<b>Preface</b> .....	V
<b>Acknowledgements</b> .....	VIII
<b>Abbreviations</b> .....	XVII
<b>1 Introduction</b> .....	1
<b>2 Introduction to Singular Perturbation Problems</b> .....	7
2.1 Regular and Singular Problems .....	8
2.1.1 Linear Oscillator .....	8
2.1.2 Secular Problem .....	11
2.1.3 Singular Problem .....	14
2.2 Approximation Methods for Singular Perturbation Problems .	15
2.2.1 Method of Matched Asymptotic Expansions .....	16
2.2.2 Successive Complementary Expansion Method .....	19
2.2.3 Multiple Scale Method .....	20
2.2.4 Poincaré–Lighthill’s Method .....	22
2.2.5 Renormalization Group Method .....	24
2.3 Conclusion .....	25
Problems .....	25
<b>3 Boundary Layer Structure</b> .....	31
3.1 Study of a Second Order Differential Equation .....	31
3.2 Analysis of each Case .....	35
3.3 Conclusion .....	40
Problems .....	41
<b>4 Asymptotic Expansions</b> .....	43
4.1 Order Functions. Order of a Function .....	43
4.1.1 Definition of an Order Function .....	43
4.1.2 Comparison of Order Functions .....	43
4.1.3 Total Ordering .....	44
4.1.4 Order of a Function .....	45
4.2 Asymptotic Sequence .....	46

4.2.1	Definition of an Asymptotic Sequence . . . . .	46
4.2.2	Class of Equivalence . . . . .	46
4.2.3	Gauge Functions . . . . .	47
4.3	Asymptotic Expansion . . . . .	47
4.3.1	Asymptotic Approximation . . . . .	47
4.3.2	Regular Functions . . . . .	49
4.3.3	Regular and Generalized Asymptotic Expansions . . . . .	50
4.3.4	Convergence and Accuracy . . . . .	51
4.3.5	Operations on Asymptotic Expansions . . . . .	54
4.4	Conclusion . . . . .	55
	Problems . . . . .	55
<b>5</b>	<b>Successive Complementary Expansion Method . . . . .</b>	<b>59</b>
5.1	Method of Matched Asymptotic Expansions . . . . .	59
5.1.1	Expansion Operator . . . . .	59
5.1.2	Outer Expansion - Inner Expansion . . . . .	60
5.1.3	Asymptotic Matching . . . . .	61
5.2	Boundary Layer . . . . .	65
5.2.1	Expansion Operator to a Given Order . . . . .	65
5.2.2	Significant Approximations . . . . .	66
5.3	Intermediate Matching . . . . .	67
5.3.1	Kaplun's Extension Theorem . . . . .	67
5.3.2	Study of Examples . . . . .	67
5.3.3	Rule of Intermediate Matching . . . . .	69
5.4	Asymptotic Matching Principle . . . . .	71
5.4.1	Van Dyke's Principle . . . . .	71
5.4.2	Modified Van Dyke's Principle . . . . .	72
5.5	Examples and Counter-Examples . . . . .	72
5.5.1	Example 1 . . . . .	72
5.5.2	Example 2 . . . . .	73
5.5.3	Example 3 . . . . .	74
5.5.4	Example 4 . . . . .	75
5.6	Discussion of the Matching Principle . . . . .	76
5.6.1	Corrective Boundary Layer . . . . .	77
5.6.2	The MVDP from the Overlap Hypothesis . . . . .	79
5.7	Successive Complementary Expansion Method . . . . .	81
5.7.1	Principle . . . . .	81
5.7.2	Equivalence of MVDP and of Regular SCEM . . . . .	84
5.8	Applications of SCEM . . . . .	86
5.8.1	Example 1 . . . . .	86
5.8.2	Example 2 . . . . .	88
5.8.3	Example 3 . . . . .	89
5.9	Conclusion . . . . .	90
	Problems . . . . .	91

<b>6</b>	<b>Ordinary Differential Equations</b>	99
6.1	Example 1	99
6.1.1	Application of MMAE	100
6.1.2	Application of SCEM	102
6.2	Example 2	107
6.2.1	Application of MMAE	107
6.2.2	Application of SCEM	109
6.2.3	Identification with MMAE Results	111
6.2.4	Numerical Results	112
6.3	Example 3	112
6.3.1	Application of MMAE	112
6.3.2	Application of SCEM	116
6.3.3	Identification with MMAE Results	118
6.4	Stokes-Oseen's Flow Model	118
6.4.1	Application of SCEM	118
6.4.2	Numerical Results	120
6.5	Terrible Problem	121
6.5.1	Application of SCEM	122
6.5.2	Numerical Results	125
6.6	Conclusion	125
	Problems	127
<b>7</b>	<b>High Reynolds Number Flows</b>	133
7.1	Boundary Layer Theories	135
7.1.1	Prandtl's Boundary Layer	135
7.1.2	Triple Deck	140
7.2	Analysis of an Integral Method	148
7.2.1	Integral Method	148
7.2.2	Direct Mode	151
7.2.3	Inverse Mode	152
7.2.4	Simultaneous Mode	153
7.3	Viscous-Inviscid Interaction	155
7.4	Conclusion	157
	Problems	158
<b>8</b>	<b>Interactive Boundary Layer</b>	169
8.1	Application of SCEM	170
8.1.1	Outer Approximation	170
8.1.2	Determination of a Uniformly Valid Approximation	171
8.1.3	Gauge for the Pressure	173
8.2	First Order Interactive Boundary Layer	173
8.2.1	Generalized Boundary Layer Equations	173
8.2.2	Boundary Conditions	174
8.2.3	Estimate of the Remainders of Equations	175
8.3	Second Order Interactive Boundary Layer	175

8.3.1	Generalized Boundary Layer Equations . . . . .	175
8.3.2	Boundary Conditions . . . . .	176
8.3.3	Estimate of the Remainders of Equations . . . . .	176
8.4	Displacement Effect . . . . .	177
8.5	Reduced Model for an Irrotational External Flow . . . . .	178
8.6	Conclusion . . . . .	180
	Problems . . . . .	181
<b>9</b>	<b>Applications of Interactive Boundary Layer Models . . . . .</b>	<b>185</b>
9.1	Calculation of a Flow with Separation . . . . .	186
9.1.1	Definition of the Flow . . . . .	186
9.1.2	Numerical Method . . . . .	186
9.1.3	Results . . . . .	188
9.2	Application to Aerodynamic Flows . . . . .	190
9.2.1	Flat Plate of Finite Length . . . . .	190
9.2.2	Airfoils at High Reynolds Numbers . . . . .	192
9.3	Influence of a Rotational External Flow . . . . .	195
9.3.1	Inviscid Flow . . . . .	195
9.3.2	Method of Resolution . . . . .	197
9.3.3	Flows Studied . . . . .	200
9.3.4	Results . . . . .	200
9.4	Conclusion . . . . .	211
	Problems . . . . .	211
<b>10</b>	<b>Regular Forms of Interactive Boundary Layer . . . . .</b>	<b>215</b>
10.1	Second Order Boundary Layer Model . . . . .	215
10.1.1	Second Order Interactive Boundary Layer Model . . . . .	217
10.1.2	Van Dyke's Second Order Model . . . . .	217
10.2	Triple Deck Model . . . . .	221
10.2.1	Flow on a Flat Plate with a Small Hump . . . . .	221
10.2.2	Regular Expansions . . . . .	223
10.3	Summary of Approximations of Navier-Stokes Equations . . . . .	226
10.4	Conclusion . . . . .	226
	Problems . . . . .	227
<b>11</b>	<b>Turbulent Boundary Layer . . . . .</b>	<b>237</b>
11.1	Results of the Standard Asymptotic Analysis . . . . .	237
11.1.1	Averaged Navier-Stokes Equations . . . . .	237
11.1.2	Scales . . . . .	238
11.1.3	Structure of the Flow . . . . .	239
11.2	Application of SCEM . . . . .	243
11.2.1	First Approximation . . . . .	243
11.2.2	Contribution of the Outer Region of the Boundary Layer . . . . .	243

11.2.3 Contribution of the Inner Region of the Boundary Layer .....	246
11.3 Interactive Boundary Layer .....	249
11.3.1 First Order Model .....	249
11.3.2 Second Order Model .....	250
11.3.3 Global Model .....	250
11.3.4 Reduced Model for an Irrotational External Flow .....	251
11.4 Approximation of the Boundary Layer: Velocity Profile .....	254
11.4.1 Formulation of the Problem .....	254
11.4.2 Turbulence Model .....	256
11.4.3 Outer Region .....	256
11.4.4 Equation to Solve .....	257
11.4.5 Examples of Results .....	258
11.5 Conclusion .....	260
Problems .....	260
<b>12 Channel Flow .....</b>	<b>267</b>
12.1 Formulation of the problem .....	267
12.2 Uniformly Valid Approximation .....	270
12.3 IBL Model for the Lower Wall .....	272
12.4 Global IBL Model .....	274
12.5 Numerical Solution .....	275
12.5.1 General Method .....	275
12.5.2 Simplified Method for the Pressure .....	277
12.6 Application of the Global IBL model .....	279
12.6.1 Discussion of the Numerical Procedure .....	279
12.6.2 Comparisons with Smith's theory .....	283
12.6.3 Comparison with Navier-Stokes Solutions .....	290
12.7 Conclusion .....	295
Problems .....	295
<b>13 Conclusion .....</b>	<b>301</b>
<b>Appendices .....</b>	
<b>I Navier-Stokes Equations .....</b>	<b>303</b>
<b>II Elements of Two-Dimensional Linearized Aerodynamics ..</b>	<b>305</b>
II.1 Thickness Problem (Non Lifting Case) .....	306
II.2 Zero-Thickness Problem (Lifting Case) .....	307
<b>III Solutions of the Upper Deck of the Triple Deck Theory ...</b>	<b>309</b>
III.1 Two-Dimensional Flow .....	309
III.2 Three-Dimensional Flow .....	312
III.2.1 Zero Perturbations at Infinity .....	313

III.2.2 Non Zero Cross-Flow Perturbations at Downstream Infinity .....	314
<b>IV Second Order Triple Deck Theory .....</b>	<b>319</b>
IV.1 Main Results .....	319
IV.2 Global Model for the Main Deck and the Lower Deck .....	325
<b>V Behaviour of an Asymptotic Expansion .....</b>	<b>327</b>
V.1 Formulation of the Problem.....	327
V.2 Study of the Gauge Functions.....	328
V.3 Study of the Outer Expansion.....	330
<b>Solutions of Problems .....</b>	<b>332</b>
<b>References .....</b>	<b>419</b>
<b>Author index .....</b>	<b>427</b>
<b>Subject index.....</b>	<b>428</b>

Asymptotic Analysis and Boundary Layers

Cousteix, J.; Mauss, J.

2007, XVII, 434 p., Hardcover

ISBN: 978-3-540-46488-4
