Part I Setting Up Closed-Loop Supply Chains

1	Introduction	3
1.1	Sustainable Supply Chain Management	3
1.2	Outline of This Monograph	8
2	Strategic Aspects of Asset Recovery	13
2.1	Corporate Strategy and Competitive Advantage	13
2.2	Closed-Loop Supply Chains and Competitive Strategies	17
2.2.1	Cost Leadership	18
2.2.2	Differentiation	23
2.2.3	Focused Strategies	27
3	Strategic Impact of Closed-Loop Supply Chains	31
3.1	Literature Overview	31
3.2	A Generic Closed-Loop Strategic Model	33
3.3	Closed-Loop Supply Chains: Managerial Insights	39
3.3.1	The Impact of Green Fees on Asset Recovery	39
3.3.2	Managing the Cannibalization Effect	43
3.3.3	The Role of Intra-Organizational Incentives Alignment	48
4	Competition in Closed-Loop Supply Chains	51
4.1	External Competition as a Signal of Profitability	52
4.1.1	Evidence from Current Practice	52
4.1.2	OEMs' Competitive Leverages	54
4.2	How to Deal with Independent Refurbishers: A Literature Overview	56
4.3	Analyzing Best Responses Strategies for Manufacturers	58

4.3.1	Competitive Asset Recovery Strategies	59
4.3.2	Entry Preempting Asset Recovery Strategies	63
5	Strategic Network Planning in Closed-Loop Supply Chains	67
5.1	Strategic Closed-Loop Network Planning: A Review	71
5.2	A Generic Strategic Network Planning Model	76
5.2.1	The Key Factors of Remanufacturing	77
5.2.2	Optimization Model	81
5.2.3	An Inter-Generational Compatibility Extension	85
5.3	Extensions to the Generic Strategic Planning Model	87
5.3.1	Recovery Path Determination	87
5.3.2	Location of Recovery Centers	91
<hr/>		
Part II Closed-Loop Supply Chains: Case Studies		
<hr/>		
6	Tire Industry	101
6.1	Introduction	101
6.2	Model Implementation	105
6.2.1	Demand Segmentation	106
6.2.2	Return Flow Timing and Quantities	108
6.2.3	Reintegration Potential	109
6.3	Optimization Results	110
6.3.1	Scenario Overview	110
6.3.2	Closed-Loop Supply Chains and Functional Goods	115
7	Computer Industry	119
7.1	The Environmental Challenge of Computer Manufacturing	119
7.2	Model Implementation	120
7.2.1	Demand Segmentation	122
7.2.2	Return Flow Timing and Quantities	123
7.2.3	Reintegration Potential	124
7.3	Optimization Results	126
7.3.1	Impact Assessment of the European Product Stewardship Laws	127
7.3.2	Impact Assessment of Computer Refurbishing	129
8	Conclusion and Outlook	133
