Preface	ix
I An Introductory Course	1
1 What is a Functional Identity?	3
1.1 Prerequisites	3
1.2 Simple Examples of Functional Identities	8
1.3 Basic Concepts	15
1.4 Finding Functional Identities in Different Areas	22
2 The Strong Degree and the FI-Degree	29
2.1 The Strong Degree	30
2.2 Strongly d -Free Rings and the FI-Degree	33
2.3 Strongly $(t; d)$ -Free Rings	37
2.4 $s\text{-deg}(\mathcal{A}) \leq \text{FI-deg}(\mathcal{A})$	41
II The General Theory	47
3 Constructing d-Free Sets	49
3.1 Notation	49
3.2 d -Free Sets	53
3.3 Two Constructions of d -Free Sets	58
3.4 $(t; d)$ -Free Sets	63
3.5 $(*; t; d)$ -Free Rings	71
4 Functional Identities on d-Free Sets	87
4.1 Introducing the General Setting	87
4.2 d -Free Pairs	92
4.3 Quasi-polynomials and Core Functions	97
4.4 Remarks on “Nonlinear” Identities	105

5	Functional Identities in (Semi)prime Rings	111
5.1	The Fractional Degree	111
5.2	A List of d -Free Subsets of Prime Rings	119
5.3	d -Freeness of Semiprime Rings	123
5.4	Commuting Maps on (Semi)prime Rings	128
5.5	Generalized Functional Identities	133
III	Applications	145
6	Lie Maps and Related Topics	147
6.1	Lie Maps on Rings	148
6.2	Lie Maps on Skew Elements	158
6.3	Lie Maps on Lie Ideals	166
6.4	Jordan Maps	174
6.5	f -Homomorphisms and f -Derivations	180
7	Linear Preserver Problems	189
7.1	Commutativity Preserving Maps	190
7.2	Normality Preserving Maps	201
7.3	Zero Jordan Product Preserving Maps	210
7.4	Equal Product Preserving Maps	215
8	Further Applications to Lie Algebras	221
8.1	Lie-Admissible Algebras	221
8.2	Poisson Algebras	226
8.3	Maps Covariant Under the Action of Lie Algebras	230
A	Maximal Rings of Quotients	235
B	The Orthogonal Completion	243
C	Polynomial Identities	249
D	Generalized Polynomial Identities	255
	Bibliography	259
	Index	271

Functional Identities

Brešar, M.; Chebotar, M.A.; Martindale, W.S.

2007, XII, 272 p., Softcover

ISBN: 978-3-7643-7795-3

A product of Birkhäuser Basel
