<i>Introduction</i> .....	vii
<i>Preface</i> .....	ix
<i>Contributors</i> .....	xi

<b>1. Respiratory control disorders: from genes to patients and back</b> .....	<b>1</b>
<i>David GOZAL</i>	
1.1 Introduction .....	1
1.2 Effect of sleep on breathing.....	2
1.3 Diagnostic approaches to the patient with suspected abnormalities in respiratory control .....	3
1.4 Potential consequences of delayed diagnosis and treatment .....	4
1.5 Where do we go from here? .....	4
1.6 Conclusion.....	5
References .....	6
<b>2. Hereditary aspects of respiratory control in health and disease in humans</b> .....	<b>9</b>
<i>John V. WEIL</i>	
2.1 Introduction .....	9
2.2 Inter-individual variation in human ventilatory control .....	9
2.3 Population and species differences.....	11
2.4 Familial clusters .....	12
2.5 Genetics vs. environment .....	16
2.6 Locus of hereditary effects .....	16
2.7 Conclusion.....	20
References .....	20
<b>3. Phox2b and the homeostatic brain</b> .....	<b>25</b>
<i>Jean-François BRUNET and Christo GORIDIS</i>	
3.1 Introduction .....	25
3.2 Expression pattern of <i>Phox2</i> genes.....	25
3.3 Gross phenotype of mouse mutants for <i>Phox2</i> genes .....	30
3.4 Cellular functions of <i>Phox2</i> genes.....	33
3.5 Ancestry of the homeostatic brain.....	38
3.6 Conclusion.....	38
References .....	38

<b>4. Congenital central hypoventilation syndrome: from patients to gene discovery</b>	<b>45</b>
<i>Ha TRANG</i>	
4.1 Introduction	45
4.2 Clinical presentation of CCHS	46
4.3 Genetic mutations in CCHS	50
4.4 Phenotype-genotype correlations	51
4.5 Conclusion	52
References	52
<b>5. Structural and functional brain abnormalities in congenital central hypoventilation syndrome</b>	<b>57</b>
<i>Ronald M. HARPER, Mary A. WOO, Paul M. MACEY and Rajesh KUMAR</i>	
5.1 Introduction	57
5.2 Structural injury and functional deficits in CCHS	58
5.3 Imaging findings	59
5.4 Cardiovascular control deficits	64
5.5 Potential mechanisms in injury	65
5.6 Conclusion	66
References	67
<b>6. <i>In vitro</i> study of <i>PHO2XB</i> gene mutations in congenital central hypoventilation syndrome</b>	<b>71</b>
<i>Tiziana BACHETTI and Isabella CECCHERINI</i>	
6.1 Introduction	71
6.2 <i>PHOX2B</i> polyalanine expansions	73
6.3 <i>PHOX2B</i> frameshift mutations	77
6.4 Conclusion	79
References	81
<b>7. Sudden infant death syndrome: study of genes pertinent to cardiorespiratory and autonomic regulation</b>	<b>85</b>
<i>Debra E. WEESE-MAYER, Michael J. ACKERMAN, Mary L. MARAZITA, and Elizabeth M. BERRY-KRAVIS</i>	
7.1 Introduction	85
7.2 Cardiac channelopathy genes in SIDS	86
7.3 Serotonergic system genes in SIDS	88
7.4 Autonomic Nervous System (ANS) genes in SIDS	91
7.5 Nicotine metabolizing genes in SIDS	95
7.6 Clinical significance	97
7.7 Conclusion and directions for future research on genetic factors in SIDS	101
References	101

<b>8. The genetic basis for obstructive sleep apnea: what role for variation in respiratory control?</b>	<b>111</b>
<i>Susan REDLINE, Sanjay R. PATEL</i>	
8.1 Introduction	111
8.2 OSA: Definition and health impact	111
8.3 OSA: Evidence for a familial basis	113
8.4 Genetic etiology-risk factors and their use as intermediate phenotypes	115
8.5 Ventilatory control as an intermediate OSA risk factor	116
8.6 Evidence for genetically determined ventilatory control abnormalities in familial OSA	122
8.7 Candidate genes for OSA that may operate through ventilatory control	123
8.8 Inferences from other conditions which involve ventilatory control deficits	125
8.9 Studies from animals	126
8.10 Pleiotropy	126
8.11 Conclusion	126
References	127
<b>9. Apnea and irregular breathing in animal models: a physiogenomic approach</b>	<b>137</b>
<i>Motoo YAMAUCHI, Fang HAN, Kingman P. STROHL</i>	
9.1 Introduction	137
9.2 Measuring ventilatory behavior	138
9.3 Defining apnea and ventilatory irregularity	140
9.4 Models of apnea	145
9.5 Model of recurrent apneas	146
9.6 Conclusion	148
References	148
<b>10. Genetic determinants of respiratory phenotypes in mice</b>	<b>153</b>
<i>Clarke G. TANKERSLEY</i>	
10.1 Introduction	153
10.2 Experimental methods and design	156
10.3 Observations and results	158
10.4 Significance of genetic determinants	163
10.5 Conclusion	164
References	165
<b>11. Genes and development of respiratory rhythm generation</b>	<b>169</b>
<i>Jean CHAMPAGNAT, Gilles FORTIN, Muriel THOBY-BRISSON</i>	
11.1 Introduction	169

11.2	Primordial embryonic rhythm in the neural tube.....	171
11.3	Parafacial rhythm generators: induction requires <i>Krox20</i> in r3 and <i>Hoxa1</i> in r4.....	173
11.4	Onset of the respiratory rhythm generation .....	175
11.5	Neurotrophic control of breathing .....	178
11.6	Brainstem modulatory controls of breathing .....	180
11.7	Conclusion.....	181
	References .....	182
<b>12.</b>	<b>Transcription factor control of central respiratory neuron development .....</b>	<b>191</b>
	<i>Bruno C. BLANCHI and Michael H. SIEWEKE</i>	
12.1	Introduction .....	191
12.2	Brainstem populations of neurons participating in central breathing control.....	192
12.3	Mouse mutants of transcription factors governing development of respiratory neurons and breathing control .....	195
12.4	Conclusion.....	212
	References .....	213
<b>13.</b>	<b>Lessons from mutant newborn mice with respiratory control deficits.....</b>	<b>223</b>
	<i>Claude GAULTIER</i>	
13.1	Introduction .....	223
13.2	Developmental respiratory control disorders.....	224
13.3	The newborn mouse .....	225
13.4	Mutant newborn mice as models of abnormal respiratory rhythm ....	226
13.5	Mutant newborn mice with abnormal chemosensitivity .....	229
13.6	Clinical relevance of mutant newborn mice models.....	233
13.7	Conclusion.....	234
	References .....	235
<b>14.</b>	<b>Tentative mouse model for the congenital central hypo- ventilation syndrome: heterozygous <i>Phox2b</i> mutant newborn mice .....</b>	<b>243</b>
	<i>Jorge GALLEGO, Nélina RAMANANTSOA, Vanessa VAUBOURG</i>	
14.1	Introduction .....	243
14.2	Neonatal phenotype determination .....	244
14.3	Non-invasive ventilatory phenotyping in newborn mice.....	244
14.4	Sleep-disordered breathing in <i>Phox2b</i> <sup>+/-</sup> newborn mice .....	246
14.5	Sensitivity to CO <sub>2</sub> .....	246
14.6	Sensitivity to hypoxia.....	248
14.7	Arousal response to hypoxia.....	249
14.8	Sensitivity to hyperoxia.....	250

14.9	Effects of ambient temperature .....	250
14.10	Cognitive evaluation of Phox2b <sup>+/-</sup> mutant mice .....	251
14.11	Comparison between Phox2b <sup>+/-</sup> and CCHS phenotypes .....	251
14.12	Conclusion.....	253
	References .....	254
<b>15.</b>	<b>Respiratory control abnormalities in necdin-null mice: implications for the pathogenesis of Prader-Willi Syndrome .....</b>	<b>259</b>
	<i>John J. GREER and Rachel WEVRICK</i>	
15.1	Introduction .....	259
15.2	Transgenic mouse models .....	259
15.3	Central respiratory deficit.....	260
15.4	General anatomical abnormalities within the CNS .....	264
15.5	Respiratory dysfunction in PWS .....	265
15.6	Conclusion.....	266
	References .....	267
<b>16.</b>	<b>Possible role of bioaminergic systems in the respiratory disorders of Rett syndrome .....</b>	<b>271</b>
	<i>John BISSONNETTE and Gerard HILAIRE</i>	
16.1	Introduction .....	271
16.2	Clinical manifestations of respiratory disorders in RTT .....	272
16.3	Mouse models of RTT .....	273
16.4	Respiratory studies in mouse models of RTT .....	275
16.5	Bioaminergic systems, RTT and Mecp2 <sup>-/-</sup> mice .....	278
16.6	Possible link between bioaminergic and respiratory alterations in mice and RTT patients .....	280
16.7	Conclusions: bioamines, respiration and RTT .....	282
	References .....	283
<b>17.</b>	<b>Respiratory plasticity following intermittent hypoxia: a guide for novel therapeutic approaches to ventilatory control disorders? .....</b>	<b>291</b>
	<i>Gordon S. MITCHELL</i>	
17.1	Introduction .....	291
17.2	Deficiencies in respiratory motor neuron activity underlie some ventilatory control disorders .....	292
17.3	Intermittent hypoxia induced respiratory plasticity and metaplasticity .....	294
17.4	Compensatory plasticity during ventilatory control disorders.....	298
17.5	Possible therapeutic approaches for ventilatory control disorders: lessons from LTF? .....	301
17.6	Conclusion.....	305
	References .....	306
