

Contents

List of Abbreviations	XI
------------------------------------	-----------

1 Introduction	1
1.1 Motivation and Objectives	1
1.2 Approach and Dissertation Outline.....	4
2 Production Network Design and Specialty Chemicals	7
2.1 Supply Chain Management and Production Network Design	7
2.1.1 Supply Chains and Production Networks	7
2.1.2 Production Network Design.....	9
2.1.3 Production Network Design and Advanced Planning Systems	12
2.1.4 Generic Production Network Design Strategies	14
2.2 Production Network Design and Industrial Location Science ...	19
2.2.1 Introduction to Industrial Location Science.....	19
2.2.2 Major Findings from Industrial Location Science	21
2.3 Specialty Chemicals Production	24
2.3.1 Process Industries, Chemical Industry and Specialty Chemicals.....	24
2.3.2 Chemical Production Sites	27
2.3.3 Production Technologies in Chemical Industry	29
2.3.4 Specialty Chemicals Production Networks.....	31
2.4 Production Network Planning and Controlling.....	35
2.4.1 Production Network Planning Process.....	35
2.4.2 Problem Definition Phase	39
2.4.3 Production Network Optimization Phase.....	43
2.4.4 Site Selection Phase	45
2.4.5 Integration of Production Network Design into Strategic Planning	47

3	Global Production Network Optimization	51
3.1	Location Analysis and Production Network Optimization	51
3.2	Review of Supply Network Optimization Literature	53
3.2.1	Classification of Supply Network Optimization Models ...	54
3.2.2	Review of Individual Publications	58
3.3	Modeling Specialty Chemicals Production Networks	64
3.3.1	General Model Characteristics	64
3.3.2	Objective Function	67
3.3.3	Capacity Selection, Expansion and Reduction	72
3.3.4	Plant Loading and Economies of Scale and Scope	76
3.3.5	Specific Factors of Global Production Networks	79
3.3.6	Single Sourcing	88
3.3.7	Product Transfers	89
3.3.8	Other Model Features	89
3.4	Mathematical Optimization Model	89
3.4.1	Model Notation	90
3.4.2	Model Formulation	95
3.4.3	Model Extensions	106
3.4.4	Accounting for Uncertainty: Robust Production Network Design	115
3.5	Numerical Performance	123
4	Evaluation of Individual Production Sites	127
4.1	Introduction to Multiple Criteria Decision Analysis	128
4.1.1	Classification of MCDA Methods	128
4.1.2	Common Steps of MADA Methods	130
4.2	Traditional MADA Methods	135
4.2.1	Simple Additive Weighting and Simple Scoring	135
4.2.2	Analytic Hierarchy Process	137
4.3	Outranking Approaches	141
4.3.1	ELECTRE	141
4.3.2	PROMETHEE	143
4.4	Data Envelopment Analysis	147
4.5	A Specialty Chemicals Site Assessment Model	151
4.5.1	Choice of Method	152
4.5.2	The AHP Site Assessment Model	153
4.5.3	Lessons Learned from Application Case Studies	160
5	Case Study Production Network Optimization	163
5.1	Developing a Decision Support Tool for Strategic Network Design	164
5.1.1	Industry Requirements	164

5.1.2	Structure of the Decision Support Tool	164
5.2	Creating the Value Chain Model	166
5.2.1	Mapping the Current Value Chain Configuration.....	166
5.2.2	Aggregating Demand and Product Data	169
5.2.3	Identifying Cost Drivers for Operating Expenditures.....	170
5.2.4	Identifying Alternative Value Chain Configuration Options.....	176
5.3	Establishing and Forecasting External Parameters	179
5.3.1	General Considerations.....	179
5.3.2	Investment Expenditures.....	179
5.3.3	Transportation Costs	180
5.3.4	Personnel Costs.....	181
5.3.5	Exchange Rates.....	183
5.4	Performing Analyses and Evaluating Results Obtained	183
5.4.1	Assessing Alternative Scenarios	184
5.4.2	Analyzing Network Configuration Alternatives	186
5.4.3	Integrating Parameter Scenarios and Configuration Alternatives.....	188
5.4.4	Standardized Evaluation Reports.....	189
5.5	Selected Findings from the Pilot Application.....	193
5.5.1	Reproducing the Status Quo to Obtain a Baseline	193
5.5.2	Assessing Alternative Environmental Scenarios	193
5.5.3	Assessing Configuration Alternatives.....	195
6	Conclusion	197
Appendix.....	201
Appendix 1:	Derivation of Discount Rate	201
Appendix 2:	Tariff Regulations	203
Appendix 3:	Political Risk.....	205
References.....	209
