
Contents

1	Concept of Statistical Modeling	1
1.1	Role of Statistical Models	1
1.1.1	Description of Stochastic Structures by Statistical Models	1
1.1.2	Predictions by Statistical Models	2
1.1.3	Extraction of Information by Statistical Models	3
1.2	Constructing Statistical Models	4
1.2.1	Evaluation of Statistical Models—Road to the Information Criterion	4
1.2.2	Modeling Methodology	5
1.3	Organization of This Book	7
2	Statistical Models	9
2.1	Modeling of Probabilistic Events and Statistical Models	9
2.2	Probability Distribution Models	10
2.3	Conditional Distribution Models	17
2.3.1	Regression Models	17
2.3.2	Time Series Model	24
2.3.3	Spatial Models	27
3	Information Criterion	29
3.1	Kullback–Leibler Information	29
3.1.1	Definition and Properties	29
3.1.2	Examples of K-L Information	32
3.1.3	Topics on K-L Information	33
3.2	Expected Log-Likelihood and Corresponding Estimator	35
3.3	Maximum Likelihood Method and Maximum Likelihood Estimators	37
3.3.1	Log-Likelihood Function and Maximum Likelihood Estimators	37

3.3.2	Implementation of the Maximum Likelihood Method by Means of Likelihood Equations	38
3.3.3	Implementation of the Maximum Likelihood Method by Numerical Optimization	40
3.3.4	Fluctuations of the Maximum Likelihood Estimators . . .	44
3.3.5	Asymptotic Properties of the Maximum Likelihood Estimators	47
3.4	Information Criterion AIC	51
3.4.1	Log-Likelihood and Expected Log-Likelihood	51
3.4.2	Necessity of Bias Correction for the Log-Likelihood . . .	52
3.4.3	Derivation of Bias of the Log-Likelihood	55
3.4.4	Akaike Information Criterion (AIC)	60
3.5	Properties of MAICE	69
3.5.1	Finite Correction of the Information Criterion	69
3.5.2	Distribution of Orders Selected by AIC	71
3.5.3	Discussion	73
4	Statistical Modeling by AIC	75
4.1	Checking the Equality of Two Discrete Distributions	75
4.2	Determining the Bin Size of a Histogram	77
4.3	Equality of the Means and/or the Variances of Normal Distributions	79
4.4	Variable Selection for Regression Model	84
4.5	Generalized Linear Models	88
4.6	Selection of Order of Autoregressive Model	92
4.7	Detection of Structural Changes	96
4.7.1	Detection of Level Shift	96
4.7.2	Arrival Time of a Signal	99
4.8	Comparison of Shapes of Distributions	101
4.9	Selection of Box–Cox Transformations	104
5	Generalized Information Criterion (GIC)	107
5.1	Approach Based on Statistical Functionals	107
5.1.1	Estimators Defined in Terms of Statistical Functionals	107
5.1.2	Derivatives of the Functional and the Influence Function	111
5.1.3	Extension of the Information Criteria AIC and TIC . . .	115
5.2	Generalized Information Criterion (GIC)	118
5.2.1	Definition of the GIC	119
5.2.2	Maximum Likelihood Method: Relationship Among AIC, TIC, and GIC	124
5.2.3	Robust Estimation	128
5.2.4	Maximum Penalized Likelihood Methods	134

6	Statistical Modeling by GIC	139
6.1	Nonlinear Regression Modeling via Basis Expansions	139
6.2	Basis Functions	143
6.2.1	B -Splines	143
6.2.2	Radial Basis Functions	146
6.3	Logistic Regression Models for Discrete Data	149
6.3.1	Linear Logistic Regression Model	149
6.3.2	Nonlinear Logistic Regression Models	152
6.4	Logistic Discriminant Analysis	156
6.4.1	Linear Logistic Discrimination	157
6.4.2	Nonlinear Logistic Discrimination	159
6.5	Penalized Least Squares Methods	160
6.6	Effective Number of Parameters	162
7	Theoretical Development and Asymptotic Properties of the GIC	167
7.1	Derivation of the GIC	167
7.1.1	Introduction	167
7.1.2	Stochastic Expansion of an Estimator	170
7.1.3	Derivation of the GIC	171
7.2	Asymptotic Properties and Higher-Order Bias Correction	176
7.2.1	Asymptotic Properties of Information Criteria	176
7.2.2	Higher-Order Bias Correction	178
8	Bootstrap Information Criterion	187
8.1	Bootstrap Method	187
8.2	Bootstrap Information Criterion	192
8.2.1	Bootstrap Estimation of Bias	192
8.2.2	Bootstrap Information Criterion, EIC	195
8.3	Variance Reduction Method	195
8.3.1	Sampling Fluctuation by the Bootstrap Method	195
8.3.2	Efficient Bootstrap Simulation	196
8.3.3	Accuracy of Bias Correction	202
8.3.4	Relation Between Bootstrap Bias Correction Terms	205
8.4	Applications of Bootstrap Information Criterion	206
8.4.1	Change Point Model	206
8.4.2	Subset Selection in a Regression Model	208
9	Bayesian Information Criteria	211
9.1	Bayesian Model Evaluation Criterion (BIC)	211
9.1.1	Definition of BIC	211
9.1.2	Laplace Approximation for Integrals	213
9.1.3	Derivation of the BIC	215
9.1.4	Extension of the BIC	218
9.2	Akaike's Bayesian Information Criterion (ABIC)	222

9.3	Bayesian Predictive Distributions	224
9.3.1	Predictive Distributions and Predictive Likelihood	224
9.3.2	Information Criterion for Bayesian Normal Linear Models	226
9.3.3	Derivation of the PIC	227
9.3.4	Numerical Example	230
9.4	Bayesian Predictive Distributions by Laplace Approximation	231
9.5	Deviance Information Criterion (DIC)	236
10	Various Model Evaluation Criteria	239
10.1	Cross-Validation	239
10.1.1	Prediction and Cross-Validation	239
10.1.2	Selecting a Smoothing Parameter by Cross-Validation	242
10.1.3	Generalized Cross-Validation	243
10.1.4	Asymptotic Equivalence Between AIC-Type Criteria and Cross-Validation	245
10.2	Final Prediction Error (FPE)	247
10.2.1	FPE	247
10.2.2	Relationship Between the AIC and FPE	249
10.3	Mallows' C_p	251
10.4	Hannan–Quinn's Criterion	253
10.5	ICOMP	254

Information Criteria and Statistical Modeling

Konishi, S.; Kitagawa, G.

2008, XII, 276 p., Hardcover

ISBN: 978-0-387-71886-6
