1 Customer Value: A Key Financial Metric	1
1.1 Financial Metrics: Bottom-line and Fundamental	1
1.2 Quantifying Value	3
1.3 The Impact of Customer Value	4
1.3.1 Fly Me to the Moon	4
1.3.2 Shifting the Demand Curve by Improving Value	6
1.3.3 Does Profit Maximization Gouge the Customer	7
1.3.4 The Innovative Power of a New Technology	9
1.4 Market dilution	9
1.4.1 Loss of Pricing Power	9
1.4.2 US Automotive Market	10
1.5 Check of Demand Model	11
1.6 Research and Development Planning	14
1.7 Summary	14
1.8 Supporting Case Studies	15
1.9 Exercises	15
1.10 References	16
2 Assessing Value using Surveys	17
2.1 Background	17
2.2 Value and Value Functions	18
2.3 Causal Research of Value	20
2.4 Survey Project Design and Execution	21
2.4.1 Stage 1: Determine Objectives	22
2.4.2 Stage 2: Respondent Selection	22
2.4.3 Stage 3: Methodology for Administering Survey	25
2.4.4 Stage 4: Questionnaire Design	26
2.4.5 Stage 5: Pretest Survey	27
2.4.6 Stage 6: Collect Data	27
2.4.7 Stage 7: Data Preparation and Analysis	28
2.5 Summary	28

2.6 Supporting Case Studies	29
2.7 Exercises	29
2.8 References	30
3 Analyzing Stated Choice Surveys	33
3.1 Background: Prospect Theory.....	33
3.2 The Direct Value Stated Choice Survey	34
3.2.1 Graphical Analysis of a DV Survey	35
3.2.2 Level 2 OLS Regression Analysis of a DV Survey	36
3.2.3 Computing Standard Deviation and df of Value in a DV Survey	42
3.2.4 LOF Estimate of the Standard Deviation of Value.....	45
3.3 The Multinomial Stated Choice Survey.....	45
3.4 Maximum Log Likelihood Estimate	49
3.5 Summary	52
3.6 Supporting Case Studies	52
3.7 Exercises	53
3.8 References	58
4 Product Planning and Systems Engineering	59
4.1 Nature of a System.....	59
4.2 Transitioning to Total Virtual Design and Development.....	61
4.3 Analyzing the As-Is/To-Be Transition using an Automotive Example	65
4.3.1 As-Is	65
4.3.2 To-Be.....	66
4.3.3 Learning.....	75
4.3.4 Robustness to All Types of Variation.....	77
4.3.5 Sourcing New Technology	78
4.4 Summary	81
4.5 Supporting Case Studies	81
4.6 Exercises	81
4.7 References	83
Case Study 1 Value Speculation in a Stock's Price.....	85
CS1.1 Buyers and Sellers.....	85
CS1.2 Demand for a Speculative Stock	86
CS1.3 Gold Mining Stock Example.....	87
CS1.4 Summary.....	87
CS1.5 References.....	90
Case Study 2 Simulated Survey of Boston to Los Angeles Flights	91
CS2.1 Experimental Design.....	91
CS2.2 OLS Solution with Satterthwaite's df and Approximate t -Test	93
CS2.3 Solution using Maximum Log Likelihood Estimate	94
CS2.4 Summary	95
CS2.5 References.....	96

Case Study 3 Analysis of a Multinomial Stated Choice Survey	97
CS3.1 A Simulated Multinomial Survey	97
CS3.2 Simulation Process.....	98
CS3.3 The Level 2 OLS Coefficients	100
CS3.4 Summary	100
Case Study 4 The Market for Hybrid and Diesel Mid-sized Sedans	103
CS4.1 Prior Studies.....	103
CS4.2 This Study	105
CS4.2.1 Comparing Individual NPV Forecasts with Survey Results	105
CS4.2.2 Reference Price for Options.....	105
CS4.2.3 Forecasts of Long Term Share of Three Competing Powerplants	107
CS4.3 Summary	109
CS4.4 References.....	109
Case Study 5 Revealed Values: Minivan Trends	111
CS5.1 Consumers Reveal Preferences when They Buy.....	111
CS5.2 Minivan Revealed Value Trends 1998 through 2002 Model Years	111
CS5.2.1 Ford Windstar	111
CS5.2.2 Honda Odyssey.....	112
CS5.3 Learning by Comparing Forecast Value Improvements with Actual Improvements.....	113
CS5.4 Summary	113
CS5.5 References.....	114
Case Study 6 Effect of Market Dilution when Value Differs between Competitors	115
CS6.1 Competing Products Differ in Value.....	115
CS6.2 Price Trends	116
CS6.3 Attackers' Advantage.....	116
CS6.4 Summary	118
Case Study 7 Value of Interior Noise in a Luxury Automobile	119
CS7.1 DV Survey	119
CS7.2 Level 2 OLS Coefficients	120
CS7.3 Exponentially Weighted Parabolic Model	122
CS7.4 Prospect Theory Model.....	124
CS7.5 Comparing the Two Models	124
CS7.6 Summary	125
CS7.7 References.....	125
Case Study 8 Quantifying the Trade-off between Acceleration Performance and Fuel Economy	127
CS8.1 A Key Auto Trade-off.....	127

CS8.2 Experimental Design.....	128
CS8.3 Values of Attributes Relative to Vehicle at 22 mpg.....	129
CS8.4 Exponential Weighting Coefficient for Acceleration Performance	130
CS8.5 Time Horizon and Discount Rate for Fuel Economy.....	131
CS8.6 References.....	132
Case Study 9 Value of Mustang Options	133
CS9.1 Survey of Mustang Owners.....	133
CS9.2 Automatic Transmission Option	134
CS9.3 Anti-lock Brake Option.....	135
CS9.4 Option Price Elasticities.....	135
CS9.5 Summary.....	136
CS9.6 References.....	139
Case Study 10 Simulated Survey of Choice between Auto and Transit Bus Modes	141
CS10.1 Maximum Log Likelihood Solution.....	141
CS10.2 LOF Workaround Solution	144
CS10.3 Summary	147
CS10.4 References.....	147
Case Study 11 Assessing Relative Brand Value	149
CS11.1 Survey Method.....	149
CS11.2 Outcomes	149
CS11.3 Summary	150
CS11.4 References.....	152
Case Study 12 Value and Cost Benchmarking a Yogurt Market.....	153
CS12.1 Value and Cost Benchmarking.....	153
CS12.2 Cost Estimation.....	154
CS12.3 Yogurt Case Study	155
CS12.4 Summary	157
CS12.5 References.....	157
Appendix A Models of Demand Price, and Choice Probability	159
A.1 The Linear Demand Model.....	159
A.2 The Logit Model	163
A.3 Connection to the Probit (Normal) Model	165
A.4 References	166
Appendix B Modeling Value using Automotive Examples	167
B.1 Nature of Attributes.....	167
B.2 Empirical Model for Value Curves	168
B.3 Estimating Value Curves.....	169
B.4 Multiattribute Value.....	169
B.5 Values of Selective Automotive Attributes.....	170

B.5.1 Fuel Economy	171
B5.2 Front Leg Room.....	171
B.5.3 Interior Noise	173
B.5.4 Reliability.....	173
B5.5 Range	173
B5.6 Acceleration Performance.....	174
B.5.7 Shoulder Room	174
B5.8 Head Room	175
B.5.9 Seating Capacity	177
B5.10 Luggage Space.....	177
B5.11 Turning Radius.....	177
B.6 References	178
Appendix C Templates	179
C.1 Overview	179
C.2 Templates for the Direct Value Stated Choice Survey.....	179
C.3 Templates for Multinomial Stated Choice Surveys.....	180
C.4 DV 3 Binary Template Example.....	181
C.4.1 Level 2 OLS Outcomes.....	182
C.4.2 LOF Outcomes.....	183
C.4.3 MLLE Outcomes	185
C.4.4 Outcomes Summary and Logit Plot.....	185
C.5 Additional Templates	186
C.5.1 Value Trend and Cournot Cost Templates.....	186
C.5.2 Value of Automotive CTV Template.....	188
Appendix D Stated Choice Analysis of a Classical Conjoint Survey	189
D.1 Classical Conjoint Survey	189
D.2 Theory versus Experiment	192
D.3 References	195
Appendix E Analysis of a Presence/Absence Stated Choice Survey	197
E.1 Simulated Survey	197
E.2 Analysis of Outcomes	199
E.3 References	203
Appendix F Using Orthogonal Arrays to Construct	
Stated Choice Survey and other Experimental Designs.....	205
F.1 Taguchi and Konishi Notation.....	205
F.2 Analysis of Simulated Multinomial Design.....	207
F.3 References	208
Index	209

Value Driven Product Planning and Systems
Engineering

Cook, H.E.; Wissmann, L.A.

2007, XVIII, 213 p. 60 illus. With online files/update.,

Hardcover

ISBN: 978-1-84628-964-4
