

# Contents

<b>Contributors</b> .....	ix
<b>1. Synthetic Versatility and Structural Modularity in Organometallic Polymers</b> .....	1
Andrew J. Boydston and Christopher W. Bielawski	
<b>2. Hyperbranched Polymers Containing Transition Metals: Synthetic Pathways and Potential Applications</b> .....	21
Matthias Häußler, Hongchen Dong, and Ben Zhong Tang	
<b>3. Transition Metal <math>\sigma</math>-Acetylide Polymers Containing Main Group Elements in the Main Chain: Synthesis, Light Emission, and Optoelectronic Applications</b> .....	37
Wai-Yeung Wong	
<b>4. The Spectroscopy and Photophysical Behavior of Diphosphine- and Diisocyanide-Containing Coordination and Organometallic Oligomers and Polymers: Focus on Palladium and Platinum, Copper, Silver, and Gold</b> .....	71
Pierre D. Harvey	
<b>5. Metal Binding Studies of Ferrocene Peptides in Solution</b> .....	109
Francis E. Appoh and Heinz-Bernhard Kraatz	
<b>6. Metal Ion Binding to Ferrocene Peptide Dendrimer Films</b> .....	147
Francis E. Appoh and Heinz-Bernhard Kraatz	
<b>7. Iron-Containing Polymers with Azo Dyes in their Side Chains or Backbones</b> .....	173
Alaa S. Abd-El-Aziz and Patrick O. Shipman	
<b>8. Cisplatin Derivatives as Antiviral Agents</b> .....	193
Michael R. Roner and Charles E. Carraher, Jr.	

<b>9. Vanadocene-Containing Polymers . . . . .</b>	<b>225</b>
Theodore S. Sabir and Charles E. Carraher, Jr.	
<b>10. Hafnium-Containing Nanocomposites . . . . .</b>	<b>241</b>
A.D. Pomogailo, A.S. Rozenberg, G.I. Dzhardimalieva, A.M. Bochkin, S.I. Pomogailo, and N.D. Golubeva	
<b>11. Nanoscale Dendrimer-Platinum Conjugates as Multivalent Antitumor Drugs . . . . .</b>	<b>269</b>
Bob A. Howell, Daming Fan, and Leela Rakesh	
<b>12. Mössbauer Spectroscopy and Organotin Polymers . . . . .</b>	<b>295</b>
Anna Zhao, Charles E. Carraher Jr., Tiziana Fiore, Claudia Pellerito, Michelangelo Scopelliti, and Lorenzo Pellerito	
<b>13. Fundamentals of Fragmentation Matrix Assisted Laser Desorption/Ionization Mass Spectrometry . . . . .</b>	<b>329</b>
Charles E. Carraher Jr., Theodore S. Sabir, and Cara L. Carraher	
<b>14. Borazine Based Preceramic Polymers for Advanced BN Materials . . . . .</b>	<b>351</b>
Samuel Bernard, David Cornu, Sylvain Duperrier, Bérangère Toury and Philippe Miele	
<b>15. Recent Advances in High-Temperature Network Polymers of Carboranylenesiloxanes and Silarylene-Siloxanes . . . . .</b>	<b>373</b>
Manoj K. Kolel-Veetil and Teddy M. Keller	
<b>16. Antimony-Containing Polymers . . . . .</b>	<b>405</b>
Charles E. Carraher Jr.	
<b>17. Bacterial Inhibition by Organotin-Containing Polymers . . . . .</b>	<b>421</b>
Charles E. Carraher Jr., Yoshinobu Naoshima, Kazutaka Nagao, Yoshihiro Mori, Anna Zhao, Girish Barot, and Amitabh Battin	
<b>18. Polymeric Organotin Fibers . . . . .</b>	<b>449</b>
Girish Barot and Charles E. Carraher Jr.	
<b>Index . . . . .</b>	<b>465</b>

Inorganic and Organometallic Macromolecules

Design and Applications

Abd-El-Aziz, A.S.; Carraher, C.E.; Pittman, C.U.; Zeldin, M.

(Eds.)

2008, XII, 475 p., Hardcover

ISBN: 978-0-387-72946-6
