	Defining the Process.....	295
17.3.2	Defining the New Functions.....	297
17.4	Pursuing Overall Organizational Effectiveness.....	298
17.5	Maintenance Planning and Maintenance Quality .....	300
17.6	Early Equipment Management for Maintenance Prevention .....	302
17.7	Improving Maintenance Through Education and Training.....	302
17.8	References.....	303
<b>18</b>	<b>The E-maintenance Revolution .....</b>	<b>305</b>
18.1	Introduction.....	305
18.2	Factors for the Emergence of E-maintenance .....	306
18.3	The E-maintenance Capabilities .....	308
18.3.1	E-maintenance, the New Areas of Advantage .....	308
18.3.2	Potential Improvements of Maintenance Type and Strategies Provided by E-maintenance .....	308
18.3.3	Potential Improvements of Maintenance Support and Tools Provided by E-maintenance .....	310
18.3.4	Potential Improvements of Maintenance Activities Provided by E-maintenance.....	312
18.4	Challenges for E-maintenance .....	312
18.4.1	E-maintenance Requirements .....	312
18.4.2	Needs for E-maintenance Related to Maintenance Type and Strategies.....	313
18.4.3	Needs for E-maintenance Related to Maintenance Support and Tools.....	314
18.4.4	Needs for E-maintenance Related to Maintenance Activities .....	315
18.5	State of the art in E-maintenance .....	315
18.5.1	Introduction .....	315
18.5.2	Standards Development in E-Maintenance.....	315
18.5.3	E-Maintenance Processes Formalization.....	321

18.6 Concluding Remarks.....	322
18.7 E-maintenance New Terminology .....	323
18.8 References.....	324
