

About the authors

Dejan Milutinović received his Dipl. Ing. (1995) and M.Sc. (1999) in Electrical Engineering at the University of Belgrade, Serbia, Yugoslavia, and PhD in Electrical and Computer Engineering (2004) at Instituto Superior Técnico, Lisbon Technical University, Portugal.

In 1995 he was employed at "Mihajlo Pupin" Institute, Belgrade, working on real-time control industrial applications. In 2000 he moved to the Institute of Systems and Robotics, Lisbon, where he worked on his PhD thesis. From 2004 to 2006 he was a post-doc at Theoretical Biology Department of Utrecht University, the Netherlands. Presently, he is a post-doc at Biostatistics and Bioinformatics Department of Duke University Medical Center, NC, USA.

His scientific interest is in the area of modeling and control of stochastic dynamical systems applied to the immune system and Robotics. In 2005, he was recognized as a runner-up for the best PhD thesis of European Robotics by the European Robotics Research Network (EURON) jury in the 5th edition of Georges Giralt PhD Award.

Pedro Lima got his Ph.D. (1994) in Electrical Engineering at the Rensselaer Polytechnic Institute, Troy, NY, USA. Currently, he is an Associate Professor at Instituto Superior Técnico, Lisbon Technical University. He is also a member of the Institute for Systems and Robotics, a Portuguese private research institution, where he is co-coordinator of the Intelligent Systems group and a member of the Scientific Council.

Pedro Lima is a Trustee of the RoboCup Federation, and was the General Chair of RoboCup2004, held in Lisbon. He is a member of the editorial board of the International Journal of Advanced Robotic Systems and of the Portuguese magazine Robótica, a founding member of the Portuguese Robotics Society, the elected chair of the IEEE RAS Portugal Chapter, and a senior member of the IEEE. He is also the co-editor of two special issues of the IEEE Robotics and Automation Magazine, one special issue of Elsevier's Journal of Robotics Autonomous Systems, the author of a book and several journal and conference papers.

His scientific interests are in the areas of hybrid systems, discrete event systems and reinforcement learning, mainly in their applications to complex large-scale systems, such as multi-robot systems. He has also been very active in the promotion of Science and Technology to the society, through the organization of Robotics events in Portugal, including the Portuguese Robotics Open since 2001.
