## PART I

### Physal Fractures: General Considerations

#### Chapter 1 Historical Review

Prior to the Twentieth Century . . . . .	3
The Twentieth Century . . . . .	5
References . . . . .	6

#### Chapter 2 Anatomy and Growth

History . . . . .	7
Anatomy . . . . .	7
Growth . . . . .	12
References . . . . .	17

#### Chapter 3 Classification

Introduction . . . . .	22
Bergenfelt 1933 . . . . .	22
Aitken 1936 . . . . .	22
Brashear 1958 . . . . .	22
Salter and Harris 1963 . . . . .	25
Rang 1969 . . . . .	27
Ogden 1981 . . . . .	27
Shapiro 1982 . . . . .	27
Peterson 1994 . . . . .	28
Anatomy . . . . .	28
Epidemiology . . . . .	28
Fracture Type, Age, and Site . . . . .	28
Prognosis . . . . .	28
Complications . . . . .	28

<i>A Type 1 Fracture</i> . . . . .	30
Anatomy . . . . .	30
Classification . . . . .	32
Epidemiology . . . . .	33
Evaluation . . . . .	35
Management . . . . .	44
Complications . . . . .	44
<i>B Type 2 Fracture</i> . . . . .	49
Anatomy . . . . .	49
Classification . . . . .	49
Epidemiology . . . . .	50
Evaluation . . . . .	51
Management . . . . .	51
Complications . . . . .	56
<i>C Type 3 Fracture</i> . . . . .	58
Anatomy . . . . .	58
Classification . . . . .	58
Epidemiology . . . . .	58
Evaluation . . . . .	58
Management . . . . .	59
Complications . . . . .	64
<i>D Type 4 Fracture</i> . . . . .	66
Anatomy . . . . .	66
Classification . . . . .	66
Epidemiology . . . . .	67
Evaluation . . . . .	68
Management . . . . .	71
Complications . . . . .	71
<i>E Type 5 Fracture</i> . . . . .	72
Anatomy . . . . .	72
Classification . . . . .	72
Epidemiology . . . . .	73
Evaluation . . . . .	73
Management . . . . .	73
Complications . . . . .	74

<i>F Type 6 Fracture</i> . . . . .	77
Anatomy . . . . .	77
Classification . . . . .	77
Epidemiology . . . . .	77
Evaluation . . . . .	84
Management . . . . .	84
Complications . . . . .	85
Author's Perspective . . . . .	90
References . . . . .	90

## Chapter 4 Epidemiology

Introduction . . . . .	93
Literature Review . . . . .	93
The Olmsted County Study . . . . .	99
Comparison of Data from the Literature and the Olmsted County Study . . . . .	113
Conclusions . . . . .	113
Author's Perspective . . . . .	114
References . . . . .	114

## Chapter 5 Evaluation

History . . . . .	117
Physical Examination . . . . .	117
Imaging . . . . .	117
Author's Perspective . . . . .	128
References . . . . .	128

## Chapter 6 Management

Goals of Treatment . . . . .	131
Type of Fracture . . . . .	133
Management Choices . . . . .	134
Additional Concepts . . . . .	136
Author's Perspective . . . . .	138
References . . . . .	138

## Chapter 7 Prognosis

Severity of Injury . . . . .	141
Age . . . . .	141
Site . . . . .	141
Type . . . . .	142

Treatment . . . . .	142
Gender . . . . .	143
Remodeling . . . . .	143
Classification . . . . .	143
Author's Perspective . . . . .	143
References . . . . .	143

## Chapter 8 Complications

Epidemiology of Complications . . . . .	145
List of Complications . . . . .	150
<i>I. Complications Occurring At or Near the Time of Fracture</i> . . . . .	150
A. Vascular Occlusion . . . . .	150
B. Compartment Syndrome . . . . .	154
C. Irreducible Fracture . . . . .	158
D. Nerve Impairment . . . . .	162
E. Infection . . . . .	162
<i>II. Complications Manifesting at a Later Date</i> . . . . .	169
F. Complete Physeal Arrest . . . . .	169
G. Nonunion . . . . .	170
H. Malunion . . . . .	176
I. Ischemic Necrosis . . . . .	180
J. Overgrowth . . . . .	183
K. Synostosis . . . . .	184
L. Heterotopic Ossification . . . . .	187
M. Refracture . . . . .	191
N. Loss of Motion . . . . .	194
O. Pathologic Fracture . . . . .	194
Author's Perspective . . . . .	196
References . . . . .	196

## PART II

### Physeal Fractures: Anatomic Sites

## Chapter 9 Phalanges of the Hand

Anatomy and Growth . . . . .	201
Classification . . . . .	203
Epidemiology . . . . .	203
Evaluation . . . . .	208
Management . . . . .	215
Complications . . . . .	222
Author's Perspective . . . . .	225
References . . . . .	225

## Chapter 10

### Distal Radius

Anatomy and Growth . . . . .	227
Classification . . . . .	229
Epidemiology . . . . .	232
Evaluation . . . . .	235
Management . . . . .	237
Complications . . . . .	258
Author's Perspective. . . . .	263
<i>A. Stress Injury: Gymnast's Wrist . . . . .</i>	263
Anatomy . . . . .	263
Classification . . . . .	266
Epidemiology . . . . .	266
Evaluation . . . . .	268
Management . . . . .	268
Complications . . . . .	269
Author's Perspective. . . . .	269
References . . . . .	269

## Chapter 11

### Distal Tibia

Anatomy and Growth . . . . .	274
Classification . . . . .	276
Epidemiology . . . . .	276
Evaluation . . . . .	279
Management . . . . .	295
Complications . . . . .	303
Author's Perspective. . . . .	307
<i>A. Medial Malleolus. . . . .</i>	311
Anatomy . . . . .	311
Classification . . . . .	311
Epidemiology . . . . .	311
Evaluation . . . . .	312
Management . . . . .	319
Complications . . . . .	324
Author's Perspective. . . . .	333
<i>B. Lateral Plafond. . . . .</i>	338
Anatomy . . . . .	338
Classification . . . . .	339
Epidemiology . . . . .	339
Evaluation . . . . .	340
Management . . . . .	343
Complications . . . . .	349
Author's Perspective. . . . .	349

<i>C. Triplane Fractures . . . . .</i>	353
History . . . . .	353
Anatomy . . . . .	355
Classification . . . . .	357
Epidemiology . . . . .	362
Evaluation . . . . .	362
Management . . . . .	371
Complications . . . . .	380
Author's Perspective. . . . .	383
References . . . . .	384

## Chapter 12

### Distal Fibula

Anatomy and Growth . . . . .	389
Classification . . . . .	390
Epidemiology . . . . .	390
Evaluation . . . . .	392
Management . . . . .	396
Complications . . . . .	396
Author's Perspective. . . . .	397
References . . . . .	397

## Chapter 13

### Metacarpal

Anatomy and Growth . . . . .	399
Classification . . . . .	401
Epidemiology . . . . .	401
Evaluation . . . . .	402
Management . . . . .	405
Complications . . . . .	405
Author's Perspective. . . . .	407
References . . . . .	410

## Chapter 14

### Phalanges of the Foot

Anatomy and Growth . . . . .	411
Classification . . . . .	414
Epidemiology . . . . .	414
Evaluation . . . . .	415
Management . . . . .	415
Complications . . . . .	415
References . . . . .	418

## Chapter 15

### Distal Humerus

Anatomy and Growth . . . . .	422
Classification . . . . .	425
Epidemiology . . . . .	426
Evaluation . . . . .	428
Fracture Types by Age . . . . .	434
Management . . . . .	437
<i>A. Lateral Condyle . . . . .</i>	440
Anatomy and Growth . . . . .	440
Classification . . . . .	440
Epidemiology . . . . .	443
Evaluation . . . . .	443
Management . . . . .	448
Complications . . . . .	456
Author's Perspective. . . . .	479
<i>B. Intercondylar . . . . .</i>	479
Anatomy . . . . .	479
Classification . . . . .	486
Epidemiology . . . . .	486
Evaluation . . . . .	487
Management . . . . .	487
Complications . . . . .	493
<i>C. Medial Condyle . . . . .</i>	493
Anatomy and Growth . . . . .	493
Classification . . . . .	494
Epidemiology . . . . .	494
Evaluation . . . . .	494
Management . . . . .	503
Complications . . . . .	507
Author's Perspective. . . . .	509
<i>D. Separation of the Distal Humeral Epiphysis . . . . .</i>	509
Anatomy . . . . .	509
Classification . . . . .	511
Epidemiology . . . . .	511
Evaluation . . . . .	512
Management . . . . .	512
Complications . . . . .	513
<i>E. Fishtail Deformity . . . . .</i>	513
Anatomy and Growth . . . . .	513
Epidemiology . . . . .	514
Evaluation . . . . .	517
Management . . . . .	517
Complications . . . . .	517
References . . . . .	518

## Chapter 16

### Distal Ulna

Anatomy and Growth . . . . .	525
Classification . . . . .	527
Epidemiology . . . . .	527
Evaluation . . . . .	527
Management . . . . .	531
Complications . . . . .	534
Author's Perspective. . . . .	542
References . . . . .	546

## Chapter 17

### Proximal Humerus

Anatomy and Growth . . . . .	549
Classification . . . . .	553
Epidemiology . . . . .	553
Evaluation . . . . .	553
Management . . . . .	559
Complications . . . . .	575
Author's Perspective . . . . .	578
<i>A. Birth Fractures . . . . .</i>	581
Anatomy . . . . .	581
Classification . . . . .	581
Epidemiology . . . . .	581
Evaluation . . . . .	581
Management . . . . .	582
Complications . . . . .	582
Author's Perspective . . . . .	584
<i>B. Humerus Varus . . . . .</i>	584
Anatomy and Growth . . . . .	584
Epidemiology . . . . .	585
Evaluation . . . . .	586
Management . . . . .	586
Complications . . . . .	589
Author's Perspective . . . . .	589
<i>C. Stress Injury (Little Leaguer's Shoulder) . . . . .</i>	589
Anatomy . . . . .	589
Epidemiology . . . . .	590
Evaluation . . . . .	590
Management . . . . .	590
Complications . . . . .	591
Author's Perspective . . . . .	591
References . . . . .	591

## Chapter 18 Distal Femur

Anatomy and Growth . . . . .	595
Classification . . . . .	598
Epidemiology . . . . .	598
Evaluation . . . . .	603
Management . . . . .	608
Complications . . . . .	627
Author's Perspective . . . . .	634
<i>A. Birth Fractures . . . . .</i>	<i>634</i>
Anatomy . . . . .	634
Classification . . . . .	634
Epidemiology . . . . .	634
Evaluation . . . . .	635
Management . . . . .	639
Complications . . . . .	640
Author's Perspective . . . . .	640
References . . . . .	640

## Chapter 19 Metatarsals

Anatomy and Growth . . . . .	643
Classification . . . . .	644
Epidemiology . . . . .	647
Evaluation . . . . .	647
Management . . . . .	647
Complications . . . . .	647
References . . . . .	650

## Chapter 20 Proximal Tibia

Anatomy and Growth . . . . .	651
Classification . . . . .	655
Epidemiology . . . . .	659
Evaluation . . . . .	659
Management . . . . .	661
Complications . . . . .	681
Author's Perspective . . . . .	686
<i>A. Stress Injury . . . . .</i>	<i>686</i>
References . . . . .	691

## Chapter 21 Proximal Radius

Anatomy and Growth . . . . .	695
Classification . . . . .	696
Epidemiology . . . . .	696
Evaluation . . . . .	699
Management . . . . .	700
Complications . . . . .	718
References . . . . .	731

## Chapter 22 Proximal Ulna

Anatomy and Growth . . . . .	733
Classification . . . . .	736
Epidemiology . . . . .	737
Evaluation . . . . .	739
Management . . . . .	744
Complications . . . . .	745
Author's Perspective . . . . .	745
<i>A. Stress Injury . . . . .</i>	<i>745</i>
Anatomy . . . . .	745
Classification . . . . .	746
Epidemiology . . . . .	746
Evaluation . . . . .	746
Management . . . . .	746
Complications . . . . .	747
References . . . . .	747

## Chapter 23 Proximal Clavicle

Anatomy and Growth . . . . .	749
Classification . . . . .	750
Epidemiology . . . . .	750
Evaluation . . . . .	750
Management . . . . .	751
Complications . . . . .	753
Author's Perspective . . . . .	753
References . . . . .	753

## Chapter 24

### Pelvis: Triradiate Cartilage

Anatomy and Growth . . . . .	755
Classification . . . . .	756
Epidemiology . . . . .	756
Evaluation . . . . .	757
Management . . . . .	759
Complications . . . . .	765
Author's Perspective . . . . .	766
References . . . . .	767

## Chapter 25

### Distal Clavicle

Anatomy and Growth . . . . .	769
Classification . . . . .	769
Epidemiology . . . . .	769
Evaluation . . . . .	770
Management . . . . .	770
Complications . . . . .	772
References . . . . .	772

## Chapter 26

### Proximal Femur

Anatomy and Growth . . . . .	773
Classification . . . . .	776
Epidemiology . . . . .	777
Evaluation . . . . .	778
Management . . . . .	778
Complications . . . . .	785
Author's Perspective . . . . .	786
<i>A. Birth Fractures . . . . .</i>	<i>786</i>
Anatomy . . . . .	786
Classification . . . . .	786
Epidemiology . . . . .	786
Evaluation . . . . .	787
Management . . . . .	788
Complications . . . . .	788
Author's Perspective . . . . .	788
References . . . . .	789

## Chapter 27

### Proximal Fibula

Anatomy and Growth . . . . .	791
Classification . . . . .	792
Epidemiology . . . . .	793
Evaluation . . . . .	793
Management . . . . .	793
Complications . . . . .	793
References . . . . .	795

## Chapter 28

### Spine (Vertebral Physal Endplate)

Anatomy and Growth . . . . .	797
Classification . . . . .	799
Epidemiology . . . . .	799
Evaluation . . . . .	799
Management . . . . .	802
Complications . . . . .	802
Author's Perspective . . . . .	802
<i>A. Cervical Spine . . . . .</i>	<i>802</i>
Anatomy and Growth . . . . .	802
Classification . . . . .	802
Epidemiology . . . . .	802
Evaluation . . . . .	802
Management . . . . .	803
Complications . . . . .	803
<i>B. Thoracolumbar Spine . . . . .</i>	<i>803</i>
Anatomy and Growth . . . . .	803
Classification . . . . .	803
Epidemiology . . . . .	804
Evaluation . . . . .	804
Management . . . . .	804
Complications . . . . .	804
References . . . . .	804

## Chapter 29

### Ribs

References . . . . .	807

**PART III****Partial Physeal Arrest****Chapter 30****Etiology**

Anatomy . . . . .	811
Epidemiology . . . . .	813
Influence of Gender . . . . .	813
Influence of Age . . . . .	813
Influence of Site . . . . .	813
Influence of Fracture Type . . . . .	814
Influence of Treatment . . . . .	815
Incomplete Partial Physeal Bar . . . . .	817
Prevention . . . . .	820
References . . . . .	822

**Chapter 31****Assessment**

Clinical Examination . . . . .	825
Imaging Studies . . . . .	825
Limb Length Measurements . . . . .	827
Bar Analysis: Location, Area, and Contour . . . . .	833
Classification of Bars . . . . .	842
State of Maturity . . . . .	844
Author's Perspective . . . . .	845
References . . . . .	845

**Chapter 32****Management: General**

Treatment Alternatives . . . . .	849
Size and Location of the Bone Bar . . . . .	850
Physis Involved . . . . .	850
Age of Patient . . . . .	850
Additional Considerations . . . . .	851
Author's Perspective . . . . .	851
References . . . . .	851

**Chapter 33****Physeal Bar Excision**

History . . . . .	853
Experimental Studies in Animals . . . . .	854
Indications in Humans . . . . .	855

Surgical Technique . . . . .	855
Interposition Materials . . . . .	860
Postoperative Care . . . . .	863
Results: The Literature . . . . .	863
Follow-up . . . . .	872
Complications . . . . .	876
Results: The Mayo Clinic Experience . . . . .	877
Author's Perspective . . . . .	882
References . . . . .	882

**Chapter 34****Physeal Distraction**

Introduction . . . . .	885
Procedure . . . . .	886
Distraction of a Physis with a Bar . . . . .	887
Physeal Distraction with Concurrent Bar Excision . . . . .	888
Physeal Distraction Followed by Bar Excision . . . . .	888
Bar Excision Followed by Physeal Distraction . . . . .	888
Complications . . . . .	888
Author's Perspective . . . . .	890
References . . . . .	890

**Chapter 35****Physeal Cartilage Transplantation**

Introduction . . . . .	893
Autograft Transplantation of the End of a Bone . . . . .	893
Autograft Transplantation of a Block of Bone Containing the Physis . . . . .	894
Autograft Transplantation of the Physis Alone . . . . .	894
Allograft Transplantation . . . . .	895
Transplantation of Cultured Cartilage Cells . . . . .	896
Author's Perspective . . . . .	896
References . . . . .	896

**Chapter 36****Spontaneous Resolution**

Introduction . . . . .	899
Forme Fruste Bar . . . . .	902
Author's Perspective . . . . .	904
References . . . . .	906
