Part I Shock Waves in Complex Liquids

1 Shock Waves in Bubbly Liquids

<i>Leen van Wijngaarden</i>	3
1.1 Introduction	3
1.2 Elements of Bubble Dynamics	3
1.3 Nonlinear Compressive Waves	9
1.4 Mechanisms Opposing Steepening of Compressive Waves	11
1.4.1 Viscous Stresses	11
1.4.2 Dispersion	11
1.4.3 Relaxation	12
1.5 Strong Shock Waves	14
1.6 Shock Waves of Moderate and Weak Strength	17
1.7 Solitons in bubbly flows	28
References	31

2 Interaction of a Shock Wave with a Single Bubble

<i>Yukio Tomita</i>	35
2.1 Introduction	35
2.2 Violent Bubble Collapse and Liquid Jet Formation	37
2.3 Shock Wave–Bubble Interaction near Boundaries	48
2.4 Bubble Collapse Induces High Temperature and Sonoluminescence	59
References	63

3 Shock Induced Cavitation

<i>Valery K. Kedrinskii</i>	67
3.1 Introduction	67
3.2 Real Liquid State (Nucleation Problems)	68
3.3 Bubble Clusters	72
3.3.1 Formation Mechanisms	72
3.3.2 Mathematical Model of Cavitating Liquid	73

3.3.3	Comparison with Experiments	75
3.3.4	Dynamic Strength of Liquid	76
3.3.5	Tensile Stress Relaxation (Cavitation in a Vertically Accelerated Tube)	77
3.4	Methods of Hydrodynamic Pulse Tubes and Experimental Technique	80
3.4.1	Hydrodynamic Tube of Rarefaction	80
3.4.2	Hydrodynamic Shock Tube, Pulse X-Ray Method and Resolution of Cavitation Zone Dynamics	80
3.4.3	“Frozen” Profile of Mass Velocities in a Cavitation Zone	83
3.5	Comparison of the Initial Stages of Disintegration of Solids and Liquids	85
3.5.1	Liquids	85
3.5.2	Solids	88
3.6	Shock Waves, Bubbles, and Biomedical Problems	89
3.6.1	General Questions and Statements	89
3.6.2	Some Results on Modeling of ESWL Applications	92
	References	95
4 Shocks in Cryogenic Liquids		
	<i>Masahide Murakami</i>	99
4.1	Cryogenic Fluids and Superfluid Liquid Helium	99
4.1.1	Cryogenic Fluids	100
4.1.2	Superfluid Liquid Helium (He II)	102
4.2	Shock Waves in He II	112
4.2.1	Compression Shock Wave	112
4.2.2	Thermal Shock Wave	116
4.2.3	Superfluid Shock Tube Facility	122
	References	130

Part II Shock Waves and Phase Transition

5 Shock Waves in Fluids with Interphase Transport of Mass, Momentum and Energy (Vapour–Droplet Mixtures and Solid-Particle-Laden Gases)

	<i>Abhijit Guha</i>	135
5.1	Introduction	135
5.2	Relaxation Gas Dynamics for Pure Vapour–Droplet Mixtures and Detailed Structure of Shock Waves	137
5.2.1	Relaxation Phenomena	137
5.2.2	Gas Dynamics	143
5.2.3	Detailed Structure of Shock Waves	148

5.3	Integral Analysis: Jump Conditions for Pure Vapour–Droplet Flows	156
5.3.1	Stationary Shock Waves	156
5.3.2	Jump Relations for Pure Vapour–Droplet Flow	159
5.3.3	Unsteady Development of Shock Waves	162
5.4	Coupled Relaxation Processes and Thermal Choking	165
5.4.1	Differential Approach	165
5.4.2	Integral Approach	167
5.5	Shock Waves in Vapour–Droplet Flow with a Carrier Gas	168
5.5.1	Introduction	168
5.5.2	Jump Conditions Across Normal Shock Waves when both Boundary Conditions are Equilibrium States	171
5.5.3	Limiting Wetness Fraction	174
5.5.4	Jump Conditions Across Shock Waves with Complete Evaporation of Liquid Phase ($y_2 = 0$)	174
5.6	Shock Waves in a Solid Particle-Laden Gas	176
5.6.1	Equilibrium Gas Dynamics for Gas-Particle Mixture	176
5.6.2	Relaxation Phenomena	177
5.6.3	Comparative Magnitudes of Relaxation Times and Structure of Shock Waves	179
5.6.4	Jump Conditions	179
5.7	Interpretation of Total Pressure and Total Temperature	180
	References	185
6 Condensation Discontinuities and Condensation Induced Shock Waves		
	<i>Can F. Delale, Günter H. Schnerr, Marinus E.H. van Dongen</i>	187
6.1	Introduction	187
6.2	Kinetics of Condensation and Condensation Models	188
6.2.1	Nucleation	188
6.2.2	Droplet Growth	190
6.3	Flows with Heat Addition	190
6.3.1	Subcritical Flows	199
6.3.2	Supercritical Flows	199
6.4	Condensation Induced Shock Waves in Nozzle Flows	202
6.4.1	Quasi-One-Dimensional Nozzle Flows	202
6.4.2	Two-Dimensional Transonic Nozzle Flows with Nonequilibrium Condensation	209
6.4.3	Unsteady Self-Excited Periodic Flows	214
6.4.4	Condensation Induced Shock Waves in Prandtl–Meyer Flows	220
6.4.5	Condensation Induced Shock Waves in Unsteady Rarefaction Waves	223
6.4.6	Future Perspectives	227
	References	228

7 Liquefaction Shock Waves

<i>Gerd E.A. Meier</i>	231
7.1 Introduction	231
7.2 Retrograde Fluids and their Role in Gasdynamics	232
7.2.1 Introductory Remarks	232
7.2.2 The Liquefaction Shock Wave History	233
7.2.3 Fluid Properties of Retrograde Substances	234
7.2.4 Gasdynamic Aspects of Fluid Properties	235
7.2.5 One-Dimensional Treatment of Real Gas Flows	237
7.2.6 Initial Flow Experiments with Retrograde Fluids with Shock Waves	238
7.3 Experimental Details of Liquefaction Shock Wave Studies	244
7.3.1 Objectives of the Experiments	244
7.3.2 Experimental Arrangement of the First Tests	244
7.3.3 Experimental Results for Partial Liquefaction Shocks ...	248
7.3.4 Experimental Results for Complete Liquefaction Shocks ..	251
7.3.5 Photographic Observations of the Liquefaction Shock Wave	254
7.3.6 Shock-Boundary-Layer Interaction Region	256
7.3.7 Experimental Results for Liquefaction Shocks from an Open Shock Tube	256
7.4 Concluding Remarks	257
References	259

Part III Shock Waves Interacting with Solid Foams, Textiles, Porous and Granular Media

8 Experimental Studies of Shock Wave Interactions with Porous Media

<i>Beric Skews</i>	271
8.1 Introduction	271
8.2 Thin Barriers	272
8.2.1 Perforated Rigid Plates	272
8.2.2 Textiles	275
8.2.3 Movable Sheets	280
8.3 Thick Slabs	280
8.3.1 Rigid Skeletons	282
8.3.2 Compressible Foams	284
8.4 Particle Beds	292
8.5 Conclusion	293
References	294

9 Linear Waves and Shock Waves in Flexible and Rigid**Porous Media**

<i>David Smeulders and Marinus van Dongen</i>	297
9.1 Introduction	297
9.2 Acoustic Bulk Properties	298
9.2.1 Thermal Effects	299
9.2.2 One-Dimensional Field Equations	301
9.2.3 Low-Frequency Limit	304
9.2.4 High-Frequency Limit	305
9.2.5 Loose Frame Limit	306
9.2.6 Stiff Frame Limit	308
9.2.7 Incompressible Fluid Limit	309
9.3 Wave Interactions and Wave Reflections	310
9.4 Nonlinear Models	312
9.4.1 Head-on Collision of Shock Waves with Rigid Porous Media	314
9.4.2 Head-on Collision of Shock Waves with Flexible Porous Media	318
9.5 Conclusions	322
References	323

10 Shock Waves in Granular Media

<i>Victor Golub and Olga Mirova</i>	325
10.1 Introduction	325
10.2 Shock Adiat of a Solid	325
10.3 Shock Adiat in Granular Material	327
10.4 Processes of Deformation Under Shock-Wave Loading	331
10.4.1 Models Used in Calculations	331
10.4.2 Phenomenology of the Process of Shock Compaction of Granular Materials	335
10.4.3 Key Features of the Thermodynamics of Shock Compaction of Granular Media	338
10.4.4 Analysis of Thermodynamic Models of Heterogeneous Heating of Granular Medium Under Conditions of Shock-Wave Deformation	342
10.4.5 Conditions Required for Developing High-Strength Compacts	345
10.5 Attenuation of Explosive Wave as a Result of Deterioration of Granular Material	346
References	350
Index	353
