

# Contents

<b>Preface</b> .....	<b>vii</b>
<b>Contributors</b> .....	<b>xv</b>
<b>1 Overview of Gradient Studies and Experiments</b> .....	<b>1</b>
<b>Part I Everglades Ecosystem</b>	
<b>2 Ecological Status of the Everglades: Environmental and Human Factors that Control the Peatland Complex on the Landscape</b> .....	<b>13</b>
<b>3 Soil Characteristics of the Everglades Peatland</b> .....	<b>59</b>
<b>4 Vegetation and Algae of the Everglades Fen</b> .....	<b>73</b>
<b>Part II Nutrient and Hydrologic Gradient Studies</b>	
<b>5 Introduction to the Gradient Studies</b> .....	<b>97</b>
<b>6 Enrichment Gradients in WCA-2A and Northern WCA-3A: Water, Soil, Plant Biomass, and Nutrient Storage Responses</b> .....	<b>103</b>
<b>7 Geologic Settings and Hydrology Gradients in the Everglades</b> .....	<b>167</b>
<b>8 Effects of Hydrologic Management Decisions on Everglades Tree Islands</b> .....	<b>191</b>
<b>9 Macrophyte Community Responses in the Everglades with an Emphasis on Cattail (<i>Typha domingensis</i>) and Sawgrass (<i>Cladium jamaicense</i>) Interactions along a Gradient of Long-Term Nutrient Additions, Altered Hydroperiod and Fire</b> .....	<b>215</b>

<b>10</b>	<b>Algal Responses to Long-Term Nutrient Additions . . . . .</b>	<b>261</b>
<b>11</b>	<b>Macroinvertebrate Responses to a Gradient of Long-Term Nutrient Additions, Altered Hydroperiod, and Fire. . . . .</b>	<b>277</b>
<b>12</b>	<b>Historical Changes in Water Quality and Vegetation in WCA-2A Determined by Paleoecological Analyses . . . . .</b>	<b>321</b>
<b>13</b>	<b>Carbon Cycling and Dissolved Organic Matter Export in the Northern Everglades . . . . .</b>	<b>351</b>
<b>Part III Everglades Experiments</b>		
<b>A. Phosphorus Dosing</b>		
<b>14</b>	<b>Introduction to a Mesocosm Approach for Establishment of Phosphorus Gradient Experiments . . . . .</b>	<b>375</b>
<b>15</b>	<b>Water Quality, Soil Chemistry, and Ecosystem Responses to P Dosing . . . . .</b>	<b>385</b>
<b>16</b>	<b>Macrophyte Slough Community Response to Experimental Phosphorus Enrichment and Periphyton Removal . .</b>	<b>417</b>
<b>17</b>	<b>Decomposition of Litter and Peat in the Everglades: The Influence of P Concentrations . . . . .</b>	<b>441</b>
<b>18</b>	<b>Experimental Assessment of Phosphorus Effects on Algal Assemblages in Dosing Mesocosms . . . . .</b>	<b>461</b>
<b>19</b>	<b>Macroinvertebrate and Fish Responses to Experimental P Additions in Everglades Sloughs . . . . .</b>	<b>477</b>
<b>B. Fertilizer Experiments</b>		
<b>20</b>	<b>Plant Community Response to Long-Term N and P Fertilization . .</b>	<b>505</b>
<b>C. Disturbance Experiments</b>		
<b>21</b>	<b>The Effects of Disturbance, Phosphorus, and Water Level on Plant Succession in the Everglades . . . . .</b>	<b>531</b>
<b>D. Germination Experiments</b>		
<b>22</b>	<b>Establishment and Seedling Growth of Sawgrass and Cattail from the Everglades . . . . .</b>	<b>547</b>

**Part IV Modeling Ecosystem Responses to Phosphorus Additions**

<b>23</b>	<b>Long-Term Phosphorus Assimilative Capacity (PAC) in the Everglades</b>	<b>567</b>
<b>24</b>	<b>Spatial Distributions of Total Phosphorus and Phosphorus Accretion Rates in Everglades Soils</b>	<b>579</b>
<b>25</b>	<b>An Ecological Basis for Establishment of a Phosphorus Threshold for the Everglades Ecosystem</b>	<b>595</b>

**Part V Lessons for Restoration of the Everglades**

<b>26</b>	<b>An Ecological Approach for Restoration of the Everglades Fen</b>	<b>621</b>
	<b>Bibliography</b>	<b>643</b>
	<b>Index</b>	<b>679</b>

The Everglades Experiments

Lessons for Ecosystem Restoration

Richardson, C.

2008, XVIII, 702 p. 249 illus., Hardcover

ISBN: 978-0-387-98796-5
