Preface	v
Notations	xv
1 Pre-Semirings, Semirings and Dioids	1
1 Founding Examples	1
2 Semigroups and Monoids	3
2.1 Definitions and Examples	3
2.2 Combinatorial Properties of Finite Semigroups	6
2.3 Cancellative Monoids and Groups	7
3 Ordered Monoids	9
3.1 Ordered Sets	9
3.2 Ordered Monoids: Examples	11
3.3 Canonical Preorder in a Commutative Monoid	12
3.4 Canonically Ordered Monoids	13
3.5 Hemi-Groups	17
3.6 Idempotent Monoids and Semi-Lattices	17
3.7 Classification of Monoids	20
4 Pre-Semirings and Pre-Dioids	20
4.1 Right, Left Pre-Semirings	20
4.2 Pre-Semirings	22
4.3 Pre-Dioids	22
5 Semirings	23
5.1 Definition and Examples	23
5.2 Rings and Fields	24
5.3 The Absorption Property in Pre-Semi-Rings	25
5.4 Product of Semirings	26
5.5 Classification of Pre-Semirings and Semirings	26
6 Dioids	28
6.1 Definition and Examples	28

6.2	Dioid of Endomorphisms of a Canonically Ordered Commutative Monoid	31
6.3	Symmetrizable Dioids	33
6.4	Idempotent and Selective Dioids	33
6.5	Doubly-Idempotent Dioids and Distributive Lattices. Doubly-Selective Dioids	34
6.6	Idempotent-Cancellative Dioids. Selective-Cancellative Dioids	36
6.7	Idempotent-Invertible Dioids. Selective-Invertible Dioids ..	37
6.8	Product of Dioids	38
6.9	Dioid Canonically Associated with a Semiring	39
6.10	Classification of Dioids	40
2	Combinatorial Properties of (Pre)-Semirings	51
1	Introduction	51
2	Polynomials and Formal Series with Coefficients in a (Pre-) Semiring	52
2.1	Polynomials	52
2.2	Formal Series	54
3	Square Matrices with Coefficients in a (Pre)-Semiring	54
4	Bideterminant of a Square Matrix. Characteristic Bipolynomial	55
4.1	Reminder About Permutations	56
4.2	Bideterminant of a Matrix	58
4.3	Characteristic Bipolynomial	59
5	Bideterminant of a Matrix Product as a Combinatorial Property of Pre-Semirings	61
6	Cayley–Hamilton Theorem in Pre-Semirings	65
7	Semirings, Bideterminants and Arborescences	69
7.1	An Extension to Semirings of the Matrix-Tree Theorem	69
7.2	Proof of Extended Theorem	70
7.3	The Classical Matrix-Tree Theorem as a Special Case	74
7.4	A Still More General Version of the Theorem	75
8	A Generalization of the Mac Mahon Identity to Commutative Pre-Semirings	76
8.1	The Generalized Mac Mahon Identity	77
8.2	The Classical Mac Mahon Identity as a Special Case	79
3	Topology on Ordered Sets: Topological Dioids	83
1	Introduction	83
2	Sup-Topology and Inf-Topology in Partially Ordered Sets	83
2.1	The Sup-Topology	84
2.2	The Inf-Topology	85
3	Convergence in the Sup-Topology and Upper Bound	86
3.1	Definition (Sup-Convergence)	86
3.2	Concepts of Limit-sup and Limit-inf	88

4	Continuity of Functions, Semi-Continuity	89
5	The Fixed-Point Theorem in an Ordered Set	90
6	Topological Dioids	91
6.1	Definition	91
6.2	Fixed-Point Type Linear Equations in a Topological Dioid: Quasi-Inverse	93
7	P-Stable Elements in a Dioid	97
7.1	Examples	98
7.2	Solving Linear Equations	100
7.3	Solving “Nonlinear” Equations	103
8	Residuation and Generalized Solutions	107
4	Solving Linear Systems in Dioids	115
1	Introduction	115
2	The Shortest Path Problem as a Solution to a Linear System in a Dioid	116
2.1	The Linear System Associated with the Shortest Path Problem	116
2.2	Bellman’s Algorithm and Connection with Jacobi’s Method	118
2.3	Quasi-Inverse of a Matrix with Elements in a Semiring	118
2.4	Minimality of Bellman–Jacobi Solution	119
3	Quasi-Inverse of a Matrix with Elements in a Semiring Existence and Properties	120
3.1	Definitions	120
3.2	Graph Associated with a Matrix. Generalized Adjacency Matrix and Associated Properties	121
3.3	Conditions for Existence of the Quasi-Inverse A^*	125
3.4	Quasi-Inverse and Solutions of Linear Systems Minimality for Dioids	127
4	Iterative Algorithms for Solving Linear Systems	129
4.1	Generalized Jacobi Algorithm	129
4.2	Generalized Gauss–Seidel Algorithm	130
4.3	Generalized Dijkstra Algorithm (“Greedy Algorithm”) in Some Selective Dioids	133
4.4	Extensions of Iterative Algorithms to Algebras of Endomorphisms	136
5	Direct Algorithms: Generalized Gauss–Jordan Method and Variations	145
5.1	Generalized Gauss–Jordan Method: Principle	145
5.2	Generalized Gauss–Jordan Method: Algorithms	151
5.3	Generalized “Escalator” Method	152
6	Examples of Application: An Overview of Path-finding Problems in Graphs	156
6.1	Problems of Existence and Connectivity	158
6.2	Path Enumeration Problems	158

6.3	The Maximum Capacity Path Problem and the Minimum Spanning Tree Problem	159
6.4	Minimum Cardinality Paths	159
6.5	The Shortest Path Problem	160
6.6	Maximum Reliability Path	160
6.7	Multicriteria Path Problems	160
6.8	The K^{th} Shortest Path Problem	161
6.9	The Network Reliability Problem	163
6.10	The η -Optimal Path Problem	164
6.11	The Multiplier Effect in Economy	165
6.12	Markov Chains and the Theory of Potential	165
6.13	Fuzzy Graphs and Relations	166
6.14	The Algebraic Structure of Hierarchical Clustering	167
5	Linear Dependence and Independence in Semi-Modules and Moduloids	173
1	Introduction	173
2	Semi-Modules and Moduloids	173
2.1	Definitions	173
2.2	Morphisms of Semi-Modules or Moduloids. Endomorphisms	175
2.3	Sub-Semi-Module. Quotient Semi-Module	176
2.4	Generated Sub-Semi-Module. Generating Family of a (Sub-) Semi-Module	176
2.5	Concept of Linear Dependence and Independence in Semi-Modules	177
3	Bideterminant and Linear Independence	181
3.1	Permanent, Bideterminant and Alternating Linear Mappings	182
3.2	Bideterminant of Matrices with Linearly Dependent Rows or Columns: General Results	184
3.3	Bideterminant of Matrices with Linearly Dependent Rows or Columns: The Case of Selective Dioids	187
3.4	Bideterminant and Linear Independence in Selective-Invertible Dioids	192
3.5	Bideterminant and Linear Independence in Max-Min or Min-Max Dioids	200
6	Eigenvalues and Eigenvectors of Endomorphisms	207
1	Introduction	207
2	Existence of Eigenvalues and Eigenvectors: General Results	208
3	Eigenvalues and Eigenvectors in Idempotent Dioids	212
4	Eigenvalues and Eigenvectors in Dioids with Multiplicative Group Structure	220
4.1	Eigenvalues and Eigenvectors: General Properties	220

4.2	The Perron–Frobenius Theorem for Some Selective-Invertible Dioids	227
5	Eigenvalues, Bideterminant and Characteristic Bipolynomial	231
6	Applications in Data Analysis	233
6.1	Applications in Hierarchical Clustering	234
6.2	Applications in Preference Analysis: A Few Answers to the Condorcet Paradox	238
7	Applications to Automatic Systems: Dynamic Linear System Theory	242
7.1	Classical Linear Dynamic Systems in Automation	243
7.2	Dynamic Scheduling Problems	244
7.3	Modeling Discrete Event Systems Using Petri Nets	244
7.4	Timed Event Graphs and Their Linear Representation in $(\mathbb{R} \cup \{-\infty\}, \text{Max}, +)$ and $(\mathbb{R} \cup \{+\infty\}, \text{min}, +)$	247
7.5	Eigenvalues and Maximum Throughput of an Autonomous System	251
7	Dioids and Nonlinear Analysis	257
1	Introduction	257
2	MINPLUS Analysis	261
3	Wavelets in MINPLUS Analysis	268
4	Inf-Convergence in MINPLUS Analysis	271
5	Weak Solutions in MINPLUS Analysis, Viscosity Solutions	278
6	Explicit Solutions to Nonlinear PDEs in MINPLUS Analysis	283
6.1	The Dirichlet Problem for Hamilton–Jacobi	283
6.2	The Cauchy Problem for Hamilton–Jacobi: The Hopf–Lax Formula	288
7	MINMAX Analysis	291
7.1	Inf-Solutions and Inf-Wavelets in MINMAX Analysis	291
7.2	Inf-Convergence in MINMAX Analysis	293
7.3	Explicit Solutions to Nonlinear PDEs in MINMAX Analysis	294
7.4	Eigenvalues and Eigenfunctions for Endomorphisms in MINMAX Analysis	295
8	The Cramer Transform	298
8	Collected Examples of Monoids, (Pre)-Semirings and Dioids	313
1	Monoids	313
1.1	General Monoids	314
1.2	Groups	318
1.3	Canonically Ordered Monoids	319
1.4	Hemi-Groups	323
1.5	Idempotent Monoids (Semi-Lattices)	325
1.6	Selective Monoids	328
2	Pre-Semirings and Pre-Dioids	331

2.1	Right or Left Pre-Semirings and Pre-Dioids	332
2.2	Pre-Semiring of Endomorphisms of a Commutative Monoid	335
2.3	Pre-Semiring, Product of a Pre-Dioid and a Ring	336
2.4	Pre-Dioids	337
3	Semirings and Rings	338
3.1	General Semirings	339
3.2	Rings	340
4	Dioids	341
4.1	Right or Left Dioids	341
4.2	Dioid of Endomorphisms of a Canonically Ordered Commutative Monoid. Examples.	345
4.3	General Dioids	348
4.4	Symmetrizable Dioids	351
4.5	Idempotent Dioids	353
4.6	Doubly Idempotent Dioids, Distributive Lattices	357
4.7	Idempotent-Cancellative and Selective-Cancellative Dioids	358
4.8	Idempotent-Invertible and Selective-Invertible Dioids	361

Graphs, Dioids and Semirings

New Models and Algorithms

Gondran, M.; Minoux, M.

2008, XX, 388 p. 26 illus., Hardcover

ISBN: 978-0-387-75449-9
