

Contents

Section I Plant Biotechnology in Agriculture

I.1	Impact of Plant Biotechnology in Agriculture	3
	S.K. DATTA	
1	Introduction	3
2	Crops and Genomics	5
3	Genetic Transformation of Plants	6
4	Transgenics in Stabilizing Production	10
5	Plant Protection	11
6	Enhancing Shelf Life	20
7	Improving Productivity	20
8	C4 Pathway in C3 Plants	21
9	Nutrition-Rich Crops	22
10	Conclusion	24
	References	25

Section II Cereals

II.1	Rice	35
	Y. WANG, M. CHEN, and J. LI	
1	Introduction	35
2	Hybrid Rice	35
3	Marker-Assisted Selection and Quantitative Trait Locus Analysis . .	36
4	Rice Transformation and Genetic Engineering	37
5	Gene Isolation and Characterization	39
6	Application of Rice Biotechnology	43
7	Conclusions	47
	References	47
II.2	Wheat	55
	F.D. MEYER and M.J. GIROUX	
1	Introduction	55
2	Particle Bombardment	55
3	Integration and Expression of Biolistic Transgenes	61

4	<i>Agrobacterium</i> -Mediated Transformation	62
5	Biolistics Versus <i>Agrobacterium</i> : Which Method is Preferred?	63
6	Improving Wheat Field Performance	64
7	Improving the End-Use Quality of Wheat	66
8	Conclusions	66
	References	68
II.3	Maize	73
	F. TORNEY, B. FRAME, and K. WANG	
1	Introduction	73
2	Penetration – Delivery Methods	78
3	Competence and Regenerability – Target Tissue	85
4	Future Prospects	93
5	Concluding Remarks	98
	References	98
II.4	Rye	107
	F. ALTPETER and V. KORZUN	
1	Introduction	107
2	Economic Importance of Rye	107
3	Molecular Markers, Genetic Mapping and Marker-Assisted Selection	108
4	Androgenesis for the Production of Double Haploids	111
5	Genetic Transformation	112
6	Conclusions	113
	References	114
II.5	Pearl Millet	119
	M. GIRGI and M.M. O'KENNEDY	
1	Introduction	119
2	Species Origin and Economic Importance	119
3	Pearl Millet Biotechnology	120
4	Conclusions	125
	References	125
II.6	Barley	129
	K.J. KASHA	
1	Introduction	129
2	Economic Importance of Barley	131
3	Current Research and Development	131
4	Practical Applications of Biotechnology in Barley	141
5	Conclusions and Future Challenges	143
	References	143

II.7	Oat	151
	A. CARLSON and H.F. KAEPLER	
1	Introduction	151
2	Economic Importance	151
3	Current Research and Development	153
4	Practical Applications of Transgenic Plants	156
5	Conclusion and Future Challenges	157
	References	158

Section III Vegetables

III.1	Tomato	163
	G. TUCKER, P. WALLEY, and G. SEYMOUR	
1	Origin of <i>Solanum lycopersicum</i>	163
2	Current Uses of Tomato Fruit	164
3	Tomato Biodiversity	165
4	Molecular Biology Tools for Tomato Improvement	166
5	Applications of Biotechnology to Tomato	168
6	Conclusions	175
	References	175
III.2	Cucumber	181
	W. PLADER, W. BURZA, and S. MALEPSZY	
1	Introduction	181
2	Current Research and Developments	183
3	Conclusion and Future Challenges	194
	References	195
III.3	Eggplant	201
	M.V. RAJAM and S.V. KUMAR	
1	Introduction	201
2	Tissue Culture	202
3	Genetic Engineering	208
4	Future Prospects	213
	References	214
III.4	Lettuce	221
	M.R. DAVEY, P. ANTHONY, P. VAN HOOFF, J.B. POWER, AND K.C. LOWE	
1	Morphology, Origin and Production of Cultivated Lettuce	221
2	Genetic Improvement of Lettuce: Conventional Breeding and Biotechnological Approaches	222
3	Culture of Tissues and Isolated Protoplasts of Lettuce	225

4	Somaclonal Variant Plants Regenerated from Cultured Tissues and Protoplasts of Lettuce	226
5	Somatic Hybridisation of Lettuce	227
6	Transformation for the Genetic Manipulation of Lettuce: Direct DNA Uptake into Protoplasts and <i>Agrobacterium</i> -mediated Gene Delivery	228
7	Introduction of Agronomically Important Genes into Lettuce	230
8	Inactivation of Gene Expression in Transgenic Lettuce	238
9	Plastid Transformation in Lettuce	240
10	Harvested Lettuce: Biotechnological Approaches to Maintain Quality, Shelf-Life and Safety	241
11	Concluding Remarks	243
	References	243
III.5	Chickpea	251
	J.C. POPELKA and T.J.V. HIGGINS	
1	Introduction	251
2	Advances in Chickpea Tissue Culture	252
3	Advances in Chickpea Transformation	254
4	Application of Transformation Technology to Chickpea and Its Potential	259
5	Conclusion and Outlook	260
	References	260
III.6	Common Bean and Cowpea	263
	F.J.L. ARAGÃO and F.A.P. CAMPOS	
1	Introduction	263
2	Common Bean (<i>Phaseolus vulgaris</i>)	264
3	Cowpea (<i>Vigna unguiculata</i>)	266
4	Future Prospects and Limitations	271
	References	272
III.7	Carrot	277
	Z.K. PUNJA, J. JAYARAJ, and O. WALLY	
1	Introduction	277
2	Applications of Biotechnology to Carrot Improvement	278
3	Future Prospects	290
	References	291

Section IV Root Crops

IV.1	Potato	297
	F. BÖRNKE, U. SONNEWALD, and S. BIEMELT	
1	Introduction	297
2	Economic Importance	297
3	Genetic Engineering	298
4	Goals of Potato Biotechnology	300
5	Conclusions and Future Outlook	310
	References	310
IV.2	Cassava	317
	K. RAEMAKERS, M. SCHREUDER, V. ANGGRAINI, H. KOEHORST-VAN PUTTEN, I. PEREIRA, and R. VISSER	
1	The Crop and its Importance	317
2	Regeneration Methods Combined with Genetic Modification	318
3	Quality of Plants Derived from Different Regeneration Systems	322
4	Genetic Modification of Cassava	325
5	Transfer of Agronomical Useful Genes to Cassava	328
6	General Conclusions	332
	References	333
IV.3	Sweet Potato	337
	T. SHIMADA and M. OTANI	
1	Introduction	337
2	Tissue Culture	338
3	Transformation System	342
4	Molecular Genetics	348
5	Concluding Remarks	349
	References	350
IV.4	Sugar Beet	355
	M. JOERSBO	
1	Introduction	355
2	Production of Transgenic Sugar Beet	356
3	Herbicide Tolerance	360
4	Disease and Pest Resistance	366
5	Other Traits	368
6	Safety and Environmental Impact	368
7	Conclusion	373
	References	374

IV.5	Radish	381
	I.S. CURTIS	
1	Introduction	381
2	Research in Tissue Culture	381
3	Genetic Transformation	383
4	Practical Applications	385
5	Conclusions	387
	References	388

Section V Herbs and Spices

V.1	Sweet and Hot Peppers	393
	D.A. BRUMMELL and R. PATHIRANA	
1	Introduction	393
2	Cell, Tissue and Organ Culture	395
3	In Vitro Plant Regeneration and Genetic Transformation	398
4	Plant Improvement through Genetic Engineering	400
5	Pepper Cell Cultures for Capsaicin Production	408
6	Future Prospects	409
	References	410
V.2	Onion, Garlic and Related Species	415
	S.I. SONG, J.-J. CHEONG, and Y.D. CHOI	
1	Introduction	415
2	Onion (<i>Allium cepa</i> L.)	416
3	Garlic (<i>Allium sativum</i> L.)	423
4	Future Perspectives	429
	References	430
V.3	Mint	435
	F. JULLIEN	
1	Introduction	435
2	In Vitro Studies	445
3	Transformation and Genetic Bioengineering	449
4	Concluding Remarks	457
	References	458
	Subject Index	467

Transgenic Crops IV

Pua, E.C.; Davey, M.R. (Eds.)

2007, XX, 476 p. 36 illus., 8 illus. in color., Hardcover

ISBN: 978-3-540-36751-2
