

Table of contents

	List of symbols, abbreviations and methods	X
1	Electrode potentials	1
1.1	Definition of the electrode potential	1
1.2	Effect of temperature and pressure on cell voltages and electrode potentials	3
Table 1.1	Metal electrode potentials in aqueous electrolyte systems	5
Table 1.2	Nonmetal electrode potentials in aqueous electrolyte systems	41
Table 1.3	Metal electrode potentials in nonaqueous electrolyte systems	46
Table 1.4	Nonmetal electrode potentials in nonaqueous electrolyte systems	54
Table 1.5	Formal potentials of organic redox systems	55
Table 1.6	Potentials of common reference electrodes in an aqueous solution	59
2	Cell voltages	61
2.1	Definition of cell voltage	61
Table 2.1	Cell voltages with aqueous electrolyte systems	63
Table 2.2	Cell voltages with nonaqueous electrolyte systems	126
Table 2.3	Cell voltages with molten salt electrolyte systems	152
Table 2.4	Cell voltages with solid state electrolyte systems	168
3	Electrode potentials of zero charge	179
3.1	Thermodynamics of an electrode in contact with an electrolyte solution	179
3.2	Determination of the electrode potential of zero charge	180
Table 3.1	Electrode potentials of zero charge of metal electrodes in contact with electrolyte solutions	191
Table 3.2	Electrode potentials of zero charge of metal oxide electrodes in contact with electrolyte solutions	232
Table 3.3	Electrode potentials of zero charge of metal electrodes in contact with molten electrolyte salts	233
Table 3.4	Electrode potentials of zero charge of miscellaneous materials in contact with aqueous electrolyte solutions.	237
4	Free enthalpies of adsorption	238
4.1	Thermodynamics of the adsorption at electrodes	238
4.2	Determination of the free enthalpy of the adsorption at electrodes	239
Table 4.1	Free enthalpies of adsorption ΔG_{ad}^0 of ions and organic molecules at metal electrodes	244
5	Exchange current densities	264
5.1	Kinetics of electrode processes at an electrode in contact with an electrolyte solution	264
5.2	Methods for the determination of exchange current densities	267
Table 5.1	Exchange current densities and rate constants in aqueous systems	276
Table 5.2	Exchange current densities and rate constants in aqueous systems at miscellaneous surfaces	380
Table 5.3	Exchange current densities in molten salt electrolyte systems	381
6	References	384

Electrochemical Thermodynamics and Kinetics

Holze, R.

2007, XIII, 427 p., Hardcover

ISBN: 978-3-540-41038-6
