

Contents

Chapter 1 Petrophysical Rock Properties

1.1 Introduction	1
1.2 Porosity	1
1.3 Permeability	6
1.4 Pore Size and Fluid Saturation	10
1.5 Relative Permeability	20
1.6 Summary	25
References	26

Chapter 2 Rock-Fabric Classification

2.1 Introduction	29
2.2 Pore Space Terminology and Classification	30
2.3 Rock Fabric/Petrophysical Classification	33
2.3.1 Classification of Interparticle Pore Space	33
2.3.2 Classification of Vuggy Pore Space	36
Separate-Vug Pore Space	37
Touching-Vug Pore Space	38
2.4 Rock-Fabric/Petrophysical Relationships	38
2.4.1 Interparticle Porosity/Permeability Relationships	38
Limestone Rock Fabrics	38
Dolostone Rock Fabrics	43
Limestone and Dolomite Comparison	46
Permeability Estimation	48
2.4.2 Rock-Fabric/Porosity/Water Saturation Relationships	50
2.4.3 Rock-Fabric/Petrophysical Classes	53
2.4.4 Petrophysics of Separate-Vug Pore Space	55
2.4.5 Petrophysics of Touching-Vug Pore Space	59
2.5 Summary	62
References	65

Chapter 3 Wireline Logs

3.1 Introduction	69
3.2 Core Description	70
3.3 Core Analysis	71
3.4 Core/Log Calibration	71
3.4.1 Procedures for Core-Log Calibration	72
3.4.2 Gamma-Ray Logs	73
3.4.3 Borehole Environment	76
3.4.4 Neutron-Density Cross-Plot Porosity	76
3.4.5 Lithology	82
3.4.6 Acoustic Logs	84
3.4.7 Resistivity/Induction Logs	91
3.4.8 Formation Imaging Logs	102
3.5 Permeability from Wireline Logs	104
3.6 Initial Water Saturation	105
3.7 Summary	106
References	109

Chapter 4 Depositional Textures & Petrophysics

4.1 Introduction	111
4.2 Properties of Carbonate Sediments	112
4.3 Sequence Stratigraphic Framework	119
4.3.1 High-Frequency Cycles	122
4.3.2 High-Frequency Sequence	129
4.4 Example	133
4.5 Summary	138
References	139

Chapter 5 Reservoir Models for Input into Flow Simulators

5.1 Introduction	143
5.2 Geostatistical Methods	146
5.2.1 Variography	146
5.2.2 Conditional Simulation	148
5.3 Scales of Variability and Average Properties	149
5.4 Lawyer Canyon Reservoir Analog Study	160
5.4.1 Introduction	160
5.4.2 Model Construction	160
5.4.3 Rock-Fabric Flow Units	162
5.4.4 Fluid Flow Experiments	164

5.5 Work Flow for Construction of the Reservoir Model	166
5.6 Summary	176
References	177

Chapter 6 Limestone Reservoirs

6.1 Introduction	181
6.2 Cementation/Compaction/Selective Dissolution	184
6.2.1 Calcium Carbonate Cementation	184
6.2.2 Compaction	187
6.2.3 Selective Dissolution	190
6.2.4 Effects on Petrophysical Properties Distribution	192
6.3 Limestone Reservoir Examples	194
6.3.1 Mississippian Chester Field, Oklahoma, USA	194
6.3.2 Tubarao (Cretaceous) Field, Offshore Brazil	197
6.3.3 Moldic Grainstone, Permian, Guadalupe Mountains, USA ..	202
6.3.4 Idd el Shargi Cretaceous Reservoir, Qatar, Middle East	202
6.3.5 Upper Devonian Reef Buildups, Alberta, Canada	210
References	213

Chapter 7 Dolostone Reservoirs

7.1 Introduction	217
7.2 Dolomitization	218
7.2.1 Hydrologic Models	218
7.2.2 Dolomitization and Petrophysical Properties	220
7.2.3 Distribution of Dolostone	231
7.2.4 Calcitization of Dolomite	233
7.3 Evaporite Mineralization	233
7.3.1 Calcitization of Anhydrite/Gypsum.....	236
7.4 Field Examples – Dolostone/Limestone Reservoirs	237
7.4.1 Red River Reservoirs, Montana and North Dakota	238
7.4.2 Andrews South Devonian Field, West Texas	240
7.4.3 Haradh Section of Ghawar Field.....	243
Vertical succession of depositional textures	243
Rock fabric description and petrophysical properties	243
Calibration of wireline logs	245
Calculation of vertical profiles of petrophysical properties ..	248
Reservoir model construction	248
7.5 Field Examples - Dolostone Reservoirs	249
7.5.1 Seminole San Andres Unit, Gaines County, Texas	250
Vertical succession of depositional textures	251

Rock-fabric descriptions and petrophysical properties	252
Calibration of wireline logs	256
Calculating vertical profiles of petrophysical properties	259
Reservoir model construction	261
Flow simulation model	264
7.5.2 South Wasson Clear Fork	266
Vertical succession of depositional textures	266
Rock-fabric descriptions and petrophysical properties	269
Calibration of wireline logs	272
Calculating vertical profiles	275
Reservoir model construction	276
Flow simulation model	278
7.5.3 Fullerton Clear Fork Reservoir	280
Vertical succession of depositional textures	280
Rock fabric descriptions and petrophysical properties	286
Calibration of wireline logs	288
Calculating vertical profiles of petrophysical properties	291
Full field model construction	293
Flow simulation model	294
References	296

Chapter 8 Touching-Vug Reservoirs

8.1 Introduction	301
8.2 Small-scale dissolution, collapse, and microfracturing	303
8.2.1 Effects on Petrophysical Properties	303
8.2.2 Small-scale touching vug reservoirs	304
South Cowden Grayburg Reservoir	305
8.3 Large-scale dissolution, collapse, and fracturing	309
8.3.1 Effects on Petrophysical Properties Distribution	315
8.3.2 Large-scale touching-vug reservoirs	317
San Andres Fields, West Texas	318
Elk Basin Mississippian Reservoir	321
Ellenburger Lower Ordovician Fields	323
Silurian Reef Fields	327
References	329

Subject Index	333

Carbonate Reservoir Characterization
An Integrated Approach

Lucia, F.J.

2007, XII, 336 p., Hardcover

ISBN: 978-3-540-72740-8
