# Contents

<b>Introduction</b> .....	1
<b>Notation</b> .....	3
<b>1 Basic Concepts and Ideas</b> .....	5
1.1 The Scope of Global Optimization .....	5
1.1.1 General Minimization Problem .....	5
1.1.2 Global Minimization Versus Local Minimization .....	8
1.1.3 Combining Locality and Globality of Search .....	10
1.1.4 Theory and Heuristics .....	12
1.2 Stochastic Methods .....	13
1.2.1 Determinism Versus Stochasticity .....	14
1.2.2 Methods Based on Statistical Models .....	17
1.2.3 Basic Ideas of Global Random Search .....	18
1.3 Testing, Software and Applications .....	19
1.3.1 Testing .....	19
1.3.2 Software .....	22
1.3.3 Applications .....	23
<b>2 Global Random Search: Fundamentals and Statistical</b>	
<b>Inference</b> .....	29
2.1 Introduction to Global Random Search .....	29
2.1.1 Main Assumptions .....	29
2.1.2 Formal Scheme of Global Random Search Algorithms ..	33
2.1.3 Convergence of Global Random Search Algorithms ....	34
2.1.4 Random Errors in Observations .....	36
2.2 Pure Random and Pure Adaptive Search Algorithms .....	38
2.2.1 Pure Random Search and the Associated c.d.f. ....	38
2.2.2 Rate of Convergence of Pure Random Search .....	41
2.2.3 Pure Adaptive Search and Related Methods .....	48
2.2.4 Pure Adaptive Search of Order $k$ .....	50

2.3	Order Statistics and Record Values: Probabilistic Aspects . . . .	51
2.3.1	Order Statistics: Non-Asymptotic Properties . . . . .	52
2.3.2	Extreme Order Statistics: Asymptotic Properties . . . . .	54
2.3.3	Record Values and Record Moments . . . . .	59
2.4	Statistical Inference About $m$ : Known Value of the Tail Index .	64
2.4.1	Estimation of $m$ . . . . .	65
2.4.2	Confidence Intervals and Hypothesis Testing . . . . .	73
2.4.3	Choice of $n$ and $k$ . . . . .	73
2.5	Unknown Value of the Tail Index . . . . .	75
2.5.1	Statistical Inference . . . . .	75
2.5.2	Using an Incorrect Value of the Tail Index . . . . .	77
2.5.3	Exact Determination of the Value of the Tail Index . . . .	80
2.6	Some Algorithmic and Methodological Aspects . . . . .	81
2.6.1	Using Statistical Inference in Global Random Search . . .	81
2.6.2	Statistical Inference in Random Multistart . . . . .	85
2.6.3	Sampling on Surfaces . . . . .	88
2.7	Proofs . . . . .	90
<b>3</b>	<b>Global Random Search: Extensions . . . . .</b>	<b>93</b>
3.1	Random and Semi-Random Coverings . . . . .	93
3.1.1	Covering with Balls and Optimization . . . . .	94
3.1.2	Dispersion . . . . .	99
3.1.3	Uniform Sequences and Discrepancies . . . . .	106
3.2	Comparison of Stratified and Independent Sampling Schemes .	110
3.2.1	Stratified Sampling . . . . .	110
3.2.2	Asymptotic Criteria . . . . .	112
3.2.3	Stochastic Dominance with Respect to Record Values .	114
3.3	Markovian Algorithms . . . . .	115
3.3.1	Construction of Markovian Algorithms . . . . .	115
3.3.2	Simulated Annealing . . . . .	117
3.4	Markov Monotonous Search . . . . .	122
3.4.1	Statement of the Problem . . . . .	123
3.4.2	Lower Bounds . . . . .	128
3.4.3	Homogeneous Search . . . . .	128
3.5	Methods of Generations . . . . .	132
3.5.1	Construction of Algorithms and Their Convergence . . .	132
3.5.2	Special Cases; Genetic Algorithms . . . . .	137
3.5.3	Homogeneous Transition Probabilities . . . . .	141
3.6	Proofs . . . . .	144
<b>4</b>	<b>Statistical Models . . . . .</b>	<b>149</b>
4.1	Statistical Models . . . . .	149
4.1.1	Introduction . . . . .	149
4.1.2	Random Processes . . . . .	150
4.1.3	Random Fields . . . . .	154

4.1.4	Axiomatic Definition of a Statistical Model	155
4.1.5	Response Surfaces	159
4.1.6	Estimation of Parameters	160
4.1.7	Illustrative Comparison	161
4.2	Methods	164
4.2.1	Introduction	164
4.2.2	Passive Methods	166
4.2.3	Bayesian Methods	168
4.2.4	P-algorithm	170
4.2.5	Information Theory Based Approach	174
4.2.6	Response Surface Based Methods	176
4.2.7	Modifications	180
4.2.8	Proofs of Theorems	181
4.3	One-dimensional Algorithms	184
4.3.1	Introduction	184
4.3.2	One-step Bayesian Algorithm	184
4.3.3	P-algorithm	185
4.3.4	P-algorithm for a Model with Derivatives	188
4.3.5	Comparison of P-algorithms	190
4.3.6	$P^*$ -algorithm	192
4.3.7	Convergence	193
4.3.8	Convergence Rates	194
4.3.9	Probabilistic Convergence Rates	200
4.3.10	Testing and Applications	203
4.3.11	Proofs of Theorems and Lemmas	206
4.4	Multidimensional Algorithms	221
4.4.1	Introduction	221
4.4.2	P-algorithm	221
4.4.3	Two Dimensional Select and Clone	224
4.4.4	P-algorithm With Simplicial Partitioning	227
4.4.5	Testing	233
4.4.6	Proofs of Theorems	240
	<b>References</b>	245
	<b>Index</b>	259

Stochastic Global Optimization

Zhigljavsky, A.; Žilinskas, A.

2008, X, 262 p., Hardcover

ISBN: 978-0-387-74022-5
