

---

## Contents

---

### Part I General Issues

---

<b>Rationality, learning and complexity: from the Homo economicus to the Homo sapiens</b> <i>A. Vercelli</i> .....	3
<b>The Confused State of Complexity Economics: An Ontological Explanation</b> <i>E. Perona</i> .....	33

---

### Part II Modeling Issues I

---

<b>Modeling Economic Complexity</b>	
<b>The Complex Problem of Modeling Economic Complexity</b> <i>R. H. Day</i> .....	57
<b>Visual Recurrence Analysis: Application to Economic Time series</b> <i>M. Faggini</i> .....	69
<b>Complexity of Out-of-Equilibrium Play in Tax Evasion Game</b> <i>V. Lipatov</i> .....	93

---

### Part III Modeling Issues II

---

<b>Using Models from Physics to Understand Economic Phenomena</b>	
<b>A New Stochastic Framework for Macroeconomics: Some Illustrative Examples</b> <i>M. Aoki</i> .....	121
<b>Probability of Traffic Violations and Risk of Crime - A Model of Economic Agent Behavior</b> <i>J. Mimkes</i> .....	145

<b>Markov Nets and the NetLab Platform: Application to Continuous Double Auction</b>	
<i>L. Muchnik and S. Solomon</i> .....	157
<b>Synchronization in Coupled and Free Chaotic Systems</b>	
<i>F.T. Arecchi, R. Meucci, E. Allaria, and S. Boccaletti</i> .....	181
<hr/>	
<b>Part IV Agent Based Models</b>	
<hr/>	
<b>Explaining Social and Economic Phenomena by Models with Low or Zero Cognition Agents</b>	
<i>P. Ormerod, M. Trabatti, K. Glass, and R. Colbaugh</i> .....	201
<b>Information and Cooperation in a Simulated Labor Market: A Computational Model for the Evolution of Workers and Firms</b>	
<i>S. A. Delre and D. Parisi</i> .....	211
<hr/>	
<b>Part V Applications</b>	
<hr/>	
<b>Income Inequality, Corruption, and the Non-Observed Economy: A Global Perspective</b>	
<i>E. Ahmed, J. B. Rosser, Jr., and M. V. Rosser</i> .....	233
<b>Forecasting Inflation with Forecast Combinations: Using Neural Networks in Policy</b>	
<i>P. McNelis and P. McAdam</i> .....	253
<hr/>	
<b>Part VI Policy Issues</b>	
<hr/>	
<b>The Impossibility of an Effective Theory of Policy in a Complex Economy</b>	
<i>K. Vela Velupillai</i> .....	273
<b>Implications of Scaling Laws for Policy-Makers</b>	
<i>M. Gallegati, A. Kirman, and A. Palestrini</i> .....	291
<b>Robust Control and Monetary Policy Delegation</b>	
<i>G. Diana and M. Sidiropoulos</i> .....	303
