Part I Collaborative Signal Processing Algorithms

1 Collaborative Adaptive Filters for Online Knowledge Extraction and Information Fusion

<i>Beth Jelfs, Phebe Vayanos, Soroush Javidi, Vanessa Su Lee Goh, and Danilo P. Mandic</i>	3
1.1 Introduction	3
1.1.1 Previous Online Approaches	5
1.1.2 Collaborative Adaptive Filters	6
1.2 Derivation of The Hybrid Filter	7
1.3 Detection of the Nature of Signals: Nonlinearity	8
1.3.1 Tracking Changes in Nonlinearity of Signals	10
1.4 Detection of the Nature of Signals: Complex Domain	12
1.4.1 Split-Complex vs. Fully-Complex	13
1.4.2 Complex Nature of Wind	17
1.5 Conclusions	19
References	20

2 Wind Modelling and its Possible Application to Control of Wind Farms

<i>Yoshito Hirata, Hideyuki Suzuki, and Kazuyuki Aihara</i>	23
2.1 Formulating Yaw Control for a Wind Turbine	23
2.2 Characteristics for Time Series of the Wind	25
2.2.1 Surrogate Data	25
2.2.2 Results	25
2.3 Modelling and Predicting the Wind	27
2.3.1 Multivariate Embedding	27
2.3.2 Radial Basis Functions	28
2.3.3 Possible Coordinate Systems	30
2.3.4 Direct vs. Iterative Methods	30
2.3.5 Measurements of the Wind	30
2.3.6 Results	32

XII Contents

2.4	Applying the Wind Prediction to the Yaw Control	34
2.5	Conclusions	34
	References	35

**3 Hierarchical Filters in a Collaborative Filtering Framework
for System Identification and Knowledge Retrieval**

	<i>Christos Boukis and Anthony G. Constantinides</i>	37
3.1	Introduction	37
3.2	Hierarchical Structures	39
	3.2.1 Generalised Structures	40
	3.2.2 Equivalence with FIR	41
3.3	Multilayer Adaptive Algorithms	43
	3.3.1 The Hierarchical Least Mean Square Algorithm	43
	3.3.2 Evaluation of the Performance of HLMS	44
	3.3.3 The Hierarchical Gradient Descent Algorithm	45
3.4	Applications	46
	3.4.1 Standard Filtering Applications	46
	3.4.2 Knowledge Extraction	47
3.5	Conclusions	49
A	Mathematical Analysis of the HLMS	50
	References	53

**4 Acoustic Parameter Extraction From Occupied Rooms
Utilizing Blind Source Separation**

	<i>Yonggang Zhang and Jonathon A. Chambers</i>	55
4.1	Introduction	55
4.2	Blind Estimation of Room RT in Occupied Rooms	57
	4.2.1 MLE-Based RT Estimation Method	57
	4.2.2 Proposed Noise Reducing Preprocessing	59
4.3	A Demonstrative Study	60
	4.3.1 Blind Source Separation	62
	4.3.2 Adaptive Noise Cancellation	65
4.4	Simulation Results	67
4.5	Discussion	72
4.6	Conclusion	73
	References	74

Part II Signal Processing for Source Localization

**5 Sensor Network Localization Using Least Squares
Kernel Regression**

	<i>Anthony Kuh and Chaopin Zhu</i>	77
5.1	Introduction	77
5.2	Sensor Network Model	80
5.3	Localization Using Classification Methods	81

5.4	Least Squares Subspace Kernel Regression Algorithm	82
5.4.1	Least Squares Kernel Subspace Algorithm	82
5.4.2	Recursive Kernel Subspace Least Squares Algorithm	84
5.5	Localization Using Kernel Regression Algorithms	85
5.5.1	Centralized Kernel Regression	85
5.5.2	Kernel Regression for Mobile Sensors	86
5.5.3	Distributed Kernel Regression	87
5.6	Simulations	89
5.6.1	Stationary Motes	90
5.6.2	Mobile Motes	91
5.6.3	Distributed Algorithm	92
5.7	Summary and Further Directions	93
	References	94

6 Adaptive Localization in Wireless Networks

*Henning Lenz, Bruno Betoni Parodi, Hui Wang, Andrei Szabo,
Joachim Bamberger, Dragan Obradovic, Joachim Horn,
and Uwe D. Hanebeck*

		97
6.1	Introduction	97
6.2	RF Propagation Modelling	98
6.2.1	Characteristics of the Indoor Propagation Channel	99
6.2.2	Parametric Channel Models	99
6.2.3	Geo Map-Based Models	100
6.2.4	Non-Parametric Models	102
6.3	Localization Solution	103
6.4	Simultaneous Localization and Learning	104
6.4.1	Kohonen SOM	105
6.4.2	Main Algorithm	106
6.4.3	Comparison Between SOM and SLL	107
6.4.4	Convergence Properties of SLL	107
6.4.5	Statistical Conditions for SLL	113
6.5	Results on 2D Real-World Scenarios	116
6.6	Conclusions	118
	References	119

7 Signal Processing Methods for Doppler Radar Heart Rate Monitoring

*Anders Høst-Madsen, Nicolas Petrochilos, Olga Boric-Lubecke,
Victor M. Lubecke, Byung-Kwon Park, and Qin Zhou*

		121
7.1	Introduction	121
7.2	Signal Model	123
7.2.1	Physiological Signal Model	125
7.3	Single Person Signal Processing	126
7.3.1	Demodulation	126
7.3.2	Detection of Heartbeat and Estimation of Heart Rate	127

XIV Contents

7.4	Multiple People Signal Processing	132
7.4.1	Heartbeat Signal	133
7.4.2	Algorithm	133
7.4.3	Results	134
7.5	Conclusion	138
	References	139

8 Multimodal Fusion for Car Navigation Systems

<i>Dragan Obradovic, Henning Lenz, Markus Schupfner,</i>	
<i>and Kai Heesche</i>	
8.1	Introduction
8.2	Kalman Filter-Based Sensor Fusion for Dead Reckoning Improvement
8.3	Map Matching Improvement by Pattern Recognition
8.3.1	Generation of Feature Vectors by State Machines
8.3.2	Evaluation of Certainties of Road Alternatives Based on Feature Vector Comparison
8.4	Fuzzy Guidance
8.5	Conclusions
	References

Part III Information Fusion in Imaging

9 Cue and Sensor Fusion for Independent Moving Objects

Detection and Description in Driving Scenes

<i>N. Chumerin and M.M. Van Hulle</i>		161
9.1	Introduction	161
9.2	Vision Sensor Data Processing.....	164
9.2.1	Vision Sensor Setup	164
9.2.2	Independent Motion Stream.....	165
9.2.3	Recognition Stream	167
9.2.4	Training	168
9.2.5	Visual Streams Fusion	170
9.3	IMO Detection and Tracking	171
9.4	Classification and Description of the IMOs	171
9.5	LIDAR Sensor Data Processing.....	172
9.5.1	LIDAR Sensor Setup	172
9.5.2	Ground Plane Estimation	173
9.5.3	LIDAR Obstacles Projection	175
9.6	Vision and LIDAR Fusion	175
9.7	Results	176
9.8	Conclusions and Future Steps	177
References		178

10 Distributed Vision Networks for Human Pose Analysis

<i>Hamid Aghajan, Chen Wu, and Richard Kleihorst</i>	181
10.1 Introduction	181
10.2 A Unifying Framework	183
10.3 Smart Camera Networks	184
10.4 Opportunistic Fusion Mechanisms	185
10.5 Human Posture Estimation	187
10.6 The 3D Human Body Model	189
10.7 In-Node Feature Extraction	190
10.8 Collaborative Posture Estimation	192
10.9 Towards Behavior Interpretation	195
10.10 Conclusions	198
References	199

11 Skin Color Separation and Synthesis for E-Cosmetics

<i>Norimichi Tsumura, Nobutoshi Ojima, Toshiya Nakaguchi, and Yoichi Miyake</i>	201
11.1 Introduction	201
11.2 Image-Based Skin Color Analysis and Synthesis	203
11.3 Shading Removal by Color Vector Space Analysis: Simple Inverse Lighting Technique	205
11.3.1 Imaging Model	205
11.3.2 Finding the Skin Color Plane in the Face and Projection Technique for Shading Removal	208
11.4 Validation of the Analysis	210
11.5 Image-Based Skin Color and Texture Analysis/Synthesis	211
11.6 Data-Driven Physiologically Based Skin Texture Control	212
11.7 Conclusion and Discussion	218
References	219

12 ICA for Fusion of Brain Imaging Data

<i>Vince D. Calhoun and Tülay Adalı</i>	221
12.1 Introduction	221
12.2 An Overview of Different Approaches for Fusion	223
12.3 A Brief Description of Imaging Modalities and Feature Generation	224
12.3.1 Functional Magnetic Resonance Imaging	224
12.3.2 Structural Magnetic Resonance Imaging	226
12.3.3 Diffusion Tensor Imaging	226
12.3.4 Electroencephalogram	227
12.4 Brain Imaging Feature Generation	228
12.5 Feature-Based Fusion Framework Using ICA	228
12.6 Application of the Fusion Framework	230
12.6.1 Multitask fMRI	231
12.6.2 Functional Magnetic Resonance Imaging–Structural Functional Magnetic Resonance Imaging	231

12.6.3 Functional Magnetic Resonance Imaging–Event-Related Potential	233
12.6.4 Structural Magnetic Resonance Imaging–Diffusion Tensor Imaging	233
12.6.5 Parallel Independent Component Analysis	235
12.7 Selection of Joint Components	235
12.8 Conclusion	237
References	237

Part IV Knowledge Extraction in Brain Science

13 Complex Empirical Mode Decomposition for Multichannel Information Fusion

<i>Danilo P. Mandic, George Souretis, Wai Yie Leong, David Looney, Marc M. Van Hulle, and Toshihisa Tanaka</i>	243
13.1 Introduction	243
13.1.1 Data Fusion Principles	244
13.2 Empirical Mode Decomposition	244
13.3 Ensemble Empirical Mode Decomposition	247
13.4 Extending EMD to the Complex Domain	249
13.4.1 Complex Empirical Mode Decomposition	251
13.4.2 Rotation Invariant Empirical Mode Decomposition	254
13.4.3 Complex EMD as Knowledge Extraction Tool for Brain Prosthetics	254
13.5 Empirical Mode Decomposition as a Fixed Point Iteration	257
13.6 Discussion and Conclusions	258
References	259

14 Information Fusion for Perceptual Feedback: A Brain Activity Sonification Approach

<i>Tomasz M. Rutkowski, Andrzej Cichocki, and Danilo P. Mandic</i>	261
14.1 Introduction	261
14.2 Principles of Brain Sonification	263
14.3 Empirical Mode Decomposition	264
14.3.1 EEG and EMD: A Match Made in Heaven?	265
14.3.2 Time–Frequency Analysis of EEG and MIDI Representation	269
14.4 Experiments	271
14.5 Conclusions	272
References	273

15 Advanced EEG Signal Processing in Brain Death Diagnosis

<i>Jianting Cao and Zhe Chen</i>	275
15.1 Introduction	275

15.2	Background and EEG Recordings	276
15.2.1	Diagnosis of Brain Death	276
15.2.2	EEG Preliminary Examination and Diagnosis System	276
15.2.3	EEG Recordings	278
15.3	EEG Signal Processing	279
15.3.1	A Model of EEG Signal Analysis	280
15.3.2	A Robust Prewhitening Method for Noise Reduction	280
15.3.3	Independent Component Analysis	283
15.3.4	Fourier Analysis and Time–Frequency Analysis	285
15.4	EEG Preliminary Examination with ICA	285
15.4.1	Extracted EEG Brain Activity from Comatose Patients	286
15.4.2	The Patients Without EEG Brain Activities	287
15.5	Quantitative EEG Analysis with Complexity Measures	288
15.5.1	The Approximate Entropy	289
15.5.2	The Normalized Singular Spectrum Entropy	290
15.5.3	The C_0 Complexity	291
15.5.4	Detrended Fluctuation Analysis	292
15.5.5	Quantitative Comparison Results	292
15.5.6	Classification	295
15.6	Conclusion and Future Study	296
	References	297
 16 Automatic Knowledge Extraction: Fusion of Human Expert Ratings and Biosignal Features for Fatigue Monitoring Applications		
	<i>Martin Golz and David Sommer</i>	299
16.1	Introduction	299
16.2	Fatigue Monitoring	301
16.2.1	Problem	301
16.2.2	Human Expert Ratings	302
16.2.3	Experiments	303
16.2.4	Feature Extraction	305
16.3	Feature Fusion and Classification	306
16.3.1	Learning Vector Quantization	307
16.3.2	Automatic Relevance Determination	308
16.3.3	Support Vector Machines	309
16.4	Results	310
16.4.1	Feature Fusion	310
16.4.2	Feature Relevance	312
16.4.3	Intra-Subject and Inter-Subject Variability	313
16.5	Conclusions and Future Work	314
	References	315
	Index	317

Signal Processing Techniques for Knowledge Extraction
and Information Fusion

Mandic, D.; Golz, M.; Kuh, A.; Obradovic, D.; Tanaka, T.
(Eds.)

2008, XXII, 320 p., Hardcover

ISBN: 978-0-387-74366-0
