1 A Paediatric Overview of Children Seen in the ENT Outpatient Department	1	3 Anaesthesia for Paediatric ENT Surgery	11
<i>Helen Bantock</i>		<i>Ian Barker</i>	
Introduction: Paediatric Consultation	1	Introduction	11
Development in the First Five Years of Life	2	General Considerations	12
Children with Special Needs	2	Anaesthesia for Children	12
Speech and Language Delay or Disorder	2	Anaesthesia for the Newborn	12
Autistic Spectrum	2	Hypoxia	12
Global Delay	3	Hypothermia	12
Specific Learning Difficulties	3	Hypoglycaemia	12
Syndromes	3	Intravenous Fluid Therapy for Children	12
Down Syndrome	3	Specific Conditions	13
Behaviour Difficulties	3	Post-Tonsillectomy Bleeding	13
Attention Deficit Hyperactivity Disorder	3	Assessment	13
Social Difficulties	3	Resuscitation	13
Types of Abuse	3	Anaesthesia	13
Child Abuse in the Context of an ENT Clinic	4	Airway Endoscopy	13
Alerting Signs of Non-Accidental Injury and Abuse in a Clinic Setting	4	Indications	13
What to do if Abuse is Suspected	4	Induction	14
Links with Local Services	4	Maintenance	14
Primary Care Team	4	Laser Surgery	14
The Child Development Team	4	Obstructive Sleep Apnoea	15
The Education Service	4	Anaesthetic Equipment	15
Child and Adolescent Mental Health Services	5	Endotracheal Tubes	15
Social Services	5	Laryngeal Mask Airway	16
Non-Statutory Organisations	5	Pulse Oximeter	16
		Limitations	16
		Carbon Dioxide Monitor	16
2 Nursing Aspects of Paediatric ENT	7	4 The Evolution of Speech and Language	19
<i>Rosalind Wilson and Judith Barton</i>		<i>John F. Stein</i>	
Introduction	7	Introduction	19
Communication	7	Is Language Innate or Learnt?	20
Consent for Surgery	8	Human Evolution	20
Staffing	8	Left-Sided Specialisation	20
The Physical Environment	8	Emotional Vocalisations	21
Tracheostomy	8	Mirror Neurones	21
Parents	9	Bipedalism and the Aquatic Ape Hypothesis	22
Day Surgery	9	Larynx Descent	22
Pain Control	10		

Brain Enlargement	23	7 Genetics of Non-Syndromic Deafness	47
Right-Handedness	23	<i>Maria Bitner-Glindzicz</i>	
Selective Advantages of Speech	23	Introduction	47
Gesture and Speech	24	Investigation of the Aetiology	
Writing	24	of Hearing Loss	48
Conclusion	24	Reasons	48
5 Evidence-Based Management		Protocol	48
of Speech and Language Delays	27	History	48
<i>Amy McConkey Robbins</i>		Examination	48
Introduction	27	Investigation	48
Milestones for Communication		Genetic Hearing Loss	49
Development	28	Recessive Genes: Common/	
Normal Variation in Language		Recognizable Types of	
Learning	28	Non-Syndromic Genetic Hearing Loss	50
Normal Variation versus		<i>GJB2 (Connexin26)</i>	50
Communication Delay	28	<i>SLC26A4 (Pendred and Non-</i>	
Communication Milestones		<i>Syndromic Enlarged Vestibular</i>	
in the First Year of Life	29	<i>Aqueduct)</i>	52
Clinical Use of Table 5.1 by Physicians	31	<i>OTOF (Auditory Neuropathy)</i>	53
Speech and Language Intervention		Dominant Genes: Common/	
is Correlated with Young Age		Recognizable Types of Non-	
at Identification	32	Syndromic Genetic Hearing Loss	53
Hearing Loss can be Identified		<i>WFS1 (Dominant Low-Frequency</i>	
and Treated as Early as the Newborn		<i>Sensorineural Hearing Loss)</i>	53
Period	32	<i>COCH (Menière-Like Symptoms)</i> ...	54
Differential Diagnosis of Several		8 ENT-Related Syndromes	57
Communication Disorders	33	<i>David Albert and Fiona Connell</i>	
Association Between Some Speech/		Definition	58
Language Characteristics and Reading		Introduction	58
Disability	34	Resources	59
Evidence-Based Approach		Syndromes of Particular Relevance	
to the Management of Children's Speech		to the ENT Clinician	59
and Language Development	34	Down Syndrome	59
6 Paediatric Voice	37	<i>Genetics</i>	59
<i>Mark E. Boseley</i>		<i>ENT Features</i>	59
<i>and Christopher J. Hartnick</i>		<i>General Features</i>	59
Introduction	37	Pierre Robin Sequence	59

9 EXIT – Antenatal (Pre-natal) Diagnoses and Management

Gavin Morrison

Introduction	73
Pre-natal Diagnosis	74
Diagnostic Ultrasound Features	74
Congenital High Airway Obstruction Syndrome	75
Foetal MRI Scanning	75
The EXIT Procedure	76
Indications for the EXIT Procedure ...	76
Techniques of the EXIT Procedure	76
Tips and Pitfalls of EXIT	77
Spontaneous Onset of Labour	77
Cystic Hygroma	78
Maintaining Placento-Foetal Circulation	78
Loss of Placento-Foetal Circulation ..	78
Risks to Mother	78
Outcomes of EXIT	78
Counselling and Ethical Issues	78

<i>Gastrointestinal and Other Disease</i>	
<i>Manifestations</i>	97
Prevalence	97
Diagnostic Tests	97
<i>Clinical Suspicion</i>	97
<i>The Sweat Test</i>	98
<i>Genetic Testing</i>	98
<i>Ancillary Testing</i>	98

12 Head and Neck Masses	111
<i>Ben Hartley</i>	
Introduction	112
Part 1. Clinical Assessment	
of Neck Swelling in Children	112
History	112
Examination of the Neck	112
<i>Site of the Swelling</i>	112
<i>Nature of the Swelling</i>	113

Head and Neck Examination	113
General Examination	113
Investigation	113
Laboratory Tests	113
Radiology	113
Biopsy Sampling versus Fine-Needle Aspiration for Cytology	114
Part 2. Inflammatory Disorders of the Neck and Lymphadenopathy	114
Viral Infections	114
Viral Upper Respiratory Tract Infections	114
Infectious Mononucleosis	115
Human Immunodeficiency Virus ...	115
Bacterial Infections	115
Acute Lymphadenopathy with Suppuration	115
Mycobacterial Neck Infections	115
Non-Infectious Inflammatory Lymphadenopathy	116
Kawasaki Syndrome	116
Sinus Histiocytosis (Rosai Dorfman Disease)	116
Kikuchi-Fujimoto Disease	116
Part 3. Haemangiomas and Vascular Malformations	116
Terminology	116
Haemangiomas	117
Vascular Malformations	117
Capillary Malformations	117
Venous Malformations	118
Arteriovenous Malformations	119
Part 4. Head and Neck Malignancy in Children	119
Hodgkin's Disease	119
Non-Hodgkin Lymphoma	119
Rhabdomyosarcoma	120
Non-Rhabdomyosarcoma Sarcomas	120
Thyroid Carcinoma in Children	120
Salivary Gland Malignancy	120
Neuroblastoma	120
Nasopharyngeal Carcinoma	120
Teratoma	121
Juvenile Nasopharyngeal Angiofibroma	121
13 Paediatric ENT in Developing Countries	123
Neville P. Shine and Christopher A. J. Prescott	
Introduction	123
Ear Disease	124
Chronic Suppurative Otitis Media ...	125

<i>Management</i>	175
20 Airway Endoscopy and Assessment in Children	177
<i>Sonia Ayari-Khalfallah and Patrick Froehlich</i>	
Introduction	177
Rigid Endoscopy	178
Supplementary Examinations	181
21 Emergency Management of the Paediatric Airway	183
<i>Michael Kuo and Michael Rothera</i>	
Anatomical and Physiological Considerations	183
Clinical and Radiological Assessment of the Acutely Compromised Upper Airway	183
Resuscitation and Pre-Operating-Room Management	186
Endoscopy Under General Anaesthesia	186
Surgical Management of the Acutely Obstructed Paediatric Airway	187

22 Congenital Disorders of the Larynx, Trachea and Bronchi	189
<i>Martin Bailey</i>	
Introduction	189
Larynx	189
Supraglottis	190
Laryngomalacia	190
Saccular Cysts and Laryngocoeles ...	190
Lymphangioma	191
Bifid Epiglottis	191
Glottis	191
Laryngeal Webs	191
Laryngeal Atresia	191
Cri-du-Chat Syndrome	191
Vocal Cord Paralysis	191
Subglottis	192
Congenital Subglottic Stenosis	192
Subglottic Haemangioma	193
Laryngeal and Laryngotracheo- Oesophageal Cleft	193
Trachea and Bronchi	194
Agenesis	194
Stenosis	194
Tracheomalacia and Bronchomalacia	194
Tracheo-Oesophageal Fistula	194
Vascular Compression	194
<i>Vascular Ring</i>	195
<i>Vascular Sling</i>	195
Anomalous Bifurcations	195
Congenital Cysts and Tumours	195
23 Acquired Disorders of the Larynx in Children	197
<i>Neville P. Shine and Christopher Prescott</i>	
Infections	197
Laryngitis	197
Laryngotracheobronchitis (Croup) ..	198
Bacterial Laryngitis/Tracheitis	199
Supraglottitis (Epiglottitis)	200
Unusual Laryngeal Infections	200
<i>Herpetetic Laryngitis</i>	200
