Preface	ix
1 Introduction and Preliminaries	
1.1 Introduction	1
1.2 Notation	10
2 Tangency and Comparison Theorems for Elliptic Inequalities	
2.1 The contributions of Eberhard Hopf	13
2.2 Tangency and comparison principles for quasilinear inequalities	21
2.3 Maximum and sweeping principles for quasilinear inequalities	25
2.4 Comparison theorems for divergence structure inequalities	30
2.5 Tangency theorems via Harnack's inequality	34
2.6 Uniqueness of the Dirichlet problem	37
2.7 The boundary point lemma	39
2.8 Appendix: Proof of Eberhard Hopf's maximum principle	42
3 Maximum Principles for Divergence Structure Elliptic Differential Inequalities	
3.1 Distribution solutions	51
3.2 Maximum principles for homogeneous inequalities	54
3.3 A maximum principle for thin sets	59
3.4 A comparison theorem in $W^{1,p}(\Omega)$	61
3.5 Comparison theorems for singular elliptic inequalities	62

3.6	Strongly degenerate operators	68
3.7	Maximum principles for non-homogeneous elliptic inequalities	72
3.8	Uniqueness of the singular Dirichlet problem	78
3.9	Appendix: Sobolev's inequality	79
4	Boundary Value Problems for Nonlinear Ordinary Differential Equations	
4.1	Preliminary lemmas	83
4.2	Existence theorems	89
4.3	Existence theorems on a half-line	92
4.4	The end point lemma	96
4.5	Appendix: Proof of Proposition 4.2.1	97
5	The Strong Maximum Principle and the Compact Support Principle	
5.1	The strong maximum principle	103
5.2	The compact support principle	105
5.3	A special case	107
5.4	Strong maximum principle: Generalized version	110
5.5	A boundary point lemma	119
5.6	Compact support principle: Generalized version	120
6	Non-homogeneous Divergence Structure Inequalities	
6.1	Maximum principles for structured inequalities	127
6.2	Proof of Theorems 6.1.1 and 6.1.2	131
6.3	Proof of Theorem 6.1.3 and Theorem 6.1.5, Part I	139
6.4	Proof of Theorem 6.1.4 and Theorem 6.1.5, Part II	142
6.5	The case $p = 1$ and the mean curvature equation	146
7	The Harnack Inequality	
7.1	Local boundedness and the weak Harnack inequality	153
7.2	The Harnack inequality	163
7.3	Hölder continuity	166
7.4	The case $p \geq n$	171
7.5	Appendix. The John–Nirenberg theorem	173

8 Applications

8.1	Cauchy–Liouville Theorems	181
8.2	Radial symmetry	186
8.3	Symmetry for overdetermined boundary value problems	195
8.4	The phenomenon of dead cores	203
8.5	The strong maximum principle for Riemannian manifolds	218
Bibliography		223
Subject Index		233
Author Index		235

The Maximum Principle

Pucci, P.; Serrin, J.B.

2007, X, 236 p., Hardcover

ISBN: 978-3-7643-8144-8

A product of Birkhäuser Basel
