

---

# Table of Contents

<b>Setting the Scene</b> .....	1
<i>J.L. Vincent</i>	
 <b>The Inflammatory Response</b>	
<b>Genetics and Severe Sepsis</b> .....	17
<i>J. Texereau, V. Lemiale, J.-P. Mira</i>	
<b>Cell Signaling Pathways of the Innate Immune System During Acute Inflammation</b> .....	35
<i>S.M. Opal, P.A. Cristofaro</i>	
<b>Early-Onset Pro-inflammatory Cytokines</b> .....	55
<i>C. Kaech, T. Calandra</i>	
<b>The Significance of HMGB1, a Late-Acting Pro-inflammatory Cytokine</b> ....	67
<i>E. Abraham</i>	
<b>Nitric Oxide</b> .....	77
<i>J. Carré, M. Singer, S. Moncada</i>	
<b>Involvement of Reactive Oxygen and Nitrogen Species in the Pathogenesis of Acute Lung Injury</b> .....	97
<i>S. Matalon, I.C. Davis, J.D. Lang Jr</i>	
<b>Heat Shock Proteins in Inflammation</b> .....	113
<i>Z. Bromberg, Y.G. Weiss, C.S. Deutschman</i>	
<b>Fibrosis in the Acute Respiratory Distress Syndrome</b> .....	123
<i>D.C.J. Howell, R.C. Chambers, G.J. Laurent</i>	
<b>Resolution of Inflammation</b> .....	137
<i>G. Bellingan</i>	

**The Cellular Immune Response**

<b>Compartmentalized Activation of Immune Cells During Sepsis and Organ Dysfunction</b> .....	161
<i>J.-M. Cavaillon, M. Adib-Conquy</i>	

<b>The Neutrophil in the Pathogenesis of Multiple Organ Dysfunction Syndrome</b> .....	183
<i>Z. Malam, J.C. Marshall</i>	

<b>The Role of the Macrophage</b> .....	203
<i>J. Pugin</i>	

<b>The Role of the Endothelium</b> .....	211
<i>W.C. Aird</i>	

<b>Differential Effects of Pro-Inflammatory Mediators on Alveolar Epithelial Barrier Function</b> .....	229
<i>M.A. Matthay, J.-W. Lee</i>	

**Mechanisms and Pathways of Dysfunction**

<b>Macrocirculatory Disturbances</b> .....	239
<i>D. De Backer</i>	

<b>The Microcirculation Is a Vulnerable Organ in Sepsis</b> .....	249
<i>P.W.G. Elbers, C. Ince</i>	

<b>The Cholinergic Anti-inflammatory Pathway: Connecting the Mind and Body</b> .....	263
<i>C.J. Czura, S.G. Friedman, K.J. Tracey</i>	

<b>Coagulation in Sepsis</b> .....	273
<i>W.J. Wiersinga, M. Levi, T. van der Poll</i>	

<b>The Role of Insulin and Blood Glucose Control</b> .....	287
<i>L. Langouche, I. Vanhorebeek, G. Van den Berghe</i>	

<b>Dysfunction of the Bioenergetic Pathway</b> .....	299
<i>M. Singer</i>	

<b>Metabolic Pathways</b> .....	311
<i>O. Rooyackers, J. Wernerman</i>	

<b>Cell Death and Acute Lung Injury</b> .....	321
<i>T.R. Martin, N. Hagimoto, G. Matute-Bello</i>	
<b>Mechanisms of Immunodepression after Central Nervous System Injury</b> ...	335
<i>C. Meisel, H.-D. Volk</i>	
 <b>Organ-specific Mechanisms of Dysfunction</b>	
<b>Pulmonary Dysfunction</b> .....	353
<i>N.S. MacCallum, G.J. Quinlan, T.W. Evans</i>	
<b>The Gut</b> .....	369
<i>M.P. Fink</i>	
<b>Endogenous Danger Signals in Liver Injury:</b>	
<b>Role of High Mobility Group Box Protein-1</b> .....	383
<i>A. Tsung, G. Jeyabalan, T.R. Billiar</i>	
<b>Sepsis-induced Acute Renal Failure and Recovery</b> .....	393
<i>M. Raghavan, R. Venkataraman, J.A. Kellum</i>	
<b>Sepsis-Induced Brain Dysfunction</b> .....	407
<i>C. Guidoux, T. Sharshar, D. Annane</i>	
<b>Myocardial Depression in Sepsis and Septic Shock</b> .....	415
<i>A. Kumar, J.E. Parrillo</i>	
<b>Skeletal Muscle</b> .....	437
<i>R.D. Griffiths, T. Bongers, A. McArdle</i>	
<b>Subject Index</b> .....	449

Mechanisms of Sepsis-Induced Organ Dysfunction and  
Recovery

Abraham, E.; Singer, M. (Eds.)

2007, XV, 453 p., Hardcover

ISBN: 978-3-540-30157-8
