Preface	v
Contributors	xxi
1 A Comprehensive Movement Compatibility Study for Hong Kong Chinese	1
W.H. Chan and Alan H.S. Chan	
1.1 Introduction	1
1.2 Methods	4
1.2.1 Experimental Design	4
1.2.2 Subjects	4
1.3 Results and Discussion	4
1.3.1 Response Preference and Mean Stereotype Strength	4
1.3.2 Reversibility	7
1.3.3 Response Time	8
1.4 Conclusion and Recommendations	9
References	10
2 A Study of Comparative Design Satisfaction Between Culture and Modern Bamboo Chair	13
Vanchai Laemlaksaku and Sittichai Kaewkuekool	
2.1 Introduction	13
2.2 Methodology	14
2.2.1 Design and Fabrication	14
2.2.2 Sample Selection	17
2.2.3 Questionnaire	17
2.3 Results	18
2.3.1 Dimensional Appropriateness of Chair	18
2.3.2 Comfort Level of Chair	21

2.4	Conclusions	24
2.4.1	Dimensional Appropriateness of the Chair	24
2.4.2	Comfort Level	24
2.4.3	Aesthetic Appeal of the Modern Bamboo Chair	25
2.5	Recommendations	25
	References	25
3	Factors Influencing Symbol-Training Effectiveness	27
	Annie W.Y. Ng and Alan H.S. Chan	
3.1	Introduction	27
3.2	Factors Influencing Symbol-Training Effectiveness	28
3.2.1	Training Method	28
3.2.2	Other Training Factors	34
3.3	Experimental Design and Analysis for Symbol-Training Effectiveness Research	34
3.4	Conclusion	36
	References	36
4	Multiple-Colony Ant Algorithm with Forward–Backward Scheduling Approach for Job-Shop Scheduling Problem	39
	Apinanthana Udomsakdigool and Voratas Kachitvichyanukul	
4.1	Introduction	39
4.2	Problem Definition and Graph-Based Representation	40
4.2.1	Problem Definition	40
4.2.2	Graph-Based Representation	41
4.2.3	The General Concept of ACO Algorithm	42
4.2.4	Memory Requirement for Ant and Colony	43
4.2.5	Hierarchical Cooperation in Multiple Colonies	44
4.2.6	Backward Scheduling Approach	45
4.3	Description of Algorithm	46
4.3.1	Initialize Pheromone and Parameter Setting	47
4.3.2	Local Improvement	50
4.3.3	Pheromone Updating	51
4.3.4	Restart Process	53
4.4	Experimental Results	53
4.5	Conclusion and Recommendation	53
4.5.1	Conclusion	53
4.5.2	Recommendation	54
	References	54
5	Proposal of New Paradigm for Hand and Foot Controls in the Context of Spatial Compatibility Effect	57
	Alan H.S. Chan and Ken W.L. Chan	
5.1	Introduction	57
5.1.1	Spatial Stimulus–Response (SR) Compatibility	58

Contents	ix
5.2 Research Plan and Methodology	59
5.3 Experiment 1: Spatial SR Compatibility Effect of Foot Controls	59
5.3.1 Design	59
5.4 Experiment 2: Spatial SR Compatibility Effect of Hand and Foot Controls	60
5.4.1 Design	61
5.5 Experiment 3: Spatial SR Compatibility Effect of Hand and Foot Controls for Stimulus and Response Arrays on Orthogonal Planes	61
5.5.1 Design	62
5.6 Experiment 4: Spatial SR Compatibility Effect of Hand and Foot Controls for Stimulus and Response Arrays on Parallel and Orthogonal Planes	62
5.6.1 Design	63
5.7 Analysis	64
References	64
6 Development of a Mathematical Model for Process with S-Type Quality Characteristics to a Quality Selection Problem	67
K. Tahera, R.N. Ibrahim, and P.B. Lochert	
6.1 Introduction	67
6.2 Model Development	69
6.3 Genetic Algorithm	74
6.3.1 Genetic Representation	75
6.3.2 Population Size	76
6.3.3 Generating Initial Population	76
6.3.4 Fitness Function	77
6.3.5 Selection	77
6.3.6 Mating or Crossover	77
6.3.7 Mutation	78
6.3.8 Termination Criteria	79
6.3.9 Generic Algorithm Parameters	79
6.4 Numerical Example	79
6.5 Conclusions	80
References	80
7 Temporal Aggregation and the Production Smoothing Model: Evidence from Electronic Parts and Components Manufacturing in Taiwan	83
Chien-wen Shen	
7.1 Introduction	83
7.2 Literature Review	84
7.3 Model Specifications	85

7.4 Empirical Results	87
7.4.1 Tests of Production-Smoothing Hypotheses	88
7.4.2 Model Analyses	88
7.5 Conclusions	93
References	94
8 Simulations of Gear Shaving and the Tooth Contact Analysis	95
Shinn-Liang Chang, Hung-Jeng Lin, Jia-Hung Liu, and Ching-Hua Hung	
8.1 Introduction	95
8.2 Mathematical Model of the Shaving Machine	96
8.3 Tooth Contact Analysis of the Shaved Gear	103
8.4 Longitudinal Tooth Crowning Introduced by Litvin	105
8.5 Conclusion	109
References	109
9 On Aggregative Methods of Supplier Assessment	111
Vladimír Modrák	
9.1 Introduction	111
9.2 Research Background and Motivation	112
9.3 The Importance of Suppliers Assessment and Selection	114
9.4 Alternative Techniques of Supplier Assessment	116
9.4.1 Assessment of the Quality of Supplied Products	117
9.4.2 Assessment by Adherence to Time Schedules	117
9.4.3 Supplier Assessment with Respect to the Schedule of Quantity	120
9.4.4 Aggregative Supplier Assessment	123
9.5 Discussion and Closing Remarks	124
References	124
10 Human Factors and Ergonomics for Nondestructive Testing	127
B.L. Luk and Alan H.S. Chan	
10.1 Introduction	127
10.2 Principles and Procedures	128
10.2.1 Dye Penetrant Inspection	128
10.2.2 Magnetic Particles Inspection	129
10.2.3 Ultrasonic Inspection	130
10.2.4 Eddy Current	132
10.3 Human Abilities and Skills Required	133
10.3.1 Perceptual and Cognitive Abilities	133
10.3.2 Physical Strength	135
10.3.3 Surface Preparation Technique	135
10.4 Ergonomics, Safety, and Health Problems	136
10.4.1 Illumination	136

10.4.2 Working Posture	136
10.4.3 Potential Chemical Hazards	138
10.5 Conclusions and Recommendations	140
References	141
11 A Novel Matrix Approach to Determine Makespan for Zero-Wait Batch Processes	143
Amir Shafeeq, M.I. Abdul Mutalib, K.A. Amminudin, and Ayyaz Muhammad	
11.1 Introduction	143
11.2 Batch Process	144
11.2.1 Makespan for Single-Product Batch Processing	145
11.2.2 Makespan for Multiproduct Batch Process	146
11.3 The Matrix Method	148
11.4 Application of the Matrix Method	150
11.5 Conclusion	152
References	153
12 Interactive Meta-Goal Programming: A Decision Analysis Approach for Collaborative Manufacturing	155
Hao W. Lin, Sev V. Nagalingam, and Grier C.I. Lin	
12.1 Introduction	155
12.2 Decision Making in Collaborative Manufacturing	156
12.3 Interactive Meta-Goal Programming-Based Decision Analysis Framework	157
12.3.1 Meta-Goals	157
12.3.2 Interactive Process	161
12.3.3 Interactive Meta-Goal Programming-Based Decision Analysis Workflow	167
12.4 Example	169
12.5 Conclusion	171
References	172
13 Nonlinear Programming Based on Particle Swarm Optimization	173
Takeshi Matsui, Kosuke Kato, Masatoshi Sakawa, Takeshi Uno, and Kenji Morihara	
13.1 Introduction	173
13.2 Nonlinear Programming Problem	174
13.3 Particle Swarm Optimization	174
13.4 Improvement of Particle Swarm Optimization	175
13.4.1 Generation of Initial Search Positions of Particles	176
13.4.2 Modified Move Schemes of a Particle	176
13.4.3 Division of the Swarm into Two Subswarms	177
13.4.4 Secession	178

13.4.5 Multiple Stretching Technique	179
13.4.6 The Procedure of Revised PSO	180
13.5 Numerical Example	181
13.6 Conclusions	183
References	183
14 A Heuristic for the Capacitated Single Allocation	
Hub Location Problem	185
Jeng-Fung Chen	
14.1 Introduction	185
14.2 Previous Related Studies	186
14.3 A Model	187
14.4 Heuristic	188
14.4.1 Determining the Number of Hubs	188
14.4.2 Selecting Hub Locations	189
14.4.3 Allocating Nonhubs To Hubs	189
14.4.4 Heuristic SATLCHLP	190
14.5 Computational Results	190
14.5.1 Australia Post Data Set	191
14.5.2 Results	191
14.6 Conclusions and Suggestions for Future Research	194
References	195
15 Multimodal Transport: A Framework for Analysis	197
Mark K.H. Goh, Robert DeSouza, Miti Garg, Sumeet Gupta, and Luo Lei	
15.1 Introduction	197
15.2 Literature Review	199
15.3 Theoretical Framework	200
15.4 Research Methodology	201
15.5 Case Study	202
15.5.1 Railways	203
15.5.2 Road	203
15.5.3 Maritime	203
15.5.4 Multimodal	204
15.6 Future Directions for Research	207
References	208
16 Fractional Matchings of Graphs	209
Jiguo Yu and Baoxiang Cao	
16.1 Terminology and Notation	209
16.2 Basic Results on Fractional Matching	210
16.3 Fractional Factor-Critical Graph	211
16.4 Fractional Deleted Graphs	215
16.5 Fractional Covered Graphs	217
16.6 Fractional Extendable Graph	220

Contents	xiii
16.7 Conclusion	224
References	224
17 Correlation Functions for Dynamic Load Balancing of Cycle Shops	227
Claudia Fiedler and Wolfgang Meyer	
17.1 Problem Statement	227
17.2 Load-Balancing Systems: State of the Art	229
17.3 Process Plan and Resource Model	230
17.4 Theory of Correlation Scheduling	232
17.4.1 Two Processes Being Sent to the Plant	232
17.4.2 Three Processes Being Sent to the Plant	233
17.4.3 Generalization to n Processes	233
17.5 Dynamic Scheduling	234
17.5.1 Collision Functions	234
17.5.2 Scheduling Procedure	235
17.6 Load Balancing	237
17.6.1 Load Balancing at System Level	237
17.6.2 Load Balancing at Subsystem Level	238
17.7 Conclusion	242
References	243
18 Neural Network-Based Integral Sliding Mode Control for Nonlinear Uncertain Systems	245
S.W. Wang and D.L. Yu	
18.1 Introduction	245
18.1.1 Sliding Mode Control	245
18.1.2 Integral Sliding Mode Control	246
18.1.3 Radial Basis Function Neural Network Approximation	246
18.2 Problem Statement	247
18.3 New Integral Sliding Surface	248
18.4 Sliding Mode Control Law	253
18.5 Numerical Example	254
18.6 Conclusions	256
References	256
19 Decentralized Neuro-Fuzzy Control of a Class of Nonlinear Systems	259
Miguel A. Hernández and Yu Tang	
19.1 Introduction	259
19.2 Problem Statement	260
19.3 Recurrent Neuro-fuzzy Networks	262
19.4 Design of the Decentralized Control	263
19.4.1 Control Law	263
19.4.2 Stability Analysis	264
19.5 Output Feedback	269

19.6 Experimental Results	269
19.7 Conclusions	272
References	273
20 A New Training Algorithm of Adaptive Fuzzy Control for Chaotic Dynamic Systems	275
Chun-Fei Hsu, Bore-Kuen Lee, and Tsu-Tian Lee	
20.1 Introduction	275
20.2 Problem Formulation	277
20.3 Design of AFC with PID-Type Learning Algorithm	278
20.3.1 Approximation of Fuzzy System	278
20.3.2 Design of PID-AFC	279
20.3.3 Design of PID-AFC with Bound Estimation	281
20.4 Simulation Results	284
20.5 Conclusions	287
References	289
21 General-Purpose Simulation Management for Satellite Navigation Signal Simulation	291
Ge Li, Xinyu Yao, and Kedi Huang	
21.1 Introduction	291
21.2 The Real-Time Application Requirements	292
21.2.1 Requirements for the Simulation Architecture	292
21.2.2 Requirements of the Real-Time Calculation for the High-Fidelity Model	292
21.2.3 Requirements of the Data Communication for Different Layers	293
21.2.4 Requirements of the Real-Time Simulation Engine	293
21.3 A General-Purpose Architecture for Satellite Navigation Signal Simulation	293
21.4 General-Purpose Real-Time Distributed Simulation Managements	295
21.4.1 Experiment Design and Management Techniques	295
21.4.2 Simulation Database Techniques	296
21.4.3 Simulation Management Techniques	297
21.4.4 System Scalability Realization	298
21.5 Conclusions	298
References	299
22 Multilayered Quality-of-Service Architecture with Cross-layer Coordination for Teleoperation System	301
X.U. Lei and L.I. Guo-dong	
22.1 Introduction	301
22.2 Network Performance Parameters Analysis	302
22.3 Architectural Framework	303

22.4	Communication Network QoS Enhancement	305
22.4.1	Network Layer QoS Optimization	305
22.4.2	Data Link Layer QoS Optimization	306
22.5	Resource Network QoS Enhancement	307
22.5.1	Transport Layer QoS Optimization	307
22.5.2	Presentation Layer QoS Enhancing	308
22.5.3	Session Layer QoS Supervision	309
22.5.4	Application Layer QoS	309
22.6	Cross-layer Coordination and Adaptation	309
22.7	Application Scenarios	311
22.8	Conclusion	313
	References	313
23	Improvement of State Estimation for Systems with Chaotic Noise	315
	Pitikhate Sooraksa and Prakob Jandaeng	
23.1	Introduction	315
23.2	Improvement of Adaptive Kalman Filtering	316
23.3	Results	319
23.3.1	Model	319
23.3.2	Computer Simulation	319
23.4	Conclusion	325
	References	325
24	Combined Sensitivity–Complementary Sensitivity Min–Max Approach for Load Disturbance–Setpoint Tradeoff Design	327
	Ramon Vilanova and Orlando Arrieta	
24.1	Introduction	327
24.2	Problem Formulation	328
24.2.1	PID Controller	329
24.2.2	Process Model	329
24.2.3	Design Problem Formulation	329
24.3	Solution to the Optimal Approximation Problem	331
24.4	Step Response Tuning	333
24.5	Disturbance Attenuation Tuning	335
24.6	Example	336
24.7	<i>Trade-off</i> Tuning	338

25	Nonlinear Adaptive Sliding Mode Control for a Rotary Inverted Pendulum	345
	Yanliang Zhang, Wei Tech Ang, Jiong Jin, Shudong Zhang, and Zhihong Man	
25.1	Introduction	345

25.2	Background	346
25.2.1	Mathematical Model of System	346
25.2.2	Sliding Mode Control	347
25.2.3	Adaptive Control	348
25.3	Sliding Mode Control: Design and Simulation	348
25.3.1	Linear Sliding Mode Control	348
25.3.2	Nonlinear Sliding Mode Control	350
25.4	Nonlinear Adaptive Sliding Mode Control Design and Simulation	353
25.4.1	System Parameters	353
25.4.2	Parameter Selection	356
25.5	Experimental Results	357
25.6	Conclusion	359
	References	359
26	Robust Load Frequency Sliding Mode Control Based on Uncertainty and Disturbance Estimator	361
	P.D. Shendge, B.M. Patre, and S.B. Phadke	
26.1	Introduction	361
26.2	Dynamic Model for Load Frequency Control	362
26.3	Model Following and UDE-Based Control Law	364
26.4	Design of Control	364
26.4.1	Uncertainty and Disturbance Estimation with First-Order Filter	366
26.4.2	Uncertainty and Disturbance Estimation with Second-Order Filter	366
26.4.3	Uncertainty and Disturbance Estimation with n th-Order Filter	367
26.5	Model Following and UDE Based LFC	368
26.6	Results	370
26.7	Conclusion	373
	References	373
27	Robust Intelligent Motion Control for Linear Piezoelectric Ceramic Motor System Using Self-constructing Neural Network	375
	Chun-Fei Hsu, Bore-Kuen Lee, and Tsu-Tian Lee	
27.1	Introduction	375
27.2	Problem Formulation	377
27.3	Robust Intelligent Motion Controller Design	378
27.3.1	Description of SCNN	379
27.3.2	Approximation of SCNN	381
27.3.3	Design of RIMC	382
27.4	Experimental Results	384
27.5	Conclusions	388
