## Contents

<b>1</b>	<b>A Summary</b>	1
<b>2</b>	<b>Representation Theory</b>	27
2.1	Definitions	27
2.2	Parabolically Induced Representations	34
2.3	Dual Groups	40
2.4	The Local Langlands Correspondence	46
2.5	$P_3$ -Theory	62
2.6	Zeta Integrals	74
<b>3</b>	<b>Paramodular Vectors</b>	85
3.1	Linear Independence	85
3.2	The Level Raising Operators $\theta$ , $\theta'$ and $\eta$	90
3.3	Level Lowering Operators	107
3.4	Paramodular Vectors and $P_3$ -Theory	117
<b>4</b>	<b>Zeta Integrals</b>	123
4.1	Paramodular Vectors and Zeta Integrals	123
4.2	Poles and $P_3$ -Theory	128
4.3	The $\eta$ Principle	135
4.4	The Existence Theorem for Generic Representations	148
<b>5</b>	<b>Non-supercuspidal Representations</b>	151
5.1	Double Coset Decompositions	151
5.2	Induction from the Siegel Parabolic Subgroup	156
5.3	Representations of Type IIIb and IVc	161
5.4	Induction from the Klingen Parabolic Subgroup	165
5.5	Saito–Kurokawa Representations	168
5.6	Summary	182
5.7	Atkin–Lehner Eigenvalues	183

VIII Contents

<b>6</b>	<b>Hecke Operators</b> . . . . .	187
6.1	Two Hecke Operators . . . . .	188
6.2	The Commutation Relation . . . . .	195
6.3	Hecke Operators and Level Raising . . . . .	205
6.4	Computation of Hecke Eigenvalues . . . . .	213
6.5	Some Consequences of Unitarity . . . . .	236
<b>7</b>	<b>Proofs of the Main Theorems</b> . . . . .	239
7.1	Zeta Integrals: The Unramified Case . . . . .	239
7.2	Zeta Integrals: The Level $\mathfrak{p}$ Case . . . . .	243
7.3	The Operator $R$ . . . . .	248
7.4	Zeta Integrals: The Higher Level Case . . . . .	252
7.5	Main Results . . . . .	262
<b>A</b>	<b>Tables for Representations of <math>\mathrm{GSp}(4)</math></b> . . . . .	269
A.1	Non-supercuspidal Representations . . . . .	269
A.2	Unitary Representations . . . . .	271
A.3	Jacquet Modules . . . . .	273
A.4	The $P_3$ -Filtration . . . . .	277
A.5	$L$ -Parameters . . . . .	280
A.6	$L$ - and $\varepsilon$ -factors (degree 4) . . . . .	282
A.7	$L$ - and $\varepsilon$ -factors (degree 5) . . . . .	286
A.8	Paramodular Dimensions and Atkin–Lehner Eigenvalues . . . . .	290
A.9	Hecke Eigenvalues . . . . .	294
A.10	Parahori-invariant Vectors . . . . .	297
	<b>References</b> . . . . .	301
	<b>Index</b> . . . . .	305

Local Newforms for  $\mathrm{GSp}(4)$

Roberts, B.; Schmidt, R.

2007, VIII, 312 p., Softcover

ISBN: 978-3-540-73323-2
