## Contents

<b>1 Toward Hierarchical Multi-Robot Urban Search and Rescue: Development of a ‘Mother’ Agent</b> <i>David A. Williamson and Dale A. Carnegie</i> .....	1
<b>2 Multi-Robot Search and Rescue: A Potential Field Based Approach</b> <i>J.L. Baxter, E.K. Burke, J.M. Garibaldi, and M. Norman</i> .....	9
<b>3 Probabilistic Target Search Strategy</b> <i>R. Jarvis and M. Marzouqi</i> .....	17
<b>4 Localisation and Mapping With a Mobile Robot Using Sparse Range Data</b> <i>Jochen Schmidt, Chee K. Wong, and Wai K. Yeap</i> .....	25
<b>5 Applying High-Level Understanding to Visual Localisation for Mapping</b> <i>Trevor Taylor</i> .....	35
<b>6 Development of an Optical Three-Axis Tactile Sensor for Object Handing Tasks in Humanoid Robot Navigation System</b> <i>Hanafiah Yussof, Masahiro Ohka, Hiroaki Kobayashi, Jumpei Takata, Mitsuhiro Yamano, and Yasuo Nasu</i> .....	43
<b>7 Clustering Methods in Flock Traffic Navigation Based on Negotiation</b> <i>Carlos Astengo-Noguez and Ramón Brena-Pinero</i> .....	53
<b>8 Using Learned Features from 3D Data for Robot Navigation</b> <i>Michael Happold and Mark Ollis</i> .....	61

<b>9 A Centre-of-Mass Tracker Integrated Circuit Design in Nanometric CMOS for Robotic Visual Object Position Tracking</b>	
<i>S.M. Rezaul Hasan and Johan Potgieter</i>	71
<b>10 Non-Iterative Vision-Based Interpolation of 3D Laser Scans</b>	
<i>Henrik Andreasson, Rudolph Triebel, and Achim Lilienthal</i>	83
<b>11 RoboSim: A Multimode 3D Simulator for Studying Mobile Robot Co-Operation</b>	
<i>G. Seet, S.K. Sim, W.C. Pang, Z.X. Wu, and T. Asokan</i>	91
<b>12 A Mobile Robot for Autonomous Book Retrieval</b>	
<i>Aneesh N. Chand and Godfrey C. Onwubolu</i>	101
<b>13 Trajectory Planning for Surveillance Missions of Mobile Robots</b>	
<i>Luiz S. Martins-Filho and Elbert E.N. Macau</i>	109
<b>14 An Evolutionary Approach to Crowd Simulation</b>	
<i>Tsai-Yen Li and Chih-Chien Wang</i>	119
<b>15 Application of a Particle Swarm Algorithm to the Capacitated Open Pit Mining Problem</b>	
<i>Jacques A. Ferland, Jorge Amaya, and Melody Suzy Djuimo</i>	127
<b>16 Automatic Adjustment for Optical Axes in Laser Systems Using Stochastic Binary Search Algorithm for Noisy Environments</b>	
<i>Nobuharu Murata, Hirokazu Nosato, Tatsumi Furuya, and Masahiro Murakawa</i>	135
<b>17 An Analysis of the Chromosome Generated by a Genetic Algorithm Used to Create a Controller for a Mobile Inverted Pendulum</b>	
<i>Mark Beckerleg and John Collins</i>	145
<b>18 Robust Flight Stability and Control for Micro Air Vehicles</b>	
<i>M. Meenakshi and M. Seetharama Bhat</i>	153
<b>19 An Ecological Interface Design Approach to Human Supervision of a Robot Team</b>	
<i>H. Furukawa</i>	163
<b>20 Embedded RTOS: Performance Analysis With High Precision Counters</b>	
<i>Kemal Köker</i>	171

<b>21 Simple Biped Walking Robot for University Education Considering Fabrication Experiences</b> <i>Yoshihiko Takahashi, Hirofumi Takagi, Yoshiharu Uchiyama, and Takumi Takashima</i> .....	181
<b>22 Autonomous Stride-Frequency and Step-Length Adjustment for Bipedal Walking Control</b> <i>Lin Yang, Chee-Meng Chew, Aun-Neow Poo, and Teresa Zielinska</i> .....	189
<b>23 Application of Extended Kalman Filter Towards UAV Identification</b> <i>Abhijit G. Kallapur, Shaaban S. Ali, and Sreenatha G. Anavatti</i> .....	199
<b>24 A Novel Strategy for Multiagent Coalitions in a Dynamic Hostile World</b> <i>Madhu Goyal</i> .....	209
<b>25 Emotion Recognition Using Voice Based on Emotion-Sensitive Frequency Ranges</b> <i>Kyung Hak Hyun, Eun Ho Kim, and Yoon Keun Kwak</i> .....	217
<b>26 FPGA-Based Implementation of Graph Colouring Algorithms</b> <i>Valery Sklyarov, Ioulia Skliarova, and Bruno Pimentel</i> .....	225
<b>27 Balancing Sociality in Meta-agent Approach</b> <i>Oomiya Kenta, Miyanishi Keiji, and Suzuki Keiji</i> .....	233
<b>28 Complex Stability Radius for Automatic Design of Gain-Scheduled Control Part I: Theoretical Development</b> <i>Rini Akmeliawati and Iven M.Y. Mareels</i> .....	241
<b>29 Complex Stability Radius for Automatic Design of Gain-Scheduled Control Part II: Example on Autopilot Design</b> <i>Rini Akmeliawati and Iven M.Y. Mareels</i> .....	251
<b>30 Synthesis of Reconfigurable Hierarchical Finite State Machines</b> <i>Valery Sklyarov and Ioulia Skliarova</i> .....	259
<b>Author Index</b> .....	267
