## Part I Getting Started

---

<b>1</b>	<b>A Quick Overview of IPv6</b> .....	3
1.1	Terminology: IP, IPv4, IPv6 and the Internet .....	3
1.2	The “IPv6 Sales Pitch” .....	3
1.3	IPv6 and the TCP/IP Stack .....	6
<b>2</b>	<b>Preparing for IPv6</b> .....	9
2.1	Obtaining Our Own IPv6 Address Prefix .....	9
2.2	Setting Up Our Test Environment .....	10
2.2.1	Choosing the Hardware .....	10
2.2.2	Supplementing the System Installation .....	11
2.2.3	Backup and Disaster Recovery .....	12
2.3	Security Precautions .....	12
2.4	Kernel IPv6 Support .....	13
2.4.1	Enabling IPv6 Within the Kernel .....	13
2.4.2	IPv6-related Kernel Variables .....	15
2.5	Packet Filter Considerations .....	16
2.5.1	Available Implementations .....	16
2.5.2	Basic Configuration .....	17
<b>3</b>	<b>IPv6 Address Basics</b> .....	21
3.1	Size Matters .....	21
3.2	Address Notation .....	22
3.3	Scopes .....	24
3.4	Unicast Addresses .....	25
3.4.1	Link-local Unicast Addresses .....	26
3.4.2	Site-local and Unique-local Unicast Addresses .....	27
3.4.3	Global Scope Unicast Addresses .....	28
3.5	Multicast Addresses .....	29
3.6	Anycast Addresses .....	30

3.7	Inside IPv6: The IPv6 Headers .....	31
3.8	Address Allocation Policy and the Routing Table Problem ....	32
3.9	References .....	34
3.10	Packet Filter Considerations .....	34
<b>4</b>	<b>Address Configuration .....</b>	<b>35</b>
4.1	Static Address Configuration .....	35
4.1.1	Temporary Configuration .....	36
4.1.2	Persistent Configuration .....	38
4.2	Inside IPv6: Neighbor Discovery (ND) .....	40
4.2.1	Neighbor Solicitations (NS) and Advertisements (NA) .	40
4.2.2	Neighbor Unreachability Detection (NUD) .....	41
4.2.3	Duplicate Address Detection (DAD) .....	42
4.3	Stateless Address Autoconfiguration (SAC) .....	43
4.3.1	The Problems with DHCP .....	43
4.3.2	Autoconfiguration Concepts .....	44
4.3.3	Router Configuration .....	46
4.3.4	Host Configuration .....	49
4.4	Mixing Static and Automatic Configuration .....	50
4.5	Inside IPv6: Autoconfiguration Details .....	51
4.5.1	Address States .....	51
4.5.2	Router Solicitations (RS) and Advertisements (RA) ...	52
4.5.3	Ethernet Addresses and Interface IDs .....	53
4.6	Testing and Debugging .....	54
4.7	Packet Filter Considerations .....	55
4.7.1	From Stateless Filtering to Rewriting Filters .....	55
4.7.2	Packet Sanitation .....	56
4.7.3	Packet Spoofing (Ingress) Filters .....	56
4.7.4	Essential ICMPv6 Packets .....	57
4.7.5	Sample Filter Configurations .....	57
4.7.6	Testing the Filter Configuration .....	63
<b>5</b>	<b>IPv6 and the Domain Name System (DNS) .....</b>	<b>65</b>
5.1	Getting Started .....	65
5.1.1	Naming Conventions .....	65
5.1.2	The DNS Test Setup .....	66
5.1.3	Local Address Management with <code>/etc/hosts</code> .....	67
5.2	IPv6 Addresses in the DNS .....	68
5.2.1	Resolver Configuration .....	69
5.2.2	Enabling IPv6 on the DNS Server .....	70
5.2.3	Forwarder Configuration vs. a Fake Root Zone .....	70
5.2.4	Forward Zones on a Primary Server .....	71
5.2.5	Reverse Zones on a Primary Server .....	73
5.2.6	Secondary Servers .....	75
5.2.7	Testing and Debugging .....	75

5.2.8	Annoying Legacies .....	75
5.3	Open Issues .....	77
5.4	Packet Filter Considerations .....	77
5.4.1	Filter Rules .....	77
5.4.2	DNS Names in Filter Configurations .....	78
<b>6</b>	<b>Essential Network Services .....</b>	<b>81</b>
6.1	Levels of IPv6 Support .....	81
6.2	The Inetd Super Daemon .....	82
6.3	Basic Debugging—Tools and Procedures .....	86
6.4	The Secure Shell (OpenSSH) .....	88
6.5	Time Synchronization with the Network Time Protocol (NTP) .....	89
6.6	Event Logging with Syslog .....	91
6.7	E-mail: The Simple Mail Transfer Protocol (SMTP) .....	92
6.8	The World Wide Web: HTTP and HTTPS .....	93
6.8.1	IPv6 Addresses in URLs .....	93
6.8.2	Web Browsers .....	94
6.8.3	The Apache Web Server .....	94
6.8.4	Web Proxies .....	95
6.9	The Network File System (NFS) .....	97
6.10	Other Services .....	98
6.11	Packet Filter Considerations .....	99
6.11.1	TCP Services .....	99
6.11.2	UDP Services .....	100
6.11.3	Performance Tuning .....	101
<b>7</b>	<b>Unicast Routing Basics .....</b>	<b>103</b>
7.1	Hosts and ICMPv6 Redirects .....	103
7.2	Inside IPv6: ICMPv6 Redirect Protocol Details .....	104
7.3	Static Routing .....	106
7.4	Dynamic Routing with RIPng .....	108
7.5	Testing and Debugging .....	110
7.6	Inside IPv6: RIPng Protocol Details .....	111
7.7	Routing Architecture Strategies .....	112
7.7.1	Basic Considerations .....	112
7.7.2	Static or Dynamic Routing? .....	113
7.7.3	Network Redundancy .....	113
7.7.4	Router Performance Issues .....	115
7.7.5	Performance Issues with ICMPv6 Redirects .....	115
7.7.6	Inconsistent Prefix Advertisements .....	116
7.7.7	Security Aspects .....	117
7.8	Mixing Static and Dynamic Routing .....	118
7.9	Inside IPv6: Maximum Transmission Unit (MTU) Improvements .....	120
7.10	Packet Filter Considerations .....	120

7.10.1	Source Address Validation (Ingress Filtering).....	121
7.10.2	Forwarding Filter Rules .....	122
7.10.3	Dealing with ICMPv6 Redirects .....	123
7.10.4	Packet Filters and Dynamic Routing .....	123

---

## Part II IPv4/IPv6 Interoperation

---

<b>8</b>	<b>Interoperation Concepts .....</b>	<b>127</b>
8.1	Dual Stack Configuration and Operation .....	127
8.2	Interoperation Problems .....	128
8.3	Dual Stack Everything .....	128
8.4	Dual Stack Servers Only.....	128
8.5	Connecting to Foreign IPv4-only Servers .....	129
8.6	Packet Filter Considerations .....	129
<b>9</b>	<b>Application Level Gateways .....</b>	<b>131</b>
9.1	Domain Name Service (DNS) .....	131
9.2	Network Time Protocol (NTP) .....	131
9.3	Syslog .....	132
9.4	Simple Mail Transfer Protocol (SMTP).....	132
9.5	Hypertext Transfer Protocol (HTTP) .....	132
9.6	Packet Filter Considerations .....	133
<b>10</b>	<b>Protocol Translation .....</b>	<b>135</b>
10.1	Protocol Translation Concepts .....	135
10.2	Setting Up a Protocol Translator .....	136
10.3	Operational Issues .....	139
10.4	Packet Filter Considerations .....	140

---

## Part III Tunnels and Related Topics

---

<b>11</b>	<b>Tunnel Basics.....</b>	<b>143</b>
11.1	Concepts and Terminology.....	143
11.2	Tunnel Types .....	144
11.3	Common Scenarios .....	145
11.4	Operational Issues .....	145
11.5	Security Considerations .....	146
11.6	Choosing the Proper Tunnel .....	147
<b>12</b>	<b>IP-in-IP Encapsulation .....</b>	<b>149</b>
12.1	Configured and Automatic (6in4) Tunnels .....	150
12.1.1	The Link-local Address Problem.....	151
12.1.2	Configured Tunnels .....	151

12.1.3	Routing Through a Tunnel	156
12.1.4	Automatic Tunnels	158
12.1.5	Security Considerations	159
12.2	6to4 Tunnels	159
12.2.1	6to4 Tunnel Hosts	160
12.2.2	Tunnels Between 6to4 Sites	162
12.2.3	Tunnels Between 6to4 and Native IPv6 Sites	163
12.2.4	Connecting to the Internet6: Default Relay Routers	165
12.2.5	Public Relay Routers	166
12.2.6	Operational Issues	167
12.2.7	Security Considerations	169
12.3	Tunneling Over IPv6 Networks	170
12.3.1	IPv4-in-IPv6 (4in6) Encapsulation	170
12.3.2	IPv6 in IPv6 (6in6) Encapsulation	172
12.4	6over4 Tunnels	176
12.5	The Intra-site Automatic Tunnel Addressing Protocol (ISATAP)	177
12.6	Packet Filter Considerations	177
12.6.1	Fundamental Problems	178
12.6.2	Manageable Special Cases	178
12.6.3	Configurations	179
<b>13</b>	<b>Other Tunneling Methods</b>	<b>181</b>
13.1	GRE	181
13.2	Teredo	182
13.3	OpenVPN	183
13.4	Packet Filter Considerations	187
<b>14</b>	<b>Advanced Tunneling Issues</b>	<b>189</b>
14.1	Tunnel Brokers	189
14.2	Tunnels and NAT Gateways	190
14.2.1	Strategies	191
14.2.2	Configurations	191
14.3	Nested Tunnels and Tunnel Loops	193
14.3.1	Network Meltdown from a Tunnel Loop	193
14.3.2	Tunnel Loop Causes	194
14.3.3	Preventing Tunnel Loops	194
14.4	Tunnel Parameter Tuning	195
14.4.1	The Maximum Transmission Unit (MTU)	195
14.4.2	Hop Limit and Time to Live (TTL) Parameters	196
14.5	Mixing Tunnels and Native Connectivity	197

<b>15</b>	<b>The Point-to-Point Protocol (PPP)</b>	199
15.1	Implementations and Installation	199
15.2	Basic Configuration	200
15.3	Adding Routable Addresses and Static Routes	202
15.4	Dynamic Routing Across PPP Links	204
15.5	PPP and Autoconfiguration	205
15.6	Beyond a Single Interface: Operational Issues	206
15.7	Packet Filter Considerations	207

---

## Part IV Additional Base Features

---

<b>16</b>	<b>More on Addresses</b>	211
16.1	Site-local and Unique-local Addresses	211
16.1.1	From Site-local to Unique-local Addresses	211
16.1.2	What is a “Site”?	212
16.1.3	When to Use Unique-local Addresses	212
16.1.4	Routing Configuration	213
16.1.5	DNS Setups	213
16.2	IPv4-mapped IPv6 Addresses	214
16.2.1	Making an IPv6 Server Support IPv4	214
16.2.2	Operational Aspects	215
16.3	Dynamically Changing Interface IDs	216
16.3.1	The “Road Warrior” Problem	216
16.3.2	Temporary Addresses	216
16.3.3	Performance Considerations	217
16.3.4	Configuration and Operation	218
16.3.5	Using Temporary Addresses	219
16.4	Address Selection Algorithms	220
16.4.1	The Address Selection Policy Table	221
16.4.2	Source Address Selection	221
16.4.3	Destination Address Ordering	222
16.4.4	Tuning the Policy Table	222
16.5	Stateless Autoconfiguration Tuning	223
16.5.1	Tuning the Advertising Interval	225
16.5.2	Per-interface Information	226
16.5.3	Subnet Prefix Information	228
16.5.4	Expiring a Prefix From a Subnet	230
16.6	The Router Renumbering Protocol	231
<b>17</b>	<b>Advanced Routing with Quagga</b>	233
17.1	The Quagga Routing Framework	233
17.1.1	Features and Peculiarities	233
17.1.2	Supported Routing Protocols	235
17.1.3	Installing Quagga	235

17.1.4	Using the Virtual Terminal Interface . . . . .	239
17.1.5	Interface and Static Route Configurations . . . . .	240
17.1.6	Router Advertisements . . . . .	241
17.1.7	Debugging Capabilities . . . . .	241
17.2	RIPng Revisited . . . . .	242
17.2.1	Enabling RIPng Support with Quagga . . . . .	242
17.2.2	Limited Route Distribution . . . . .	243
17.2.3	Metric Tuning . . . . .	244
17.2.4	Route Aggregation . . . . .	245
17.2.5	Non-standard Timing Parameters . . . . .	245
17.3	Open Shortest Path First (OSPF), version 3 . . . . .	246
17.3.1	Features and Limitations . . . . .	246
17.3.2	Basic Concepts . . . . .	247
17.3.3	Essential Configuration . . . . .	247
17.3.4	A Simple Test Setup . . . . .	249
17.3.5	Understanding OSPF Status Information . . . . .	250
17.3.6	Timing Considerations . . . . .	252
17.3.7	Failover Tests . . . . .	254
17.3.8	The Cost Metric . . . . .	255
17.3.9	Scalability, OSPF Areas and Route Aggregation . . . . .	256
17.3.10	Other OSPF Features and Further Reading . . . . .	259
17.3.11	Operational Issues . . . . .	259
17.4	Beyond RIP and OSPF . . . . .	260
17.4.1	The Border Gateway Protocol (BGP) . . . . .	260
17.4.2	Other Routing Protocols . . . . .	261
17.4.3	IPv6-independent Quagga Features . . . . .	261
17.5	Packet Filter Considerations . . . . .	262
<b>18</b>	<b>Multicasts Beyond the Link-local Scope . . . . .</b>	<b>263</b>
18.1	A Closer Look at Multicasts . . . . .	263
18.1.1	Terminology . . . . .	263
18.1.2	Multicast Diagnostics . . . . .	264
18.1.3	Inside IPv6: Multicast Listener Discovery (MLD) . . . . .	266
18.2	Protocol Independent Multicast—Dense Mode (PIM-DM) . . . . .	271
18.2.1	Installation . . . . .	271
18.2.2	Essential Configurations: Filters . . . . .	272
18.2.3	Inside IPv6: More on Multicast Listener Discovery . . . . .	273
18.2.4	Inside IPv6: The PIM-DM Protocol . . . . .	275
18.2.5	Advantages and Limitations . . . . .	277
18.3	Protocol Independent Multicast—Sparse Mode (PIM-SM) . . . . .	278
18.3.1	Installation and Basic Configuration . . . . .	278
18.3.2	Bootstrap Routers . . . . .	280
18.3.3	Running PIM-SM . . . . .	281
18.3.4	Inside IPv6: The PIM-SM Protocol . . . . .	282
18.3.5	Source-specific Multicasts (SSM) . . . . .	283

18.3.6	Embedded Rendezvous Point Addresses .....	284
18.4	Multicast Address Allocation .....	285
18.5	Operational Issues .....	286
18.6	Packet Filter Considerations .....	287
18.7	Advanced Topics and Further Reading .....	288
<b>19</b>	<b>The Dynamic Host Configuration Protocol (DHCPv6) .....</b>	<b>289</b>
19.1	Installation .....	289
19.2	Stateless DHCPv6 .....	291
19.2.1	The First Step: Resolver Configuration .....	291
19.2.2	Adding More Stateless Data .....	293
19.3	Address Management with DHCPv6 .....	294
19.4	DHCPv6 Across Subnet Borders .....	295
19.4.1	Setting Up a DHCP Relay .....	295
19.4.2	Multicasts from Relay to Server .....	296
19.5	Interoperation Problems .....	297
19.6	Conceptual Security Aspects .....	297
19.7	Packet Filter Considerations .....	298
<b>20</b>	<b>Bridging the DNS Gap .....</b>	<b>299</b>
20.1	From Autoconfiguration to the DNS .....	299
20.2	Solution Strategies .....	299
20.2.1	“But Only Servers Need DNS Entries” .....	300
20.2.2	Manual DNS Entries .....	300
20.2.3	The DHCP Non-solution .....	300
20.2.4	Dynamic DNS (DDNS) Updates .....	301
20.3	A Preliminary Implementation .....	301
20.3.1	Configuring BIND for Dynamic Updates .....	302
20.3.2	Creating and Installing TSIG Keys .....	303
20.3.3	Updating the DNS Forward Zone Records .....	304
20.3.4	Maintaining DNS Reverse Zones .....	304
20.3.5	Security Considerations .....	305
20.4	Operational Issues .....	306
20.5	Future Work .....	307

---

## Part V New Functionalities

---

<b>21</b>	<b>IP Security (IPsec) .....</b>	<b>311</b>
21.1	Basic Concepts .....	311
21.1.1	Authentication and Encryption .....	311
21.1.2	Transport and Tunnel Mode .....	312
21.1.3	Policy and Key Management Within the Kernel .....	312
21.1.4	The Internet Key Exchange Protocol (IKE) .....	313
21.1.5	References .....	314

21.2	Open Problems .....	315
21.2.1	Inherent Limitations .....	315
21.2.2	Implementation Issues .....	316
21.3	Packet Filter Considerations .....	317
<b>22</b>	<b>Mobile IPv6 (MIPv6) .....</b>	<b>319</b>
22.1	Concepts .....	319
22.1.1	Basic Mobile IPv6 .....	319
22.1.2	Telling the Home Agent: Binding Updates .....	321
22.1.3	Bidirectional Tunneling and Route Optimization .....	321
22.1.4	Network Mobility (NEMO) .....	322
22.1.5	Fast Handovers .....	323
22.1.6	Hierarchical Mobile IPv6 .....	323
22.2	Open Problems .....	323
22.2.1	Available Implementations .....	324
22.2.2	Unanswered Security Questions .....	324
22.3	Further Reading .....	325
<b>23</b>	<b>Quality of Service (QoS) .....</b>	<b>327</b>
23.1	Concepts .....	327
23.1.1	Integrated Services (IntServ) .....	328
23.1.2	Differentiated Services (DiffServ) .....	328
23.2	Is It Necessary? .....	329
23.2.1	Technical Considerations .....	329
23.2.2	Political and Economic Aspects .....	330
23.2.3	Common Misunderstandings .....	330
23.3	Further Reading .....	331

---

## Part VI Architectural and Operational Topics

---

<b>24</b>	<b>Renumbering Procedures .....</b>	<b>335</b>
24.1	Preparations .....	335
24.2	Soft Renumberings with a Grace Period .....	336
24.2.1	Deploying a New Prefix .....	336
24.2.2	Revoking an Old Prefix .....	338
24.3	Emergency Renumberings .....	339
24.4	Changing the Internet Service Provider .....	339
<b>25</b>	<b>Multi-homing .....</b>	<b>341</b>
25.1	Multi-homed Networks .....	341
25.1.1	Life Without Provider-independent Addresses .....	341
25.1.2	Redundant Links to a Single Provider .....	342
25.1.3	Non-redundant Links to Multiple Providers .....	343
25.1.4	Redundant Internet Connectivity .....	344

25.2 Multi-homed Hosts .....	346
<b>A Crash Course: DNS &amp; BIND .....</b>	<b>349</b>
A.1 Domain Name System (DNS) Basics .....	349
A.2 The BIND Name Server .....	350
A.2.1 Installation .....	350
A.2.2 Base Configuration .....	351
A.2.3 Forwarder Configuration and Fake Root Zones .....	352
A.2.4 Starting the Name Server .....	352
A.2.5 Adding Forward Zones .....	353
A.2.6 Adding Reverse Zones .....	354
A.2.7 Secondary Servers .....	355
A.2.8 Restarting the Server .....	355
A.2.9 Testing and Debugging .....	356
A.2.10 Zone Delegations .....	356
A.3 Common Pitfalls .....	356
<b>B Assigned Numbers and Addresses .....</b>	<b>359</b>
B.1 Addresses and Address Prefixes .....	359
B.1.1 Unicast Addresses .....	359
B.1.2 Multicast Addresses .....	360
B.1.3 Multicast Scopes .....	360
B.1.4 Anycast and Other Special Interface IDs .....	360
B.2 Transport Layer Port Numbers .....	361
B.2.1 TCP .....	361
B.2.2 UDP .....	361
B.3 ICMPv6 Types .....	362
B.4 Protocol Numbers in Next Header Field .....	362
B.5 Ethernet .....	363
B.5.1 Ethernet Types .....	363
B.5.2 Ethernet Addresses .....	363
<b>References .....</b>	<b>365</b>
<b>Index .....</b>	<b>371</b>

<http://www.springer.com/978-3-540-24524-7>

IPv6 in Practice

A Unixer's Guide to the Next Generation Internet

Stoekelbrand, B.

2007, XXII, 390 p. 50 illus., Hardcover

ISBN: 978-3-540-24524-7
