

# Table of Contents

<b>Preface</b> .....	V
<b>List of Contributors</b> .....	VII
<b>1 Introduction to Human-Centered Visualization Environments</b> <i>A. Kerren, A. Ebert, and J. Meyer</i> .....	1

---

## Part I. Fundamental Principles and Methods

---

<b>2 Human-Centered Aspects</b> <i>O. Kulyk, R. Kosara, J. Urquiza, and I. Wassink</i> .....	13
2.1 Human-Centered Approach .....	13
2.2 Usability in Human-Centered Design .....	14
2.2.1 Defining Usability .....	15
2.2.2 Evaluating Usability .....	20
2.2.3 Improving Usability .....	20
2.2.4 Usability and Information Overload .....	24
2.3 User Aims and Requirements .....	28
2.3.1 Characteristics of Good Visualizations and User Interfaces .....	29
2.3.2 Essential Elements of Successful Visualization .....	30
2.3.3 Dimensions in Visualization .....	31
2.3.4 Steps in Visualization Design .....	32
2.3.5 The Design Cycle .....	33
2.3.6 User Analysis .....	34
2.3.7 User Requirements .....	42
2.3.8 Task Analysis .....	43
2.3.9 Task Modeling .....	48
2.3.10 Designing for and with Users .....	50
2.4 Evaluation of Visualization Environments .....	52
2.4.1 Human-Centered Evaluation in Visualization Practice ....	52
2.4.2 Evaluation Methods .....	56
2.4.3 Designing Experiments .....	59

2.4.4	Challenges in Evaluation of Collaborative Visualization Environments . . . . .	64
2.5	User Studies and a Science of Visualization . . . . .	66
2.5.1	Survey of Information Visualization Studies . . . . .	66
2.5.2	The Future of User Studies . . . . .	71
2.6	Chapter Notes . . . . .	74
<b>3</b>	<b>Interacting with Visualizations</b>	
	<i>W. Fikkert, M. D'Ambros, T. Bierz, and T.J. Jankun-Kelly</i> . . . . .	77
3.1	Interaction . . . . .	77
3.1.1	Describing Interaction . . . . .	78
3.1.2	Defining Interaction . . . . .	83
3.2	Influences of Display Technologies . . . . .	85
3.2.1	Survey of Display Technologies . . . . .	86
3.2.2	Scales of Interaction . . . . .	88
3.2.3	Display Interaction Modalities and Media . . . . .	91
3.2.4	Interfaces and Usability for Novel Displays . . . . .	97
3.2.5	Display Device Challenges in Visualization . . . . .	102
3.3	Multimodal Interaction . . . . .	103
3.3.1	Unimodality Versus Multimodality . . . . .	105
3.3.2	Issues to Deal with in Multimodal Interaction . . . . .	108
3.3.3	Myths of Multimodality . . . . .	110
3.3.4	Survey of Enabling Technologies . . . . .	111
3.3.5	Overview of Approaches to Multimodal Interaction . . . . .	124
3.3.6	Enabling Multimodal Interaction . . . . .	131
3.4	Visualizations in Multi-party Environments . . . . .	132
3.4.1	Collaborating with Visualizations . . . . .	133
3.4.2	Models for Distributed Collaborative Visualization . . . . .	137
3.4.3	Evaluation Criteria . . . . .	144
3.4.4	Survey of Collaborative Visualization Systems . . . . .	146
3.4.5	Challenges for Multi-party Visualizations . . . . .	159
3.5	Chapter Notes . . . . .	160
<b>4</b>	<b>Visual Representations</b>	
	<i>C. Görg, M. Pohl, E. Qeli, and K. Xu</i> . . . . .	163
4.1	Perceptual and Cognitive Issues . . . . .	164
4.1.1	The Visualization Process . . . . .	164
4.1.2	Types of Data . . . . .	165
4.1.3	Preattentive Processing . . . . .	166
4.2	Information Visualization Criteria and Metaphors . . . . .	170
4.2.1	Information Visualization Criteria . . . . .	171
4.2.2	Metaphors . . . . .	173
4.3	Multivariate Visualization Techniques . . . . .	177
4.3.1	Low-Dimensional Data Visualization . . . . .	177
4.3.2	Multidimensional Data Visualization . . . . .	180
4.3.3	Usability Issues on Multidimensional Data Visualization . . . . .	188

4.4	Graphs and Trees	189
4.4.1	Applications	190
4.4.2	Background	190
4.4.3	Aesthetics vs. Graph Readability	194
4.4.4	Layout vs. Graph Readability	200
4.4.5	Large Graphs	212
4.4.6	Integrated Graph Drawing	219
4.4.7	Labeling of Graphs	221
4.5	Multiple Views	224
4.5.1	Classification	224
4.5.2	The Design of Multiple Views	227
4.5.3	Interaction	228
4.5.4	Comparison with Integrated Views	228
4.6	Chapter Notes	229
<b>5</b>	<b>Challenges and Unsolved Problems</b>	
	<i>R.S. Laramée, R. Kosara</i>	231
5.1	Classification of Future Challenges and Unsolved Problems in Human-Centered Visualization	233
5.1.1	Human-Centered Challenges	234
5.1.2	Technical Challenges	243
5.1.3	Financial Challenges	249
5.2	Chapter Notes	252
<hr/>		
<b>Part II. Domain-Specific Visualization</b>		
<hr/>		
<b>6</b>	<b>Geographic Visualization</b>	
	<i>M. Nöllenburg</i>	257
6.1	Goals of Geovisualization	258
6.2	Driving Forces of Geovisualization	259
6.3	Cognitive Aspects	261
6.3.1	Visual Thinking	261
6.3.2	Graphic Variables	263
6.4	Visualization Methods and Techniques	264
6.4.1	Geospatial Data	264
6.4.2	2D Cartographic Visualization	265
6.4.3	3D Cartographic Visualization	267
6.4.4	Visual Data Mining Tools	268
6.4.5	Animation	271
6.4.6	Spatio-Temporal Visualization	273
6.4.7	Interactive User Interfaces	276
6.4.8	Combining Visual and Computational Exploration	280

6.5	Geovisualization Tools .....	283
6.6	Usability of Geovisualization Systems .....	285
6.6.1	Involving Users in the Design of Geovisualizations .....	286
6.6.2	Results from User Studies .....	287
6.6.3	Geovisualization to Support Group Work .....	290
6.7	Chapter Notes .....	293
<b>7</b>	<b>Algorithm Animation</b>	
	<i>A. Moreno</i> .....	295
7.1	Overview .....	296
7.2	Users of Algorithm Animation .....	297
7.3	Taxonomies for Algorithm Animation Tools .....	298
7.4	Review of Tools and Their Evaluations .....	301
7.4.1	Concept Keyboards for Algorithm Visualization .....	301
7.4.2	Matrix and MatrixPro .....	302
7.4.3	Alvis and Alvis Live! .....	303
7.4.4	Alice .....	304
7.4.5	Jeliot 3/Jeliot 2000 .....	304
7.4.6	JHAVE .....	306
7.4.7	WinHipe .....	307
7.4.8	User Studies Compilation .....	308
7.5	Chapter Notes .....	308
<b>8</b>	<b>Biomedical Information Visualization</b>	
	<i>M. Lungu, K. Xu</i> .....	311
8.1	Phylogenetic Tree Visualization .....	312
8.1.1	Small Trees – Working in Euclidean Space .....	312
8.1.2	Large Trees – Using Focus and Context .....	314
8.1.3	Very Large Trees – Hyperbolic 3D Space .....	315
8.1.4	Discussion and Further Reading .....	316
8.2	Sequence Alignment .....	316
8.2.1	Sequence Logos .....	317
8.2.2	Editing and Visualizing Sequence Alignment: Jalview .....	319
8.2.3	Vista: Online Visualization of DNA Alignment .....	320
8.2.4	Sequence Walkers .....	321
8.2.5	Dot Plots .....	322
8.2.6	Arc Diagrams .....	323
8.2.7	Discussion and Further Reading .....	324
8.3	Biochemical Network Analysis .....	325
8.3.1	Cytoscape .....	325
8.3.2	Biochemical Pathway Analysis .....	326
8.3.3	Layout for Large Biochemical Networks: LGL .....	329
8.3.4	Discussion and Further Reading .....	330

8.4	Microarray Data Visualization .....	331
8.4.1	TreeView .....	331
8.4.2	Hierarchical Clustering Explorer .....	333
8.4.3	Evaluation of Microarray Visualization Tools .....	334
8.5	Medical Records Visualization .....	335
8.5.1	LifeLines: Visualizing Patient Temporal Data .....	336
8.5.2	The Cube: Multidimensional Analysis of Medical Records .....	336
8.5.3	Visualizing Medical Practice Guidelines and Protocols ...	338
8.6	Chapter Notes .....	339
<b>Bibliography</b> .....		343
<b>Author Index</b> .....		395
<b>Index</b> .....		397

Human-Centered Visualization Environments  
GI-Dagstuhl Research Seminar, Dagstuhl Castle,  
Germany, March 5-8, 2006, Revised Papers  
Kerren, A.; Ebert, A.; Meyer, J. (Eds.)  
2007, XIX, 403 p., Softcover  
ISBN: 978-3-540-71948-9
