

# Contents

<b>Foreword</b> by Dan Kopans . . . . .	<b>vii</b>
<b>Preface</b> . . . . .	<b>ix</b>
<b>1 Fundamentals of Magnetic Resonance Imaging</b> . . . . .	<b>1</b>
Subatomic Particles . . . . .	3
The Atom . . . . .	4
Magnetic Dipole Moments . . . . .	6
Nuclear Magnetic Moments. . . . .	9
Tissue Magnetization . . . . .	10
Magnetic Fields . . . . .	13
Precession and Magnetic Resonance . . . . .	14
Tissue Excitation . . . . .	14
Measuring the Magnetic Resonance Signal. . . . .	15
The Basic Nuclear Magnetic Resonance Experiment . . . . .	16
Chapter Take-home Points . . . . .	16
References . . . . .	17
<b>2 Tissue Relaxation</b> . . . . .	<b>19</b>
Nuclear Magnetic Resonance . . . . .	19
T1 Relaxation. . . . .	21
T2 Relaxation. . . . .	23
Distinguishing T2 and T2* . . . . .	25
The Physical Basis of Relaxation Times . . . . .	28
Chapter Take-home Points . . . . .	29
References . . . . .	29
<b>3 Spatial Resolution in Magnetic Resonance Imaging</b> . . . . .	<b>31</b>
Basic Components of a Magnetic Resonance Imaging System. . . . .	31
Magnets . . . . .	31
Radiofrequency Transmitter Coils . . . . .	33

Radiofrequency Receiver Coils . . . . .	34
Magnetic Gradients . . . . .	35
Slice Selection in Magnetic Resonance Imaging . . . . .	36
Magnetic Resonance Imaging Pulse Sequence . . . . .	38
Forming a Magnetic Resonance Image . . . . .	41
Voxel Size . . . . .	42
k-Space. . . . .	42
Chapter Take-home Points . . . . .	44
References . . . . .	45
<b>4 The Spin-echo Pulse Sequence . . . . .</b>	<b>47</b>
Spin-echo Pulse Sequence Diagram . . . . .	47
Signal Dependence on TR and TE in Spin-echo Imaging . . . . .	51
Contrast in Spin-echo Imaging . . . . .	53
Acquisition Times in Spin-echo Imaging . . . . .	56
Multi-slice Imaging . . . . .	56
Chapter Take-home Points . . . . .	58
References . . . . .	58
<b>5 Gradient Echo Sequences and 3D Imaging . . . . .</b>	<b>59</b>
The Gradient-echo Pulse Sequence Diagram . . . . .	60
Variants of Gradient-echo Imaging . . . . .	63
Signal Dependence on TR, TE, and $\theta$ in Spoiled	
Gradient-echo Imaging . . . . .	64
Contrast in Spoiled Gradient-echo Pulse Sequences . . . . .	66
Steady-state Gradient-echo Imaging . . . . .	67
Total Acquisition Time in 2D Gradient-echo Imaging . . . . .	68
3D Gradient-echo Imaging . . . . .	69
Chapter Take-home Points . . . . .	72
References . . . . .	73
Suggested Reading . . . . .	73
<b>6 Fast-spin Echo, Echo Planar, Inversion Recovery,</b>	
<b>    and Short-T1 Inversion Recovery Imaging . . . . .</b>	<b>75</b>
Fast Spin-echo Imaging . . . . .	75
Echo-planar Imaging . . . . .	80
Inversion Recovery and Short-T1 Inversion Recovery Imaging . . . . .	83
Real and Magnitude Reconstructions of IR Spin-echo Signal. . . . .	86
Short T1 Inversion Recovery Imaging . . . . .	87
Chapter Take-home Points . . . . .	89
References . . . . .	91

<b>7</b>	<b>Signal, Noise, Signal-to-Noise, and Contrast-to-Noise Ratios . . . . .</b>	<b>93</b>
	Magnetic Resonance Signal . . . . .	93
	Noise in a Magnetic Resonance Image . . . . .	94
	System Parameters Affecting Noise . . . . .	99
	Volume of the Radiofrequency Receiver Coil . . . . .	99
	Receiver Bandwidth . . . . .	99
	Signal-to-Noise Ratios . . . . .	100
	Effect of Magnetic Field Strength on Signal-to-Noise Ratios . . . . .	101
	Effect of User-selectable Image Acquisition Parameters on Signal-to-Noise Ratios . . . . .	102
	Effects of TR, TE, and Flip Angle on Signal-to-Noise Ratios . . . . .	102
	Effect of Spatial Parameters on Signal-to-Noise Ratios . . . . .	102
	Effect of Slice Thickness on Signal-to-Noise Ratios . . . . .	103
	Effect of the Number of Frequency-encoding Steps . . . . .	104
	Effect of the Number of Phase-encoding Steps . . . . .	105
	Putting Together All Factors Affecting Signal-to-Noise Ratios . . . . .	105
	Signal-to-Noise Ratios in 2D (Planar) Imaging . . . . .	106
	Signal-to-Noise Ratios in 3D (Volume) Imaging . . . . .	107
	Contrast and Contrast-to-Noise Ratios . . . . .	107
	The Rose Model . . . . .	108
	Effect of Image Addition on Signal, Noise, Signal-to-Noise Ratios and Contrast-to-Noise Ratios . . . . .	109
	Effect of Image Subtraction on Signal, Noise, Signal-to-Noise Ratios and Contrast-to-Noise Ratios . . . . .	110
	Chapter Take-home Points . . . . .	111
	References . . . . .	111
<b>8</b>	<b>Contrast Agents in Breast Magnetic Resonance Imaging . . . . .</b>	<b>113</b>
	A Brief History of Contrast Media in the Breast . . . . .	113
	Gadolinium-based Contrast Agents . . . . .	113
	The Physiologic Basis of Contrast Enhancement . . . . .	118
	Dosage of Gadolinium-chelated Contrast Agents . . . . .	120
	Safety of Gadolinium-chelated Contrast Agents . . . . .	120
	Possible Adverse Events Resulting from Gadolinium-chelates . . . . .	121
	Nephrogenic Systemic Fibrosis: A New Adverse Event of Gadolinium-chelates . . . . .	122
	Sensitivity and Specificity of Contrast-enhanced Breast Magnetic Resonance Imaging . . . . .	123
	Timing of Pulse Sequences After Contrast Injection . . . . .	125
	Temporal Resolution in Contrast-enhanced Breast Magnetic Resonance Imaging . . . . .	126
	Trade-offs Between Adequate Temporal Resolution and Adequate Spatial Resolution . . . . .	129

Obtaining High Temporal Resolution and High Spatial Resolution	
Contrast-enhanced Studies . . . . .	130
Enhancement of Normal Fibroglandular Tissues	
in Pre-menopausal Women . . . . .	130
Chapter Take-home Points . . . . .	131
References . . . . .	132
Suggested Reading . . . . .	134
<b>9 Breast Magnetic Resonance Imaging Acquisition Protocols . . . . .</b>	<b>135</b>
Essential Elements of an Image Acquisition Protocol . . . . .	135
Pre-contrast T1-weighted Non-fat-saturated Pulse Sequence . . . . .	136
Pre-contrast T2-weighted Sequences . . . . .	137
Contrast-enhanced Sequences . . . . .	139
Magnetic Field Strength of at Least 1.5 T and High Magnetic	
Field Homogeneity . . . . .	142
Bilateral Imaging with Prone Positioning . . . . .	142
3D Gradient-echo T1-weighted Pulse Sequences	
for Contrast-enhanced Imaging . . . . .	144
Good Fat Suppression over Both Breasts in Contrast-enhanced	
Breast Magnetic Resonance Imaging . . . . .	145
Adequately Thin Image Slices . . . . .	145
Pixel Sizes of Less than 1 mm in Each in-plane Direction . . . . .	146
Proper Selection of the Phase-encoding Direction to Minimize	
Artifacts Across the Breasts . . . . .	147
A Total 3D Fourier Transform Acquisition Time	
for Both Breasts of Less than 2 Minutes . . . . .	149
Meeting Temporal <i>and</i> Spatial Resolution Requirements	
in 3D Gradient-echo Imaging . . . . .	150
Time-saving Measures in 3D Gradient-echo Imaging . . . . .	151
Optimizing Contrast-enhanced Studies . . . . .	161
Examples of Contrast-enhanced Scanning Protocols Meeting	
Temporal and Spatial Requirements . . . . .	162
Examples of Deficient Contrast-enhanced Protocols . . . . .	163
Chapter Take-home Points . . . . .	168
References . . . . .	168
<b>10 Image Post-processing Protocols . . . . .</b>	<b>171</b>
Automated or Prescribed Post-processing Techniques . . . . .	171
Image Subtraction and Re-registration . . . . .	172
Maximum Intensity Projections of Subtracted Data . . . . .	174
Multiplanar Image Reconstruction . . . . .	177
Creation of Enhancement Maps Based on Multiple	
Time Point Acquisitions . . . . .	179

Creation of Time-enhancement Curves for Suspicious Enhancing Lesions . . . . .	182
Breast Magnetic Resonance Imaging Computer-aided Diagnosis Workstations. . . . .	184
Chapter Take-home Points . . . . .	185
References . . . . .	185
<b>11 Artifacts and Errors in Breast Magnetic Resonance Imaging . . . . .</b>	<b>187</b>
Artifacts . . . . .	187
Ghost Artifacts . . . . .	187
Aliasing Artifacts . . . . .	190
Truncation Artifacts . . . . .	193
Chemical Shift Artifacts . . . . .	194
Metallic Artifacts . . . . .	196
Radiofrequency Transmission Artifacts . . . . .	198
Reconstruction Artifacts . . . . .	200
Other Randomly Occurring Image Artifacts . . . . .	201
Other Equipment and User Errors . . . . .	202
Chapter Take-home Points . . . . .	206
References . . . . .	207
<b>12 Magnetic Resonance Imaging Safety and Patient     Considerations . . . . .</b>	<b>209</b>
Static Magnetic Fields . . . . .	210
Magnetic Shielding . . . . .	210
Metallic Objects in the Scan Room . . . . .	210
Gradient Magnetic Fields . . . . .	214
Acoustic Noise During MR Scanning . . . . .	214
Radiofrequency Fields . . . . .	215
Other Patient and Personnel Safety Considerations . . . . .	216
Patients, Visitors, or Site Personnel with Metallic Implants and Devices . . . . .	216
Pregnant Patients or Technologists . . . . .	217
Cryogens and Quenches . . . . .	218
Chapter Take-home Points . . . . .	219
References . . . . .	219
<b>13 New Developments in Breast Magnetic Resonance Imaging . . . . .</b>	<b>221</b>
Higher Field Systems . . . . .	221
Dedicated Breast Magnetic Resonance Imaging Systems . . . . .	223
Dedicated Breast Magnetic Resonance Imaging Table and Coils . . . . .	224
Novel Techniques to Improve the Specificity of Breast Magnetic Resonance Imaging . . . . .	225

Diffusion-weighted Breast Imaging . . . . .	226
Perfusion Imaging of the Breast . . . . .	227
Choline Peak in Hydrogen Spectroscopy . . . . .	228
Combining Novel Magnetic Resonance Imaging Techniques to Gain Specificity . . . . .	231
The Choline Peak in $^1\text{H}$ Spectroscopy as a Predictor of Treatment Response . . . . .	231
Spectroscopic Imaging . . . . .	232
Conclusion . . . . .	232
Chapter Take-home Points . . . . .	234
References . . . . .	234
<b>Appendix: Magnetic Resonance Imaging Patient and Non-Patient Screening Forms . . . . .</b>	<b>237</b>
<b>Index . . . . .</b>	<b>243</b>

Breast MRI

Fundamentals and Technical Aspects

Hendrick, R.E.

2008, XVI, 254 p. 131 illus., 42 illus. in color., Hardcover
