|--|-------------|
| Abbreviations | xiii |
| Summary | xv |
| 1 Introduction and Background | 1 |
| 1.1 Persistent organic pollutants (POPs): occurrence and effects | 1 |
| 1.2 Legal instruments and measures to control POPs | 3 |
| 1.3 Approaches in POPs modelling | 7 |
| 1.4 POPs fate in the aquatic environment | 9 |
| 1.5 Objectives and outline of this study | 11 |
| 2 The Fate and Transport Ocean Model (FANTOM): | |
| Model Description | 13 |
| 2.1 Transport with ocean currents | 14 |
| 2.2 Air–sea exchange | 15 |
| 2.2.1 Gaseous air–sea exchange | 16 |
| 2.2.2 Dry particle deposition | 18 |
| 2.2.3 Wet deposition | 20 |
| 2.3 Phase distribution | 20 |
| 2.3.1 Particulate organic carbon content | 21 |
| 2.3.2 Fraction bound to particulate organic carbon | 23 |
| 2.4 Degradation in sea water | 25 |
| 3 FANTOM: Model Setup | 27 |
| 3.1 Model Area | 28 |
| 3.2 Ocean circulation | 29 |
| 3.3 Pollutant selection | 30 |
| 3.3.1 Gamma–hexachlorocyclohexane (γ -HCH) | 31 |
| 3.3.2 Alpha–hexachlorocyclohexane (α -HCH) | 33 |
| 3.3.3 Polychlorinated biphenyl 153 | 34 |
| 3.4 Initial and boundary conditions | 35 |
| 3.4.1 Initialisation | 36 |
| 3.4.2 Oceanic boundary conditions | 36 |
| 3.4.3 River loads | 36 |
| 3.4.4 Atmospheric boundary conditions | 37 |
| 3.4.5 Data compilation and quality | 37 |

| | | |
|----------|--|-----------|
| 4 | FANTOM: Model Evaluation..... | 41 |
| 4.1 | Data used for model evaluation..... | 41 |
| 4.2 | Comparison between modelled and measured concentrations of γ -HCH..... | 42 |
| 4.3 | Comparison between modelled and measured concentrations of α -HCH..... | 48 |
| 4.4 | Comparison between modelled and measured concentrations of PCB 153..... | 52 |
| 4.5 | Uncertainty and sensitivity analysis..... | 56 |
| 4.5.1 | Experiments with γ -HCH..... | 56 |
| 4.5.2 | Experiments with α -HCH..... | 58 |
| 5 | Occurrence and Pathways of Selected POPs in the North Sea..... | 61 |
| 5.1 | Uptake of γ -HCH, α -HCH and PCB 153 by particulate matter in sea water..... | 62 |
| 5.1.1 | Distribution of particulate organic carbon in the North Sea..... | 62 |
| 5.1.2 | Fraction of γ -HCH, α -HCH and PCB 153 on particulate organic carbon in sea water..... | 64 |
| 5.1.3 | γ -HCH, α -HCH and PCB 153 content in the liver of the North Sea flatfish dab (<i>Limanda limanda</i>)..... | 66 |
| 5.2 | Spatial and temporal distribution of γ -HCH, α -HCH and PCB 153 in sea water..... | 69 |
| 5.2.1 | γ -HCH horizontal and vertical distributions..... | 69 |
| 5.2.2 | α -HCH horizontal and vertical distributions..... | 70 |
| 5.2.3 | PCB 153 horizontal and vertical distributions..... | 71 |
| 5.3 | α -HCH to γ -HCH ratio in sea water..... | 72 |
| 6 | Contribution of Individual Processes to the Cycling of Selected POPs in the North Sea..... | 77 |
| 6.1 | Mass budgets of γ -HCH, α -HCH and PCB 153 in the North Sea..... | 77 |
| 6.1.1 | Mass budget analysis for γ -HCH..... | 79 |
| 6.1.2 | Mass budget analysis for α -HCH..... | 80 |
| 6.1.3 | Mass budget analysis for PCB 153..... | 82 |
| 6.2 | Residence time of γ -HCH, α -HCH and PCB 153 in sea water..... | 83 |
| 6.3 | Relative importance of some key processes for the fate of POPs in sea water..... | 85 |
| 6.3.1 | The role of air–sea exchange, degradation, river and oceanic inflow..... | 85 |
| 6.3.2 | “Everything but one process” scenario analysis for γ -HCH..... | 86 |
| 6.3.3 | “Everything but one process” scenario analysis for α -HCH..... | 87 |
| 6.3.4 | “Everything but one process” scenario analysis for PCB 153..... | 87 |
| 6.3.5 | The role of temperature and wind speed in the air–sea gaseous exchange..... | 88 |
| 7 | Conclusions and Outlook..... | 91 |
| 7.1 | Conclusions..... | 91 |

| | |
|-----------------------------|------------|
| 7.2 Outlook | 94 |
| Tables | 97 |
| Figures..... | 103 |
| List of Symbols..... | 119 |
| References | 123 |

The Fate of Persistent Organic Pollutants in the North
Sea

Multiple Year Model Simulations of g-HCH, a-HCH and
PCB 153

Ilyina, T.P.

2007, XVI, 132 p. 48 illus., 16 illus. in color., Softcover

ISBN: 978-3-540-68162-5
