<b>Preface</b> .....	V
<b>Introduction</b> .....	XI
<b>1 Estimates for analytic functions bounded with respect to their real part</b> .....	1
1.1 Introduction .....	1
1.2 Different proofs of the real-part theorem .....	2
1.3 Extremal values of the real part of the rotated Schwarz kernel .....	6
1.4 Upper estimate of $\Re\{e^{i\alpha}\Delta f\}$ by the supremum of $\Re\Delta f$ .....	8
1.5 Two-sided estimates of $\Re\{e^{i\alpha}\Delta f\}$ by upper and lower bounds of $\Re\Delta f$ .....	11
1.6 Inequalities for the modulus, real and imaginary parts .....	12
1.7 Variants and extensions .....	14
<b>2 Estimates for analytic functions with respect to the <math>L_p</math>-norm of <math>\Re\Delta f</math> on the circle</b> .....	17
2.1 Introduction .....	17
2.2 Estimate of $ \Re\{e^{i\alpha}\Delta f\} $ by the $L_p$ -norm of $\Re\Delta f$ on the circle. General case .....	19
2.3 The cases $p = 1$ and $p = 2$ .....	23
2.4 The case $p = \infty$ .....	25
2.5 Generalization of the Carathéodory and Plemelj inequality .....	30
2.6 Variants and extensions .....	33
<b>3 Estimates for analytic functions by the best <math>L_p</math>-approximation of <math>\Re f</math> on the circle</b> .....	37
3.1 Introduction .....	37
3.2 Estimate of $ \Re\{e^{i\alpha}\Delta f\} $ by the $L_p$ -norm of $\Re f - c$ on the circle. General case .....	39

3.3	The cases $p = 1$ and $p = 2$ .....	42
3.4	The case $p = \infty$ .....	43
3.5	Inequalities for the real and imaginary parts .....	49
3.6	Estimate for the oscillation of $\Re\{e^{i\alpha}f\}$ and its corollaries .....	51
3.7	Variants and extensions .....	53
<b>4</b>	<b>Estimates for directional derivatives of harmonic functions</b> .....	57
4.1	Introduction .....	57
4.2	Interior estimates for derivatives in a domain .....	58
4.3	Estimates for directional derivatives with constant direction...	61
4.4	Estimates for directional derivatives with varying direction ...	63
<b>5</b>	<b>Estimates for derivatives of analytic functions</b> .....	69
5.1	Introduction .....	69
5.2	Estimate for $ f^{(n)}(z) $ by $\ \Re\{f - \mathcal{P}_m\}\ _p$ . General case .....	73
5.3	Estimate for $ f^{(n)}(0) $ by $\ \Re\{f - \mathcal{P}_m\}\ _p$ .....	75
5.4	The case $p = 1$ and its corollaries .....	77
5.4.1	Explicit estimate in the case $p = 1$ .....	77
5.4.2	Hadamard's real-part theorem for derivatives .....	78
5.4.3	Landau type inequality .....	81
5.4.4	Generalization of the Landau inequality .....	84
5.4.5	Generalization of the Carathéodory inequality .....	86
5.5	The case $p = 2$ .....	87
5.6	The case $p = \infty$ .....	92
5.7	Variants and extensions .....	94
<b>6</b>	<b>Bohr's type real part estimates</b> .....	99
6.1	Introduction .....	99
6.2	Estimate for the $l_q$ -norm of the Taylor series remainder by $\ \Re f\ _1$ .....	101
6.3	Other estimates for the $l_q$ -norm of the Taylor series remainder .....	103
6.4	Bohr's type theorems .....	109
6.5	Variants and extensions .....	111
<b>7</b>	<b>Estimates for the increment of derivatives of analytic functions</b> .....	115
7.1	Introduction .....	115
7.2	Estimate for $ \Delta f^{(n)}(z) $ by $\ \Re\{f - \mathcal{P}_m\}\ _p$ . General case .....	116
7.3	The case $p = 1$ and its corollaries .....	118
7.3.1	Explicit estimate in the case $p = 1$ .....	118
7.3.2	Hadamard-Borel-Carathéodory type inequality for derivatives .....	119

7.3.3	Landau type inequalities . . . . .	121
7.3.4	Carathéodory type inequality . . . . .	124
7.4	The cases $p = 2$ and $p = \infty$ . . . . .	125
<b>References</b> . . . . .		129
<b>Index</b> . . . . .		135
<b>List of Symbols</b> . . . . .		139

Sharp Real-Part Theorems

A Unified Approach

Kresin, G.; Maz'ya, V. - Shaposhnikova, T. (Ed.)

2007, XV, 145 p., Softcover

ISBN: 978-3-540-69573-8
