Foreword by David L. Brown	vii
Preface	ix
Acknowledgments	xiii
Contributors	xxiii

Chapter 1 Regional Block Room Setup and Equipment 1

Ban C.H. Tsui

1.1.	Introduction	1
1.2.	Equipment and Monitoring	1
1.2.1.	Block Room Setup	2
1.2.2.	Equipment Storage Cart	2
1.2.3.	Monitoring	3
1.2.4.	Needles, Catheters, and Related Equipment	4
1.2.5.	Ultrasound Equipment	6
1.2.6.	Nerve Stimulator	7

Chapter 2 Electrical Nerve Stimulation 9

Ban C.H. Tsui

2.1.	Introduction	9
2.2.	Electrophysiology	10
2.2.1.	Characteristics of Electrical Impulses	10
2.2.2.	Polarity of Stimulating and Returning Electrodes	11
2.2.3.	Distance–Current Relationship	12
2.2.4.	Current Density of Electrodes and Injectates	13
2.3.	Useful Features of Equipment Variables	15
2.3.1.	Constant Current Output and Display	15
2.3.2.	Variable Pulse Width and Frequency	16
2.3.3.	Specialized Polarity Electrodes	16
2.3.4.	Disconnection and Malfunction Indicators	17
2.3.5.	Other Accessories	17

2.4.	Practical Considerations	17
2.4.1.	Documentation	17
2.4.2.	Population Considerations	17
2.4.3.	Does Neurostimulation Make a Difference: Can It Be Replaced by Ultrasound?	17

Chapter 3 Ultrasound Basics 19

Ravi Bhargava, Michelle Noga, and Lawrence Lou

3.1.	Introduction	19
3.2.	Basic Ultrasound Physics and Technology	20
3.2.1.	Resolution and Line Density: Two Factors Influencing Image Quality	22
3.2.2.	Field and Gain Functions	22
3.2.3.	Amplifier Gain Function	24
3.2.4.	Time Gain Compensation	24
3.2.5.	Doppler Effect	24
3.2.6.	Artifacts: The Importance of Anisotropy and Acoustic Shadowing	24
3.3.	Echogenic Appearance of Various Tissues	26
3.3.1.	Nerves and Tendons	26
3.3.2.	Muscles	28
3.3.3.	Bone	28
3.3.4.	Vascular Structures	28
3.3.5.	Fat	29
3.3.6.	Fascial Tissue	29
3.3.7.	Pleura and Air	29
3.4.	Equipment Selection and Preparation	29
3.4.1.	Equipment Selection	29
3.4.2.	Are Specific Needles Available and/or Necessary?	32
3.4.3.	Equipment Preparation	32

Chapter 4 Practical and Clinical Aspects of Ultrasound and Nerve Stimulation-Guided Peripheral Nerve Blocks ... 35

Ban C.H. Tsui and Derek Dillane

4.1.	Introduction	36
4.2.	Clinical Aspects of Block Accuracy and Sedation	36
4.2.1.	Importance of Block Accuracy	36
4.2.2.	Image Acquisition	36
4.2.3.	Practical Approach: Traceback Method	40
4.2.4.	Control of Needle Trajectory	43
4.2.5.	Needle Insertion Technique	44
4.2.6.	“Training Wheel” Laser Attachment	45
4.2.7.	Out-of-Plane Technique: Walk Down Approach	47
4.2.8.	Local Anesthetic Application	48
4.2.9.	Injection Pressure	49
4.2.10.	Appropriate Sedation	51
4.3.	Ultrasound-Guidance Training	51

Chapter 5 Clinical Anatomy for Upper Limb Blocks 53

Ban C.H. Tsui

5.1.	Origin of Spinal Nerves	53
5.2.	The Brachial Plexus	54

5.2.1.	The Brachial Plexus	55
5.2.2.	Branches of the Brachial Plexus	55
5.3.	Distribution of Spinal Nerves in the Upper Extremity	58
5.3.1.	Dermatomes	58
5.3.2.	Myotomes	58
5.3.3.	Osteotomes	61
Chapter 6 Interscalene Block		63
<i>Ban C.H. Tsui</i>		
6.1.	Clinical Anatomy	63
6.2.	Patient Positioning and Surface Anatomy	66
6.2.1.	Patient Positioning	66
6.2.2.	Surface Anatomy	66
6.3.	Sonographic Imaging and Needle Insertion Technique	67
6.3.1.	Scanning Technique	67
6.3.2.	Sonographic Appearance	68
6.3.3.	Needle Insertion Technique	70
6.4.	Nerve Stimulation	72
6.5.	Local Anesthetic Application	73
Chapter 7 Supraclavicular Block		75
<i>Ban C.H. Tsui</i>		
7.1.	Clinical Anatomy	75
7.2.	Patient Positioning and Surface Anatomy	78
7.2.1.	Patient Positioning	78
7.2.2.	Surface Anatomy	78
7.3.	Sonographic Imaging and Needle Insertion Technique	78
7.3.1.	Scanning Technique	80
7.3.2.	Sonographic Appearance	80
7.3.3.	Needle Insertion Technique	80
7.4.	Nerve Stimulation	82
7.5.	Local Anesthetic Application	82
Chapter 8 Infraclavicular Block		87
<i>Ban C.H. Tsui</i>		
8.1.	Clinical Anatomy	88
8.2.	Patient Positioning and Surface Anatomy	90
8.2.1.	Patient Positioning	90
8.2.2.	Surface Anatomy	91
8.3.	Sonographic Imaging and Needle Insertion Technique	91
8.3.1.	Scanning Technique	93
8.3.2.	Sonographic Appearance	93
8.3.3.	Needle Insertion Technique	95
8.4.	Nerve Stimulation	96
8.5.	Local Anesthetic Application	97
Chapter 9 Axillary Block		99
<i>Ban C.H. Tsui</i>		
9.1.	Clinical Anatomy	99
9.2.	Patient Positioning and Surface Anatomy	102
9.2.1.	Patient Positioning	102
9.2.2.	Surface Anatomy	102

9.3.	Sonographic Imaging and Needle Insertion Technique	102
9.3.1.	Scanning Technique	103
9.3.2.	Sonographic Appearance	104
9.3.3.	Needle Insertion Technique	104
9.4.	Nerve Stimulation	106
9.5.	Local Anesthetic Application	107

Chapter 10 Selective Terminal Nerve Blocks of the Upper Extremity 109

Ban C.H. Tsui

10.1.	Introduction	110
10.2.	Radial Nerve Block at Lateral Aspect of Elbow	111
10.2.1.	Clinical Anatomy	112
10.2.2.	Patient Positioning and Surface Anatomy	114
10.2.3.	Sonographic Imaging and Needle Insertion Technique	114
10.2.4.	Nerve Stimulation	118
10.2.5.	Local Anesthetic Application	118
10.3.	Median Nerve	118
10.3.1.	Clinical Anatomy	119
10.3.2.	Patient Positioning and Surface Anatomy	121
10.3.3.	Sonographic Imaging and Needle Insertion Technique	122
10.3.4.	Nerve Stimulation	124
10.3.5.	Local Anesthetic Application	124
10.4.	Musculocutaneous Nerve	125
10.4.1.	Clinical Anatomy	125
10.4.2.	Patient Positioning and Surface Anatomy	126
10.4.3.	Sonographic Imaging and Needle Insertion Technique	126
10.4.4.	Nerve Stimulation	129
10.4.5.	Local Anesthetic Application	129
10.5.	Ulnar Nerve	130
10.5.1.	Clinical Anatomy	130
10.5.2.	Patient Positioning and Surface Anatomy	131
10.5.3.	Sonographic Imaging and Needle Insertion Technique	131
10.5.4.	Nerve Stimulation	134
10.5.5.	Local Anesthetic Application	135

Chapter 11 Clinical Anatomy for Lower Limb Blocks 137

Ban C.H. Tsui

11.1.	Origin of Spinal Nerves	137
11.2.	Lumbar and Sacral Plexuses	138
11.2.1.	Formation and Branches of the Lumbar Plexus	138
11.2.2.	Formation and Relations of the Sacral Plexus	139
11.3.	Distribution of Spinal Nerves in the Lower Extremity	141
11.3.1.	Dermatomes	141
11.3.2.	Myotomes	143
11.3.3.	Osteotomes	144

Chapter 12 Lumbar Plexus/Psoas Compartment Block ... 147

Ban C.H. Tsui

12.1.	Clinical Anatomy	148
12.1.1.	Lumbar Plexus Within the Psoas Compartment	148
12.1.2.	Terminal Nerves of Lumbar Plexus	150

12.2.	Patient Positioning and Surface Anatomy	151
12.2.1.	Patient Positioning	151
12.2.2.	Surface Anatomy	151
12.3.	Sonographic Imaging and Needle Insertion Technique	152
12.3.1.	Scanning Technique	154
12.3.2.	Sonographic Appearance	157
12.3.3.	Needle Insertion Technique	158
12.4.	Nerve Stimulation	159
12.5.	Local Anesthetic Application	160

Chapter 13 Femoral Block 161

Ban C.H. Tsui

13.1.	Clinical Anatomy	161
13.2.	Patient Positioning and Surface Anatomy	164
13.2.1.	Patient Positioning	164
13.2.2.	Surface Anatomy	164
13.3.	Sonographic Imaging and Needle Insertion Technique	165
13.3.1.	Scanning Technique	165
13.3.2.	Sonographic Appearance	167
13.3.3.	Needle Insertion Technique	167
13.4.	Nerve Stimulation	168
13.5.	Local Anesthetic Application	169

Chapter 14 Sciatic and Popliteal Blocks 171

Ban C.H. Tsui

14.1.	Clinical Anatomy	172
14.2.	Labat (Gluteal) Sciatic Nerve Block Approach	178
14.2.1.	Patient Positioning and Surface Anatomy	178
14.2.2.	Sonographic Imaging and Needle Insertion Technique	178
14.2.3.	Nerve Stimulation	181
14.2.4.	Local Anesthetic Application	182
14.3.	Subgluteal Sciatic Nerve Block Approach	183
14.3.1.	Patient Positioning and Surface Anatomy	183
14.3.2.	Sonographic Imaging and Needle Insertion Technique	183
14.3.3.	Nerve Stimulation	186
14.3.4.	Local Anesthetic Application	187
14.4.	Anterior Sciatic Nerve Block Approach	187
14.4.1.	Patient Positioning and Surface Anatomy	187
14.4.2.	Sonographic Imaging and Needle Insertion Technique	188
14.4.3.	Nerve Stimulation	191
14.4.4.	Local Anesthetic Application	191
14.5.	Popliteal Sciatic Nerve Block (Posterior Approach)	192
14.5.1.	Patient Positioning and Surface Anatomy	192
14.5.2.	Sonographic Imaging and Needle Insertion Technique	193
14.5.3.	Nerve Stimulation	198
14.5.4.	Local Anesthetic Application	199
14.6.	Popliteal Sciatic Nerve Block (Lateral Approach)	200
14.6.1.	Patient Positioning and Surface Anatomy	200
14.6.2.	Sonographic Imaging and Needle Insertion Technique	200
14.6.3.	Nerve Stimulation	202
14.6.4.	Local Anesthetic Application	202

Chapter 15 Ankle Blocks 205

Ban C.H. Tsui

- 15.1. Clinical Anatomy 205
- 15.2. Patient Positioning and Surface Anatomy 207
 - 15.2.1. Patient Positioning 207
 - 15.2.2. Surface Anatomy 207
- 15.3. Sonographic Imaging and Needle Insertion Technique 208
 - 15.3.1. Scanning Technique 208
 - 15.3.2. Sonographic Appearance 209
 - 15.3.3. Needle Insertion Technique 210
- 15.4. Nerve Stimulation 211
- 15.5. Local Anesthetic Application 212

Chapter 16 Regional Block Catheter Insertion Using Ultrasonography and Stimulating Catheters 215

Sugantha Ganapathy

- 16.1. Introduction 216
- 16.2. Equipment and Injectates 216
 - 16.2.1. Stimulating Catheters 216
 - 16.2.2. What Injectate Should One Use? 218
- 16.3. Technique 218
 - 16.3.1. Confirming the Catheter Tip Location with Nerve Stimulation Technique 219
 - 16.3.2. Confirmation of Catheter Tip Location with Ultrasonography 220
- 16.4. Examples of Specific Blocks 221
 - 16.4.1. Interscalene Catheterization 221
 - 16.4.2. Infraclavicular Catheterization 221
 - 16.4.3. Femoral Nerve 221
 - 16.4.4. Sciatic Nerve 221
- 16.5. Summary and Advantages 223

Chapter 17 Anatomy of the Trunk for Paravertebral, Intercostal, and Epidural Blocks 225

Ban C.H. Tsui

- 17.1. Vertebral Column 225
 - 17.1.1. Developmental Anatomy of the Thoracic and Lumbar Spine 226
 - 17.1.2. Developmental Anatomy of the Sacrum 227
- 17.2. Costovertebral Articulations 228
- 17.3. Paravertebral Space 229
- 17.4. Spinal Membranes (Meninges) and Nerves Above the Sacrum 229
- 17.5. Intercostal Nerves 230
- 17.6. Caudal Epidural Space 230
- 17.7. Dermatomes 233

Chapter 18 Epidural Anesthesia Using Electrical Epidural Stimulation and Ultrasound Guidance..... 235

Ban C.H. Tsui

- 18.1. Introduction 236
 - 18.1.1. Technical Issues in Epidural Analgesia 236
 - 18.1.2. Issues Related to Caudal Needle Puncture and Catheter Advancement 237

18.2.	Electrical Epidural Stimulation	238
18.2.1.	Test Equipment and Procedure	238
18.2.2.	Mechanism of the Test	239
18.2.3.	Considerations for Test Performance and Interpretation	240
18.2.4.	Stimulating Epidural Catheter Requirements	241
18.2.5.	Safety of Epidural Electrical Stimulation	242
18.2.6.	Clinical Applications	242
18.3.	Ultrasound Imaging in Neuraxial Anesthesia	245
18.3.1.	Visibility Through Ultrasound	245
18.3.2.	Summary of the Ultrasound Appearance of Neuraxial Structures	250
18.3.3.	Clinical Applications	252
18.4.	Conclusion	253
Chapter 19 Paravertebral and Intercostal Blockade.....		257
<i>Ban C.H. Tsui</i>		
19.1.	Introduction	257
19.2.	Clinical Anatomy	258
19.2.1.	Skeletal Anatomy of the Trunk	258
19.2.2.	Anatomy of the Paravertebral Space and Intercostal Nerves	259
19.3.	Patient Positioning and Surface Anatomy	260
19.3.1.	Patient Positioning	260
19.3.2.	Surface Anatomy	260
19.4.	Sonographic Imaging and Needle Insertion Technique	261
19.4.1.	Scanning Technique	261
19.4.2.	Sonographic Appearance	265
19.4.3.	Needle Insertion Technique	265
19.5.	Nerve Stimulation	269
19.5.1.	Paravertebral Block	269
19.6.	Local Anesthetic Application	269
Chapter 20 Caudal and Epidural Blockade.....		271
<i>Ban C.H. Tsui</i>		
20.1.	Introduction	272
20.1.1.	Caudal Blocks: Single-Shot Blocks and Advancement of Catheters Cephalad from the Caudal Spine	272
20.1.2.	Lumbar and Thoracic Epidurals	273
20.2.	Clinical Anatomy	273
20.3.	Patient Positioning and Surface Landmarks	275
20.3.1.	Patient Positioning	275
20.3.2.	Surface Anatomy	275
20.4.	Single-Shot Caudal Anesthesia	277
20.4.1.	Sonographic Imaging and Ultrasound-Guided Block Procedure	277
20.4.2.	Needle Insertion and Local Anesthetic Application	279
20.4.3.	Epidural Stimulation Guidance and Block Technique	279
20.5.	Catheter Advancement from the Caudal Epidural Space	280
20.5.1.	Sonographic Imaging and Ultrasound-Guided Block Procedure	280
20.5.2.	Catheter Insertion and Local Anesthetic Application	284
20.5.3.	Epidural Stimulation Guidance Technique	284
20.5.4.	Electrocardiograph Monitoring Technique	286

20.6.	Direct Lumbar and Thoracic Epidurals	287
20.6.1.	Sonographic Imaging and Ultrasound-Guided Block Procedure	287
20.6.2.	Epidural Stimulation Test for Direct Lumbar and Thoracic Continuous Epidurals	292
Index	295

Atlas of Ultrasound- and Nerve Stimulation-Guided
Regional Anesthesia

Tsui, B.C.H. - Chan, V.; Finucane, B.; Grau, Th.; Walji, A.
(Eds.)

2008, XXIII, 302 p., Hardcover

ISBN: 978-0-387-68158-0
