## Contents

<b>Preface</b>	
<i>K. Takahashi</i> .....	VII
<b>Lifetime of Research on Nitrides – Alone in the Wilderness</b>	
<i>I. Akasaki</i> .....	IX
<b>1 Development and Applications of Wide Bandgap Semiconductors</b>	
<i>A. Yoshikawa, H. Matsunami and Y. Nanishi</i> .....	1
1.1 Optical Devices .....	1
1.1.1 Wide Bandgap Semiconductors Indispensable for Short Wavelength Optical Devices .....	1
1.1.2 Control of the Physical Properties of III–V Nitrides and II–VI Semiconductors .....	6
1.1.3 Other Characteristics and Trends of Wide Bandgap Semiconductor Optical Devices .....	10
1.2 Electronic Devices .....	11
1.2.1 Silicon Carbide Electronic Devices .....	11
1.2.2 Nitride Compound Semiconductor Electron Devices .....	16
References .....	23
<b>2 Fundamental Properties of Wide Bandgap Semiconductors</b>	
<i>S. Yoshida, T. Ito, A. Hiraki, H. Saito, S. Fujita, Y. Ishitani, S. Sakai, T. Miyajima, Y. Yamada, Y. Kawakami, I. Suemune, K. Hiramatsu, H. Kawanishi, H. Amano, H. Okumura and T. Mizutani</i> .....	25
2.1 Crystals and Band Structure .....	25
2.1.1 IV–IV Group Semiconductors .....	25
2.1.2 II–VI Semiconductors .....	31
2.1.3 III–V Nitride Semiconductors .....	36
2.1.4 Heterostructures and Band Structure .....	41
2.1.5 Lattice Defects .....	47

2.2	Optical, Mechanical, and Thermal Properties of Wide Bandgap Semiconductors .....	52
2.2.1	Optical Properties .....	52
2.2.2	Quantum Structure of Wide Bandgap Semiconductors ..	63
2.2.3	Lattice Constants of Semiconductors .....	67
2.2.4	Mechanical and Thermal Properties of Semiconductors ..	70
2.3	Electrical Properties of Wide Bandgap Semiconductors .....	77
2.3.1	Doping Technology .....	77
2.3.2	Mobility of Electrons and Holes .....	78
2.3.3	Electrical Properties of SiC .....	80
2.3.4	Electrical Properties of GaN .....	82
	References .....	86

### 3 Photonic Devices

	<i>Y. Kawakami, S. Kamiyama, G. Hatakoshi, T. Mukai, Y. Narukawa, I. Nomura, K. Kishino, H. Hirayama, M. Kawasaki, A. Ohtomo, H. Okushi, Y. Taniyasu, M. Kasu, T. Makimoto, A. Hirano, K. Kohmoto, H. Kanie, N. Shibata, T. Nakamura, K. Tadatomo, M. Kuramoto, T. Yanamoto, H. Amano and K. Akimoto.....</i>	97
3.1	Physical Properties .....	97
3.1.1	Fundamental Properties of Optical Devices .....	97
3.1.2	Optical Gain and Laser Action .....	105
3.2	Visible LEDs .....	111
3.2.1	Visible AlGaInP LEDs .....	111
3.2.2	Visible GaN LEDs .....	114
3.2.3	BeZnSeTe-Based Green LEDs .....	120
3.3	Ultraviolet Devices .....	124
3.3.1	Issues Related to the Development of High Efficiency and Short Wavelength Ultraviolet LEDs .....	124
3.3.2	ZnO LEDs .....	131
3.3.3	Diamond Light Emitting Devices .....	140
3.3.4	AlN LEDs .....	146
3.3.5	Ultra Violet Photodetectors .....	152
3.4	White Light Emitting Devices .....	158
3.4.1	White LEDs for Illumination .....	158
3.4.2	Development Trends of Phosphors .....	160
3.4.3	Improvements of the Color Rendering of GaN-Based White LEDs .....	167
3.4.4	High Efficiency and High-Power LEDs .....	170
3.4.5	ZnSe-Based White LEDs .....	175
3.4.6	Applications and Prospects of White Light Emitting LEDs .....	180
3.5	Laser Diodes (LDs) .....	186
3.5.1	Blue/Violet Laser Diodes for Next Generation DVD Applications .....	186

3.5.2	Long Wavelength GaN-Based Laser Diodes .....	198
3.5.3	Advances in UV Laser Diodes .....	206
3.5.4	ZnSe Laser Diodes .....	207
References	.....	218

#### 4 Electronic Devices

<i>H. Miyamoto, M. Arai, H. Kwarada, N. Fujimori, S. Yoshida,</i>		
<i>T. Shinohe, A. Hiraki, H. Hiraki, H. Koinuma and M. Katayama ....</i>		231
4.1	High Frequency Power Devices .....	231
4.1.1	Nitride Semiconductor High Frequency Power Devices .....	231
4.1.2	SiC .....	239
4.1.3	Diamond .....	243
4.2	High Breakdown Voltage, High Current Density Power Devices .....	249
4.2.1	GaN .....	249
4.2.2	SiC .....	255
4.3	New Functional Devices .....	263
4.3.1	Electron Emitters .....	263
4.3.2	Transparent Devices .....	271
References	.....	276

#### 5 Novel Nano-Heterostructure Materials and Related Devices

<i>H. Kumano, I. Suemune, K. Kishino, S. Fujita, A. Sandhu, N. Suzuki</i>		
<i>and K. Ohkawa .....</i>		281
5.1	Nanostructure Devices and Materials .....	281
5.1.1	Single Photon Devices .....	281
5.1.2	GaN Nanocolumn Light Emitting Devices .....	287
5.1.3	Wide Bandgap Semiconductor Nanostructures and Devices .....	296
5.2	Novel AlGaN/GaN Heterostructure Devices .....	298
5.2.1	GaN-Based High Temperature Operating Hall Devices .....	298
5.2.2	GaN-Based Intersubband Transition Optical Switches ...	303
5.2.3	Nitride Photocatalysis .....	311
References	.....	321

#### 6 Crystal Growth

<i>N. Ohtani, T. Nakamura, H. Sumiya, F. Hasegawa, S. Sarayama,</i>		
<i>T. Taniguchi, K. Watanabe, S. Fujiwara, Y. Kashiwaba, I. Niikura,</i>		
<i>T. Kimoto, T. Egawa, H. Okushi, K. Onabe, K. Tadatomo,</i>		
<i>K. Hiramatsu, A. Yoshikawa, H. Kawanishi, K. Akimoto, T. Yao</i>		
<i>and T. Hanada .....</i>		329
6.1	Bulk Crystal Growth .....	329
6.1.1	SiC .....	329
6.1.2	Diamond .....	335

XXII Contents

6.1.3	GaN . . . . .	342
6.1.4	BN . . . . .	348
6.1.5	ZnSe . . . . .	352
6.1.6	Crystal Growth of Bulk ZnO Single Crystal . . . . .	356
6.2	Epitaxial Growth . . . . .	362
6.2.1	Epitaxial Growth of SiC . . . . .	362
6.2.2	GaN/Si Epitaxy . . . . .	370
6.2.3	Diamond . . . . .	379
6.2.4	Epitaxial Growth of GaN . . . . .	383
6.2.5	InGaN and InGaN/GaN Heterostructures . . . . .	393
6.2.6	AlGaN, AlN, and AlGaN/GaN Heterostructures . . . . .	400
6.2.7	InN and Related Semiconductors . . . . .	407
6.2.8	Lattice-Matched Quaternary BAlGaN Alloys . . . . .	415
6.2.9	Epitaxial Growth of ZnSe and Related Semiconductors . .	417
6.2.10	ZnO and Related Semiconductors . . . . .	427
	References . . . . .	433
	<b>Index</b> . . . . .	447

Wide Bandgap Semiconductors

Fundamental Properties and Modern Photonic and  
Electronic Devices

Takahashi, K.; Yoshikawa, A.; Sandhu, A. (Eds.)

2007, XXV, 460 p., Hardcover

ISBN: 978-3-540-47234-6
