

# Contents

<b>Introduction</b> .....	1
<hr/>	
<b>Part I From Microscopic Dynamics to Mesoscopic Kinematics</b>	
<hr/>	
<b>1</b> <b>Heuristics: Microscopic Model and Space–Time Scales</b> .....	9
<b>2</b> <b>Deterministic Dynamics in a Lattice Model and a Mesoscopic       (Stochastic) Limit</b> .....	15
<b>3</b> <b>Proof of the Mesoscopic Limit Theorem</b> .....	31
<hr/>	
<b>Part II Mesoscopic A: Stochastic Ordinary Differential Equations</b>	
<hr/>	
<b>4</b> <b>Stochastic Ordinary Differential Equations: Existence, Uniqueness,       and Flows Properties</b> .....	59
4.1 Preliminaries .....	59
4.2 The Governing Stochastic Ordinary Differential Equations .....	64
4.3 Equivalence in Distribution and Flow Properties for SODEs .....	73
4.4 Examples .....	78
<b>5</b> <b>Qualitative Behavior of Correlated Brownian Motions</b> .....	85
5.1 Uncorrelated and Correlated Brownian Motions .....	85
5.2 Shift and Rotational Invariance of $w(dq, dt)$ .....	92
5.3 Separation and Magnitude of the Separation of Two Correlated Brownian Motions with Shift-Invariant and Frame-Indifferent Integral Kernels .....	94
5.4 Asymptotics of Two Correlated Brownian Motions with Shift-Invariant and Frame-Indifferent Integral Kernels .....	105

5.5	Decomposition of a Diffusion into the Flux and a Symmetric Diffusion	110
5.6	Local Behavior of Two Correlated Brownian Motions with Shift-Invariant and Frame-Indifferent Integral Kernels	116
5.7	Examples and Additional Remarks	121
5.8	Asymptotics of Two Correlated Brownian Motions with Shift-Invariant Integral Kernels	128
<b>6</b>	<b>Proof of the Flow Property</b>	<b>133</b>
6.1	Proof of Statement 3 of Theorem 4.5	133
6.2	Smoothness of the Flow	138
<b>7</b>	<b>Comments on SODEs: A Comparison with Other Approaches</b>	<b>151</b>
7.1	Preliminaries and a Comparison with Kunita's Model	151
7.2	Examples of Correlation Functions	156

---

### Part III Mesoscopic B: Stochastic Partial Differential Equations

---

<b>8</b>	<b>Stochastic Partial Differential Equations: Finite Mass and Extensions</b>	<b>163</b>
8.1	Preliminaries	163
8.2	A Priori Estimates	171
8.3	Noncoercive SPDEs	174
8.4	Coercive and Noncoercive SPDEs	189
8.5	General SPDEs	197
8.6	Semilinear Stochastic Partial Differential Equations in Stratonovich Form	198
8.7	Examples	200
<b>9</b>	<b>Stochastic Partial Differential Equations: Infinite Mass</b>	<b>203</b>
9.1	Noncoercive Quasilinear SPDEs for Infinite Mass Evolution	203
9.2	Noncoercive Semilinear SPDEs for Infinite Mass Evolution in Stratonovich Form	219
<b>10</b>	<b>Stochastic Partial Differential Equations: Homogeneous and Isotropic Solutions</b>	<b>221</b>
<b>11</b>	<b>Proof of Smoothness, Integrability, and Itô's Formula</b>	<b>229</b>
11.1	Basic Estimates and State Spaces	229
11.2	Proof of Smoothness of (8.25) and (8.73)	246
11.3	Proof of the Itô formula (8.42)	269
<b>12</b>	<b>Proof of Uniqueness</b>	<b>273</b>

<b>13</b>	<b>Comments on Other Approaches to SPDEs</b>	291
13.1	Classification	291
13.1.1	Linear SPDEs	294
13.1.2	Bilinear SPDEs	297
13.1.3	Semilinear SPDEs	299
13.1.4	Quasilinear SPDEs	301
13.1.5	Nonlinear SPDEs	301
13.1.6	Stochastic Wave Equations	302
13.2	Models	302
13.2.1	Nonlinear Filtering	302
13.2.2	SPDEs for Mass Distributions	303
13.2.3	Fluctuation Limits for Particles	304
13.2.4	SPDEs in Genetics	305
13.2.5	SPDEs in Neuroscience	305
13.2.6	SPDEs in Euclidean Field Theory	306
13.2.7	SPDEs in Fluid Mechanics	306
13.2.8	SPDEs in Surface Physics/Chemistry	308
13.2.9	SPDEs for Strings	308
13.3	Books on SPDEs	308

---

## Part IV Macroscopic: Deterministic Partial Differential Equations

---

<b>14</b>	<b>Partial Differential Equations as a Macroscopic Limit</b>	313
14.1	Limiting Equations and Hypotheses	313
14.2	The Macroscopic Limit for $d \geq 2$	316
14.3	Examples	327
14.4	A Remark on $d = 1$	330
14.5	Convergence of Stochastic Transport Equations to Macroscopic Parabolic Equations	331

---

## Part V General Appendix

---

<b>15</b>	<b>Appendix</b>	335
15.1	Analysis	335
15.1.1	Metric Spaces: Extension by Continuity, Contraction Mappings, and Uniform Boundedness	335
15.1.2	Some Classical Inequalities	336
15.1.3	The Schwarz Space	340
15.1.4	Metrics on Spaces of Measures	348
15.1.5	Riemann Stieltjes Integrals	357
15.1.6	The Skorokhod Space $D([0, \infty); \mathbf{B})$	359
15.2	Stochastics	362
15.2.1	Relative Compactness and Weak Convergence	362

15.2.2 Regular and Cylindrical Hilbert Space-Valued Brownian Motions . . . . .	366
15.2.3 Martingales, Quadratic Variation, and Inequalities . . . . .	371
15.2.4 Random Covariance and Space-time Correlations for Correlated Brownian Motions . . . . .	380
15.2.5 Stochastic Itô Integrals . . . . .	387
15.2.6 Stochastic Stratonovich Integrals . . . . .	403
15.2.7 Markov-Diffusion Processes . . . . .	411
15.2.8 Measure-Valued Flows: Proof of Proposition 4.3 . . . . .	418
15.3 The Fractional Step Method . . . . .	422
15.4 Mechanics: Frame-Indifference . . . . .	424
<b>Subject Index . . . . .</b>	<b>431</b>
<b>Symbols . . . . .</b>	<b>439</b>
<b>References . . . . .</b>	<b>445</b>

Stochastic Ordinary and Stochastic Partial Differential  
Equations

Transition from Microscopic to Macroscopic Equations

Kotelenez, P.

2008, X, 459 p., Hardcover

ISBN: 978-0-387-74316-5
