
List of Contents

1	Introduction	1
1.1	Studies on Cell Proliferation in Adult Primate Brain	1
1.2	Methodological Considerations in Detecting Cell Proliferation	2
1.3	Cell Proliferation in Rodent Brain After Ischemia	3
1.4	Global Cerebral Ischemia in Primates	6
2	Materials and Methods	8
2.1	Animal Subjects	8
2.2	Bromodeoxyuridine Infusion Protocol	8
2.3	Tissue Processing	9
2.4	Immunohistochemistry	10
2.5	Detection of DNA Damage and Degenerating Cells	10
2.6	Electron Microscopy	14
2.7	Image Acquisition and Analysis	15
2.8	Statistical Analysis	17
3	Results	17
3.1	Hippocampal Formation	21
3.1.1	Dentate Gyrus	21
3.1.2	Cornu Ammonis	35
3.1.3	Subiculum	42
3.2	Subventricular Zone of the Inferior Horn of the Lateral Ventricle	42
3.3	Temporal Lobe	47
3.3.1	Parahippocampal Region	47
3.3.2	Temporal Neocortex	49
3.4	Subventricular Zone of the Anterior Horn of the Lateral Ventricle	56
3.5	Rostral Migratory Stream and Olfactory Bulb	68
3.6	Frontal Cortex and Striatum	76
4	Discussion	83
4.1	BrdU as a Proliferation Marker	83
4.2	Effects of Ischemia on Cell Proliferation and Differentiation	84
4.3	Sustained Progenitor Cell Existence in Germinative Zones	91
4.4	Implications of Monkey Findings for Therapies in Humans	93
5	Summary	95
	References	97
	Subject Index	107

Distribution and Phenotype of Proliferating Cells in the
Forebrain of Adult Macaque Monkeys after Transient
Global Cerebral Ischemia

Tonchev, A.B.; Yamashima, T.; Chaldakov, G.N.

2007, X, 108 p. 65 illus., Softcover

ISBN: 978-3-540-39613-0
